Selected Financial Data

Syngenta AG has prepared the consolidated financial statements in US dollars (\$) and in accordance with IFRS Accounting Standards (IFRS or IFRSs) as issued by the International Accounting Standards Board. Financial figures are presented in millions of dollars (\$m) except where otherwise stated. The basis of preparation of the consolidated financial statements and the key accounting policies are discussed in Note 1 and in Notes 2 and 26, respectively, to the consolidated financial statements.

The selected financial highlights information in accordance with IFRS presented below has been extracted from the consolidated financial statements of Syngenta AG. Investors should read the entire consolidated financial statements and not rely on the summarized information. The information includes the results of operations and the net assets of Woodbridge Seed, LLC. from July 24, 2020, Sensako (Pty) Ltd. from August 14, 2020, Valagro S.p.A. from October 1, 2020, Progeny Advance Genetics, Inc. from December 3, 2020, Hollar & Co., Inc. from December 16, 2020, Dipagro Ltda. and Vipagro Ltda. from October 7, 2021, Semillas Ceres, S.A. de C.V. from July 5, 2022, Agro Jangada Ltda. from November 1, 2022, Macspred Pty Ltd. from April 28, 2023, Agrocerrado Produtos Agricolas E Assistencia Tecnica Ltda. from May 3, 2023, Kubix AgroIndustrial Ltda. from June 20, 2023, Feltrin Sementes Ltda. from July 3, 2023, Produtécnica Nordeste Comércio de Insumos Agrícolas Ltda. from July 1, 2024 and Intrinsyx Bio Inc. from December 24, 2024.

Introduction

In the following discussion, references to "Syngenta" incorporate Syngenta AG and all of its subsidiaries and interests in associates and joint ventures.

The following discussion includes forward-looking statements subject to risks and uncertainty. See "Forward-looking statements" at the end of this document. This discussion also includes non-GAAP financial data in addition to GAAP results. See Appendix A to this section for a reconciliation of this data and explanation of the reasons for presenting such data.

Constant exchange rates

Approximately 40 percent of Syngenta's sales and 60 percent of Syngenta's costs in 2024 were denominated in currencies other than US dollars. Therefore, Syngenta's results were significantly impacted by movements in exchange rates. Sales in 2024 were 12 percent lower than 2023 on a reported basis, 8 percent lower when calculated at constant rates of exchange. Syngenta therefore provides analysis of results calculated at constant exchange rates ("CER") and also actual results to allow an assessment of performance before and after taking account of currency fluctuations. To present CER information, current period results for entities reporting in currencies other than US dollars are converted into US dollars at the prior period's exchange rates, rather than the exchange rates for this year. An example of this calculation is included in Appendix A of this section.

Overview

Syngenta is a world leading agribusiness operating in the crop protection, seeds, professional solutions and flowers markets. Crop protection includes chemicals such as herbicides, insecticides, fungicides and seed treatments to control weeds, insects and diseases in crops, as well as biological products, and are essential inputs enabling growers around the world to improve agricultural productivity and food quality. In Seeds, Syngenta operates in the high value commercial sectors of field crops (including corn, oilseeds, and cereals) and vegetables. The professional solutions business provides turf and landscape and professional pest management products, and the flowers business provides flower seeds, cuttings and young plants to professional growers and consumers.

Syngenta's results are affected, both positively and negatively, by, among other factors: general economic conditions; weather conditions, which can influence the demand for certain products over the course of a season and the quantity and cost of seeds supply; commodity crop prices; and exchange rate fluctuations. Government measures, such as subsidies or rules regulating the use of agricultural products, genetically modified seeds, or areas allowed to be planted with certain crops, also can have an impact on Syngenta's industry. Syngenta's results are also affected by the growing importance of biotechnology to agriculture and the use of genetically modified crops. In future years, climate change may have both positive and negative impacts on Syngenta's results. Climate change may make growing certain crops more or less viable in different geographic areas, but is not likely to reduce overall demand for food and feed. Syngenta currently sells and is developing products to improve the water productivity of plants and increase tolerance to drought and heat. Legislation may be enacted in the future that limits carbon dioxide emissions in the manufacture of Syngenta's products or increases the costs associated with such emissions. Syngenta works actively to make its production operations more energy efficient and to reduce the rate of carbon dioxide emissions per unit of sales revenue.

Syngenta operates globally to capitalize on its technology and marketing base. In 2024, regional management structures were strategically realigned to more effectively address market dynamics. The following analysis of revenue by primary geographical market reflects the new organization and comparative figures have been restated accordingly. Syngenta's largest market in 2024 was Latin America, which represented approximately 36 percent of consolidated sales (2023: 35 percent), followed by North America at 23 percent (2023: 24 percent), Europe at 17 percent (2023: 16 percent), Asia, Middle East and Africa at 16 percent (2023: 16 percent), China at 4 percent (2023: 4 percent) and Other at 4 percent (2023: 5 percent). Markets for agricultural products in Europe and North America are seasonal resulting in both sales and operating profit for Syngenta in these markets being weighted towards the first half of the calendar year, which largely reflects the northern hemisphere planting and growing cycle. Latin America has its main selling season in the second half of the year due to its location in the southern hemisphere. Asia, Middle East and Africa sales and operating profit are more uniform throughout the year.

Syngenta's most significant manufacturing and research and development sites are located in Switzerland, the United Kingdom ("UK"), and the United States of America ("USA" or "US"). During 2024, Syngenta's significant manufacturing site in China was divested to a fellow subsidiary of Syngenta Group as a result of legal entity reorganization in the wider group. Syngenta has major research centers focused on identifying new active ingredients in Stein, Switzerland and Jealott's Hill, UK. Syngenta's primary center for agricultural genomics and biotechnology research is in the USA.

References in this document to market share estimates are based where possible on global agrochemical and biotechnology industry information provided by a third party or on information published by major competitors and are supplemented by Syngenta marketing staff estimates.

The consolidated financial statements are presented in US dollars, as this is the major currency in which revenues are denominated. However, significant but differing proportions of Syngenta's revenues, costs, assets and liabilities are denominated in currencies other than US dollars. Approximately 11 percent of sales in 2024 were denominated in Euros, while a significant proportion of costs for research and development, administration, general overhead and manufacturing were denominated in Swiss francs and British pounds sterling (approximately 14 percent in total). Sales in Swiss francs and British pounds sterling together made up approximately 1 percent of total sales. Marketing and distribution costs are more closely linked to the currency split of the sales. As a result, operating profit in US dollars can be significantly affected by movements in exchange rates, in particular movements of the Swiss franc, British pound sterling, Euro and Brazilian real, relative to the US dollar, and the relative impact on operating profit may differ from that on sales. Sales in emerging markets are more than 50 percent of Syngenta's total sales. Where it is not commercially disadvantageous, Syngenta sets sales prices in these markets in US dollars, particularly in parts of Latin America, Russia and the Ukraine. However, in many emerging territories Syngenta sells in the local currency of the countries in the territory and as a result has a long exposure to multiple emerging market currencies. The effects of currency fluctuations within any one year have been reduced by risk management strategies such as hedging and the aforementioned US dollar sales pricing. For further information on these strategies please refer to Note 24 of the consolidated financial statements.

The consolidated financial statements are based upon Syngenta's accounting policies and, where necessary, the results of management estimations. Syngenta believes that the critical accounting policies and estimations underpinning the financial statements are in the areas of (i) royalty and license income, (ii) capitalization of development costs, (iii) impairment, (iv) acquisition accounting, (v) adjustments to revenue and trade receivables, (vi) deferred tax assets, (vii) uncertain tax positions, (viii) seeds inventory valuation and allowances, (ix) environmental provisions, (x) defined benefit post-employment benefits and (xi) litigation provisions. These policies are described in more detail in Notes 2 and 26 to the consolidated financial statements.

Summary of results

Net income in 2024 attributable to Syngenta's shareholder was \$269 million, compared to \$1,086 million in 2023.

Sales in 2024 were 12 percent lower than 2023, 8 percent lower at constant exchange rates, with a 6 percent decrease in sales volumes and a further 2 percent decrease in local currency sales prices. Currency movements decreased reported sales by 4 percent. Sales of Crop Protection products decreased by 13 percent, 9 percent at constant exchange rates and Seeds sales were 4 percent lower than 2023, 2 percent at constant exchange rates. Adverse weather conditions, particularly in the first half of the year, and continued channel inventory reductions, partly from the higher financing costs of working capital, reduced sales volumes in Crop Protection. This was compounded by new generic supply capacity coming on stream, which adversely impacted sales prices, particularly of older technologies. Gross profit margin was flat from year to year, 2 percent higher at constant exchange rates, as raw material cost reductions offset the lower sales prices.

Operating income as a percentage of sales was 8.4 percent in 2024. Excluding restructuring and impairments, operating income as a percentage of sales decreased by 2.6 percent in 2024 compared with 2023 despite the flat gross profit margin, partly from an increased charge to provisions for doubtful receivables compared to the low level in 2023. Currency exchange rate impacts decreased operating income by approximately \$550 million.

Cash flow from operating activities before change in net working capital was \$831 million lower than in 2023, largely due to the lower operating income. Change in net working capital was an inflow of \$1,829 million compared to an outflow of \$1,036 million in 2023, with solid collections of trade receivables, despite reduced sales, and inflows from lower trade payable levels compared with the outflows in 2023, which were due to inventory management actions. Inventories were further reduced and at the end of 2024 were 38 percent of sales compared to 42 percent at the end of 2023. Trade payables increased from 36 percent of sales at the end of 2023 to 39 percent. Cash flow used for investing activities in 2024 was \$1,056 million compared to \$2,040 million in 2023, with the lower outflows mainly attributable to movements in marketable securities investments in Argentina, discussed in more detail below, but also lower additions to property, plant and equipment. Cash outflows from financing activities were \$2,081 million in 2024 compared to inflows of \$1,767 million in 2023, with a reduction in cash balances and higher free cash flow being used to reduce short-term debt.

Marketing and distribution expenses increased by 4 percent, 7 percent at constant exchange rates, with bad debt charges in 2024, mainly in Latin America, compared with net releases of bad debt provisions in 2023 in Ukraine and Russia, due to improved visibility of the impact of the military conflict on business performance following its onset in 2022. Research and development expense was 4 percent higher than 2023, also at constant exchange rates, due mainly to higher amortization of previously capitalized development costs.

General and administrative, including restructuring and impairment, the components of which are described under the Restructuring and impairment heading below, increased by \$186 million compared with 2023. General and administrative, excluding restructuring and impairment, was \$213 million lower than 2023, due to savings from travel and personnel costs, deferral of project costs and reduced litigation costs. Foreign exchange hedging gains of approximately \$30 million were flat from year to year.

Restructuring and impairment expenses in 2024 were \$472 million (2023: \$81 million). Cash restructuring costs were \$267 million (2023: \$43 million) and non-cash impairments were \$278 million (2023: \$38 million). Divestment gains included in Restructuring were \$73 million (2023: \$nil). During 2024, Syngenta set up a Transformation Office to shape and implement strategic initiatives and enable productivity improvements across the organization over a multi-year period. Cash costs included project costs and severance and non-cash costs included asset impairments related to strategic shifts impacting crop and geographic commercial priorities and the global organizational footprint. These costs are described in more detail in Note 6 to the consolidated financial statements.

Financial expense, net was \$405 million lower than 2023, due largely to the impact of the losses on Argentina marketable securities in 2023. During 2023, restrictions on foreign exchange transactions in Argentina tightened significantly and substantially limited the ability of Syngenta Agro S.A., a subsidiary of Syngenta AG (hereafter "Syngenta Argentina") to secure foreign currency and make payments for imports and distributions out of Argentina. As a result, Syngenta Argentina invested the peso cash generated from operations into marketable securities to manage the foreign currency exposure. In the final quarter of 2023, the Argentine government significantly devalued the peso by more than 100 percent against the US dollar, which adversely impacted the value of Syngenta Argentina's marketable securities, resulting in a net loss of \$272 million in 2023, largely unrealized. During 2024, the restrictions eased somewhat and gains of \$69 million resulted from unwinding of marketable securities positions. As at December 31, 2024, \$94 million of marketable securities were reported on the balance sheet (December 31, 2023: \$441 million). Management continues to closely monitor the risks posed by the Argentine economic environment on Syngenta's business operations.

The tax rate increased to 62 percent in 2024 from 24 percent in 2023 with the largest increases coming from the effects of income taxed at different rates due to the profit allocation within the group and the effect of non-recognition of current year tax losses in Switzerland and Argentina.

Acquisitions, divestments and other significant transactions

2024

On July 1, 2024, Syngenta acquired 100 percent of the issued shares of Produtécnica Nordeste Comércio de Insumos Agrícolas Ltda., a limited liability company incorporated in Brazil, a distributor of agricultural products in the Brazilian states of Maranhao, Piaui and Tocantis of Brazil. The acquisition will enable Syngenta to strengthen its presence and explore further expansion opportunities in the North and Northeast regions of Brazil.

On December 17, 2024, Syngenta completed the sale of certain of its subsidiaries based in China to Syngenta Group Co. Ltd, the parent company of Syngenta Group, for a consideration of \$225 million.

On December 24, 2024, Syngenta exercised a call option and obtained 100 percent control of Intrinsyx Bio Inc., a former associate in which Syngenta held a 40 percent equity ownership. Intrinsyx Bio Inc. is a US-based research and development company involved in the development of biological products for the Crop Protection segment and will enable Syngenta to develop new products for the biological market.

2023

On April 28, 2023, Syngenta acquired 100 percent of the issued shares of Macspred Pty Ltd., a limited liability company incorporated in Australia, a specialist in weed management for the forestry, roads, rail, utilities, and infrastructure sectors. The acquisition enables Syngenta to enter, through its Professional Solutions business, into the forestry products and vegetation markets in Australia.

On May 3, 2023, Syngenta acquired 100 percent of the issued shares of Agrocerrado Produtos Agricolas E Assistencia Tecnica Ltda., a limited liability company incorporated in Brazil, a distributor of agricultural products in the Minas Gerais state of Brazil. The acquisition enables Syngenta to strengthen its presence and explore further expansion opportunities in Minas Gerais.

On June 20, 2023, Syngenta acquired 100 percent of the issued shares of Kubix AgroIndustrial Ltda. ("Kubix"), a limited liability company incorporated in Brazil. Kubix, based in Indaiatuba, state of Sao Paulo, is a production facility that manufactures crop protection products. The acquisition will increase Syngenta's manufacturing capacity to meet growing demand.

On July 3, 2023, Syngenta acquired 100 percent of the issued shares of Feltrin Sementes Ltda. ("Feltrin"), a limited liability company incorporated in Brazil. Feltrin is a vegetable seed breeding and distribution company based in Rio Grande do Sul. The acquisition enables Syngenta to increase its vegetable seeds position through Feltrin's strong distribution network.

Restructuring programs

Restructuring costs are discussed in detail in Note 6 to the consolidated financial statements.

Results of operations 2024 compared with 2023

Sales commentary

Syngenta's consolidated sales for 2024 were \$16,981 million, compared with \$19,196 million in 2023, a decrease of 12 percent year on year. At constant exchange rates sales decreased by 8 percent. The analysis by product line is as follows:

(\$m, except change %)					Change		
Product line	2024	2023	Volume %	Local price %	CER %	Currency %	Actual %
Selective herbicides	2,867	3,771	-14	-8	-22	-2	-24

¹ Crop Protection sales to Seeds and Seeds sales to Crop Protection

Sales by region for Crop Protection are as follows:

(\$m, except change %)					Change		
Region	2024	2023	Volume %	Local price %	CER %	Currency %	Actual %
Asia, Middle East and Africa	1,938	2,223	-7	-	-7	-6	-13
China	653	608	+16	-5	+11	-4	+7
Europe	1,939	2,197	-10	-2	-12	-	-12
Latin America	5,237	5,801	+3	-5	-2	-8	-10
North America	2,785	3,656	-18	-6	-24	-	-24
Other	711	948	n/a	n/a	n/a	n/a	n/a
Total Crop Protection	13,263	15,433	-7	-3	-10	-4	-14

Asia, Middle East and Africa

Sales in Asia, Middle East and Africa were 13 percent below 2023, 7 percent lower at constant exchange rates. Prices were flat with volumes in 2024 decreasing 7 percent compared with 2023. Sales growth in India was more than offset by weaker conditions in Pakistan and Bangladesh and the impact of high opening channel inventories and supply constraints in Russia. Prices of non-selective herbicides were under pressure in Indonesia.

China

In 2024, sales in China grew by 7 percent, 11 percent at constant exchange rates with volume growth of 16 percent partly offset by price declines of 5 percent, due to a very strong performance in fungicides, driven by ADEPIDYN® technology, strong momentum from Biologicals and a successful launch of TYMIRIUM® technology, providing long-lasting protection against a broad spectrum of nematode pests and diseases.

Europe

Sales in Europe fell 12 percent in 2024, also at constant exchange rates with volume declines of 10 percent and price reductions of 2 percent. 2024 sales were significantly impacted by channel destocking, but by the end of the year, channel stock was estimated at back to normal levels in most markets. Pressure from generics also led to price and volume declines partly offset by market share gains in Ukraine and a successful launch of MIRAVIS® in the UK.

Latin America

In 2024, sales in Latin America were 10 percent lower than in 2023, largely due to currency. At constant exchange rates, 2024 sales were 2 percent lower than 2023 with a 3 percent increase in volumes offset by a 5 percent decrease in prices. Brazil sales declined 5 percent driven by price pressure in post-patent active ingredients and there was a strong market contraction and unfavorable weather conditions in Argentina. Sales of ADEPIDYN® technology grew strongly in Brazil.

North America

Sales in North America fell by 24 percent compared with 2023, also at constant exchange rates with 18 percent lower volumes and 6 percent decline in prices resulting from channel destocking and market contraction driving a challenging pricing environment.

Sales by region for Seeds are as follows:

(\$m, except change %)					Change		
Region	2024	2023	Volume %	Local price %	CER %	Currency %	Actual %
Asia, Middle East and Africa	790	864	-15	+13	-2	-7	-9
China	78	80	-1	-	-1	-1	-2
Europe	817	809	-1	+1	_	+1	+1
Latin America	864	966	-2	-5	-7	-4	-11
North America	974	951	+1	+1	+2	-	+2
Other	80	111	n/a	n/a	n/a	n/a	n/a
Flowers	191	183	-	+3	+3	+1	+4
Total Seeds	3,794	3,964	-4	+2	-2	-2	-4

Asia, Middle East and Africa

Sales in Asia, Middle East and Africa decreased by 9 percent in 2024 compared with 2023, 2 percent at constant exchange rates, with volumes decreases of 15 percent largely offset by price increases of 13 percent. The volumes decline was largely due to trade restrictions on the import of sunflower seeds into Russia. Sales price increases were partly to offset the impact of weaker currencies versus the US dollar.

Europe

In 2024, sales in Europe increased by 1 percent due to currency impacts, with volume declines offset by price increases. Vegetables had a strong performance in 2024 with price increases offsetting cost inflation and currency fluctuations, new product introductions driving 21 percent of sales and estimated market share gains. In 2024 an estimated market share gain was delivered in corn, despite production being challenged by adverse weather conditions.

Latin America

Latin America sales decreased by 11 percent in 2024, 7 percent at constant exchange rates. Volumes fell by 2 percent and prices decreased by 5 percent. In 2024, Brazil had strong growth in branded corn volumes, offset by lower private label sales and a change of business model in soybean reduced sales revenues, but improved profitability. Disease pressure in Argentina reduced corn area in 2024.

North America

Sales in North America were 2 percent higher in 2024 than in 2023 with volumes and prices each increasing by 1 percent. Soybean sales increased significantly in 2024 compared with 2023. Corn gained market share in areas of commercial focus, although offset by lower market share in other areas. Vegetables demand returned to pre-covid levels in 2024, but sales volumes decreased due to channel destocking.

Flowers

Sales of Flowers increased by 4 percent in 2024 compared with 2023, 3 percent at constant currency, with local currency prices increasing by 3 percent, representing a strong pricing performance in challenging market conditions.

Operating income

Variances in the tables below reflect the profit impact of changes year on year. For example, an increase of sales or a decrease in costs is a positive variance and a decrease in sales or increase in costs is a negative variance.

Syngenta Operating Income	Total as repo		Chan	ge	Restructurii impairm	-	Before restru		Change k restructuri impairm	ng and

Total segments	1,903	2,644	-28%
Restructuring	(472)	(81)	-483%
Syngenta	1,431	2,563	-44%

The two tables above do not represent income statements prepared under IFRS. Please refer to the information reported in the consolidated financial statements.

Overall Syngenta operating income

Operating income in 2024 was 44 percent lower than 2023. Restructuring and impairment charges were \$472 million in 2024 and are described in detail in Note 6 to the consolidated financial statements.

Excluding restructuring and impairment, operating income in 2024 was \$1,903 million compared to \$2,644 million in 2023, \$896 million lower in Crop Protection and \$155 million higher in Seeds, as described below. Sales were 12 percent lower than 2023, 8 percent at constant exchange rates and are explained in more detail above. Excluding restructuring and impairment, gross profit was 12 percent lower while the gross profit margin was maintained.

Marketing and distribution costs in 2024 increased by 4 percent to \$2,753 million, seven percent at constant exchange rates. The impact of lower sales volumes on variable selling and logistics costs was more than offset by provisions for bad debts, which were approximately \$143 million higher in 2024 due to higher charges in Latin America and significant releases of bad debt provisions in Russia and Ukraine in 2023 due to improved visibility of the impact of the military conflict on customers' ability to repay receivable balances in those countries.

Research and development costs were 4 percent higher in 2024 compared with 2023, also at constant exchange rates, with increased amortization of previously capitalized development costs offsetting productivity savings.

Significantly lower other general and administrative costs in 2024 included productivity savings from travel and personnel costs, deferral of project expenses and a significant decrease in litigation expenses due to the conclusion in 2023 of all material exporter plaintiff claims related to Viptera.

Currency exchange rate movements reduced 2024 operating profit by an estimated \$550 million relative to 2023, with hedging gains relatively flat at approximately \$30 million.

For further discussion on Syngenta operating income, see Summary of results above.

¹ Amounts before restructuring and impairment are non-GAAP measures. Please refer to Appendix A of the Operating and Financial Review for a more detailed description

² For 2023, \$30 million of non-cash costs have been reclassified from Restructuring costs to Other general and administrative to be consistent with the 2024 presentation

Operating income by segment Crop Protection	•	Total as reported under IFRS		
_(\$m, except change %)	2024	20232	Actual %	CER %
Sales	13,208	15,251	-13%	-9%
Cost of goods sold	(8,816)	(10,057)	+12%	+12%
Gross profit	4,392	5,194	-15%	-4%
as a percentage of sales	33%	34%		
Marketing and distribution	(1,945)	(1,803)	-8%	-10%
Research and development	(723)	(704)	-3%	-2%
General and administrative:				
Other general and administrative	(230)	(297)	+23%	+18%
Operating income	1,494	2,390	-37%	-16%
as a percentage of sales	11%	16%		

This table does not represent an income statement prepared under IFRS. Please refer to the segmental information reported in Note 4 to the consolidated financial statements.

Reported sales were 13 percent lower in 2024 than in 2023, 9 percent lower at constant exchange rates with sales volumes 6 percent lower and local currency prices averaging 3 percent lower. See the Sales commentary section above for further information on sales.

Gross profit was 15 percent lower in 2024, 4 percent lower at constant exchange rates; gross profit margin was 1 percentage point lower, with lower sales prices, particularly in Brazil, Argentina and the US, driven by increased generic competition on older technologies and adverse currency movements.

Marketing and distribution costs increased 8 percent from 2023 to 2024, 10 percent at constant exchange rates, and increased almost 3 percent as a percentage of sales mainly due to bad debt provisions. There were \$93 million of bad debt charges in 2024 due largely to weaker markets in Argentina and flooding in Southern Brazil, compared with \$30 million of bad debt provision releases in 2023 as customer collections in Russia and Ukraine were significantly better than previously expected considering the uncertainty related to the military conflict.

Research and development costs were 3 percent higher in 2024, 2 percent at constant exchange rates, with the impact of productivity initiatives more than offset by increased amortization from capitalized development costs.

Other general and administrative costs were \$67 million lower than 2023 and included productivity savings and gains from asset disposals and revisions to lease terms, partly offset by increases in litigation defense costs.

Seeds	Total as repo		Change		
(\$m, except change %)	2024	20232	Actual %	CER %	
Sales	3,773	3,945	-4%	-2%	
Cost of goods sold	(2,071)	(2,247)	+8%	+6%	
Gross profit	1,702	1,698	-	+3%	
as a percentage of sales	45%	43%			
Marketing and distribution	(808)	(833)	+3%	+1%

General and administrative:					
Other general and administrative	(84)	(230)	+63%	+70%	
Operating income	409	254	+61%	+75%	
as a percentage of sales	11%	6%			

This table does not represent an income statement prepared under IFRS. Please refer to the segmental information reported in Note 4 to the consolidated financial statements.

Sales were 4 percent lower in US dollars, 2 percent lower at constant exchange rates, with sales volumes 4 percent lower and local currency sales prices 2 percent higher. See the Sales commentary section above for further information on sales.

Gross profit was flat compared with 2023, 3 percent higher at constant exchange rates. Gross profit margin was 2 percentage points higher with sales price increases and lower inventory provisions in Brazil.

Marketing and distribution costs were 3 percent lower in US dollars, 1 percent lower at constant exchange rates, mainly related to the lower sales volumes.

Research and development expense was \$20 million higher in 2024 compared with 2023 mainly due to increased amortization of development costs capitalized in previous years.

Other general and administrative costs were \$146 million lower in 2024 compared with 2023. Higher gains from site divestments were recognized in 2024 and lower costs also reflected reduced litigation expenses due to the conclusion of all material claims by exported plaintiffs related to Viptera during 2023.

Defined Benefit Pensions

Defined benefit pension expense was \$82 million in 2024 compared with \$68 million in 2023. The increase is due to higher service costs relating to lower discount rates.

Syngenta contributions to defined benefit pension plans were \$154 million in 2024 compared with \$148 million in 2023. In 2025, Syngenta expects contributions to defined benefit pension plans, excluding early retirement contributions associated with restructuring actions, to be approximately \$82 million. The expected reduction in contribution mainly reflects revised pension funding arrangements in the UK where the pension fund is no longer in deficit on a UK statutory basis.

Financial expense, net

Financial expense, net decreased by \$405 million in 2024 to \$737 million. 2023 included \$272 million of losses from movements in fair value of bonds and other investments in Argentina following the significant devaluation of the Argentine Peso in December 2023. Currency controls had prevented Syngenta from repaying import costs from around the middle of 2023 and while the cash was invested in \$ linked assets, mark-to-market valuations of these investments dropped significantly on the devaluation. In 2024 there were \$69 million of gains from mark-to-market valuation movements as the Argentine Peso gradually became more stable. Net interest costs at \$747 million were \$77 million higher than 2023 partly due to higher average levels of net debt during 2024. Currency-related financial expenses of \$11 million in 2024 contrasted with \$152 million in 2023, with higher gains of hedging the CHF exposure and lower costs of hedging the BRL exposure, where working capital levels were lower.

Taxes

In 2024, Syngenta recorded a net tax expense of \$433 million on a profit before taxes of \$694 million, an effective tax rate of 62 percent. The effective tax rate in 2023 was 24 percent, based on \$348 million net tax expenses and \$1,429 million profit before tax. The Swiss tax rates range from 13 to 19 percent. In Basel-Stadt, the canton where Syngenta has its headquarters, the ordinary effective tax rate is 13 percent. Details of main items impacting the difference between the statutory tax rate and Syngenta's effective tax rate are shown in Note 7 to the consolidated financial statements. The main reasons for the higher rate are adverse profit mix, particularly due to losses in Switzerland, and also the non-recognition of current year tax losses in Switzerland and Argentina.

In December 2023, the Swiss government partially implemented OECD Pillar Two by introducing a Qualified Domestic Minimum Top-up Tax ("QDMTT") to reach the required taxation level of 15 percent on Pillar Two qualifying profits earned by companies domiciled in Switzerland effective from January 1, 2024. Switzerland has implemented the Income Inclusion Rule (IIR) effective from January 1, 2025 onwards and therefore profits earned by subsidiaries domiciled in tax jurisdictions outside of Switzerland would be subject to an OECD Pillar Two top up tax if either a local QDMTT or an IIR at a lower subsidiary level is effective for 2024. For the countries in which Syngenta operates and which have enacted a local QDMTT and an IIR, Syngenta is either benefitting from the Transitional Safe Harbor rule or the respective QDMTT or IRR are immaterial. Given Syngenta's ultimate parent company has not finalized its global analysis of OECD Pillar Two, and the interpretation and adoption of such rules are subject to change globally, uncertainty exists as to the ultimate amount of OECD Pillar Two liabilities of Syngenta for 2024

Net income for the period and other supplementary income data

Net income attributable to Syngenta's shareholder in 2024 was \$269 million, compared to \$1,086 million in 2023.

Sales in 2024 were 12 percent lower than 2023 and operating income margin was 5 percent lower than 2023. Excluding restructuring and impairment, after lower financial expense, income before taxes was 23 percent lower in 2024. Restructuring and impairment, net of tax, was \$344 million higher in 2024 compared with 2023. The 2024 tax rate was 62 percent, compared with 24 percent in 2023.

Foreign operations and foreign currency transactions

Syngenta's subsidiaries use their local currency as their functional currency for accounting purposes except where the use of a different currency more fairly reflects their actual circumstances.

Syngenta operates worldwide with a large presence in emerging markets and a broad range of currency effects that need to be closely monitored. Syngenta regularly analyzes how currency fluctuations will impact its operating results and manages the impact with a combination of commercial actions, such as product pricing, and financial risk management strategies, such as hedging. Next to the Euro, the Swiss franc and the British pound sterling, the Brazilian real gives rise to a major currency exposure due to the large size of Syngenta's business activities in Brazil. Sales prices to customers in Brazil largely are linked to the US dollar, which limits the impact of fluctuations in the US dollar/Brazilian real exchange rate, though the extent of the linkage may vary from year to year depending on market conditions and the direction and speed of the exchange rate movement. Similarly, Syngenta manages its currency exposure in Argentina and parts of the CIS, mainly Russia and Ukraine, by linking local currency sales prices to the US dollar to compensate for the fluctuations in sales value from currency devaluation. During 2024, the Argentine peso devalued by approximately 30 percent against the US dollar, although was significantly more stable than during 2023 when the peso devalued more than 350 percent. In 2024, the Russian ruble depreciated by 24 percent, having depreciated by the same amount during 2023. There have been significant exchange movements in the ruble due to the conflict with Ukraine and the extent to which sales prices are linked to the US dollar and the ability to hedge the ruble is subject to some uncertainty.

Syngenta regularly monitors receivables exposure in all countries in which it operates. Syngenta has significant sales in East Europe where exchange rate volatility and other macroeconomic factors cause overall credit risk to be higher. In Latin America, Argentina continues to experience economic and financial difficulties, which have also impacted Brazil in previous years, and this at times has led to constraints in the availability of credit. In Argentina the economy has been hyperinflationary since the middle of 2018, putting pressure on liquidity, and while currency controls have eased somewhat in 2024, currency controls have restricted access to foreign currency to repay import costs since the middle of 2023.

The following table outlines for the above-named countries¹ the aggregate gross trade receivables, those past due for more than 180 days and the related provision for doubtful receivables at December 31, 2024 and 2023.

<u>(</u> \$m)	2024	2023
Gross trade receivables	3,191	3,430
Past due for more than 180 days	429	392
Provision for doubtful trade receivables	407	402

¹ Includes Argentina, Brazil, Venezuela, Russia, Ukraine, Kazakhstan and Belarus

Gross trade receivables have decreased from 2023 to 2024, mainly due to lower sales in Russia, where import restrictions limited the Seeds business particularly, and in Brazil and Argentina due to lower sales as discussed above. Receivables past due for more than 180 days increased as a percentage of gross trade receivables, while provisions for doubtful trade receivables remained flat, mainly in Brazil where the newer distribution businesses experience longer credit term expectations from customers.

At December 31, 2024, approximately 56 percent of Syngenta's cash and cash equivalents was held in US dollars, approximately 8 percent in Russian rubles, approximately 7 percent in Indian rupees, approximately 6 percent in Brazilian real, and approximately 4 percent in Thailand baht. No other individual currency made up more than 2 percent.

Liquidity and capital resources

Syngenta's principal source of liquidity consists of cash generated from operations. Syngenta makes use of trade receivable factoring across various regions and reverse factoring arrangements to manage timing of cash flows. Working capital fluctuations due to the seasonality of the business are supported by short-term funding available from a \$2.5 billion Global Commercial Paper program, a \$5 billion revolving short-term credit facility with Syngenta Group (HK) Holdings Company Limited and \$3.5 billion committed credit lines with various financial institutions.

(\$m)	2	024
	Balance outstanding	
	at December 31, 2024	Average balance outstanding
Global Commercial Paper program	-	99
Short-term credit facility with Syngenta Group	1,000	2,683
Committed credit lines	200	1,623
Total	1,200	

Long-term capital employed is currently financed through nine unsecured bonds, two unsecured notes issued under the Note Purchase Agreement in the US Private Placement market, three loans with financial institutions and five intragroup term loans with Syngenta Group (HK) Holdings Company Limited.

The table below summarizes Syngenta's unsecured bonds and notes in issuance as at December 31, 2024:

<u>(</u> \$m)	Issuance date	Carrying amount	Value at issue
4.892% USD bond 2025	April 2018	677	677
5.350% USD private placement 2025	December 2005	55	55
3.375% Eurobond 2026	March 2020	942	1,008
0.700% CHF bond 2026	February 2020	154	145
1.250% Eurobond 2027	March 2015	520	559
1.500% CHF bond 2027	November 2024	132	136
5.182% USD bond 2028	April 2018	336	336
2.125% CHF bond 2029	March 2014	166	170
5.590% USD private placement 2035	December 2005	11	11
4.375% USD Notes 2042	March 2012	20	20
5.676% USD bond 2048	April 2018	153	153
Total		3,166	3,270

In addition, Syngenta has a long-term \$1,000 million floating rate USD loan which matures in 2027, a long-term \$550 million floating rate USD loan which matures in 2027 and a long-term CHF 300 million floating rate CHF loan which matures in 2026 (2023: a long-term \$1,250 million floating rate USD loan maturing in 2024 and in 2025; a long-term \$358 million floating rate CHF loan maturing in 2025 and a long-term \$300 million fixed rate USD loan maturing in 2026).

Intragroup term loans consist of a CNY 3,800 million 2.55 percent fixed rate loan that matures in 2027, a CNY 3,500 million loan with a floating interest rate based on China Loan Prime Rate (LPR) that matures in 2026, a CNY 5,000 million 2.85 percent fixed rate loan that matures in 2026, a \$500 million loan with a floating rate interest based on SOFR that matures in 2025 and a \$500 million loan with a 5.05 percent interest rate that matures in 2026 (2023: a CNY 3,800 million loan with a floating interest rate based on LPR that matures in 2025, a CNY 3,500 million loan with a floating interest rate based on LPR that matures in 2026, a \$500 million loan with a floating rate interest based on SOFR that matures in 2025 and a \$500 million loan with a 5.05 percent interest rate that matures in 2026).

For information on Syngenta's funding and treasury policies and objectives in terms of the manner in which treasury activities are controlled, see Note 24 to the consolidated financial statements.

Syngenta reported cash and cash equivalents on December 31, 2024 and 2023 of \$1,025 million and \$1,639 million, respectively. At December 31, 2024 and 2023, Syngenta had current financial debt of \$3,039 million and \$5,328 million, respectively, and non-current financial debt of \$7,753 million and \$7,868 million, respectively.

Syngenta targets maintaining an investment grade credit rating, as recognized by major third-party rating agencies, which it currently believes provides an optimal balance between financial flexibility and the cost of capital. At December 31, 2024, Syngenta's credit ratings were as follows: Fitch Ratings Ltd BBB/F3; Standard & Poor's Rating Services BBB/A-2; and Moody's Investors' Services Limited Baa3/P-3. There are no material legal or economic restrictions on the ability of subsidiaries to transfer funds to the Company in the form of cash dividends except as disclosed in the consolidated cash flow statement.

Other than refinancing future maturing bonds over the short to medium term, management is of the opinion that, absent a major business acquisition or a very significant deterioration in working capital or the rate of receivables collections from that currently expected, the funding available from the sources described above will be sufficient to satisfy Syngenta's working capital, capital expenditures and debt service requirements for the foreseeable future, including cash expenditures relating to restructuring programs. In the event of a major business acquisition, Syngenta would seek additional funding from capital markets or other sources, including its shareholder. Syngenta regards as sufficiently remote the likelihood that a very significant deterioration in working capital or unexpected decline in the rate of receivables collections will occur as not to require the development of a detailed contingency funding plan.

Cash flow

The following table sets out certain information about cash flow for each of the periods indicated:

	Year ended Dece	mber 31,
_(\$m)	2024	2023
Cash flow from operating activities	2,571	537
Cash flow used for investing activities	(1,056)	(2,040)
Cash flow from financing activities	(2,081)	1,767

Cash flow from operating activities

2024 compared with 2023

Cash flow from operating activities increased by \$2,034 million to \$2,571 million in 2024 mainly due to higher inflows from net working capital, including inflows of \$337 million from trade and other working capital liabilities in 2024 compared with outflows of \$1,846 million in 2023 when trade payable levels fell significantly as inventory reduction measures were initiated. Inflows from income before taxes after the reversal of non-cash and other reconciling items were \$849 million lower in 2024 compared with 2023 because of lower sales, which was largely offset by reduced levels of trade receivables resulting in inflows from trade and other accounts receivable that were \$736 million higher than in 2023. Net interest payments were \$125 million higher in 2024 than in 2023, reflecting higher levels of net debt during 2024, but were more than offset by other net financial payments, which were \$387 million lower in 2024 compared with 2023 because of lower hedging and foreign exchange costs.

Cash flow used for investing activities

2024 compared with 2023

Cash flows used for investing activities were \$1,056 million compared with \$2,040 million in 2023. Net proceeds from disposals of marketable securities were \$227 million in 2024 compared with net purchases of \$628 million in 2023 when restrictions in offshore payments in Argentina led to significant investments. These restrictions began to ease during 2024. Outflows for additions to fixed assets fell by \$138 million from 2024 to 2023 due to a drive to contain capital expenditure while outflows from business acquisitions and divestments were relatively flat.

Cash flow used for financing activities

2024 compared with 2023

Cash flows used for financing activities were \$3,848 million higher in 2024 compared with 2023, with the increase in cash flows from operating activities used to reduce third party interest-bearing debt. The dividend paid to shareholders in 2023 was \$500 million; no dividend was paid in 2024.

Research and development ("R&D")

Syngenta's Research and Development organization is dedicated to developing quality crop protection and seeds products, as well as crop-focused solutions which integrate multiple technologies. R&D focuses on taking a holistic approach to help customers grow their specific crop using the best technology to address their needs, be it a single technology, a combination of technologies, or technologies and services.

Syngenta is committed to improving crop yield and quality in a sustainable way and, through its global product safety group and global regulatory team, is committed to developing and registering products that are safe and effective. Syngenta maximizes its innovation potential by leveraging its industry expertise and partnering with other technology leaders across the globe.

The total spent on research and development was \$1,777 million in 2024 and \$1,770 million in 2023. This included \$653 million (2023: \$685 million) of internal product development costs that were capitalized.

For the attribution of research and development costs to reported operating segments, see Note 4 to the consolidated financial statements.

There are no off-balance sheet financing transactions associated with research and development activity.

Contractual obligations, commitments and contingent liabilities

At December 31, 2024 Syngenta had contractual obligations to make future payments in the periods indicated in the following:

(\$m)	Notes to the consolidated financial statements reference	Total	Less than 1 year	1–3 years	3–5 years	5–10 years	More than 10 years
Financial debt	16, 18	9,424	2,905	5,807	526	2	184
Interest on fixed rate financial debt	24	526	150	165	36	51	124
Other liabilities		75	15	58	2	-	-
Capital lease payments	18	1,368	134	216	128	178	712
Capital expenditures	19	153	110	43	-	-	-
Pension contribution commitments	21	19	4	7	8	-	-
Unconditional purchase obligations	19	1,788	1,350	366	58	14	-
Long-term research agreements and other long-term commitments	19	149	74	51	14	10	-
Total		13,502	4,742	6,713	772	255	1,020

Of the total financial debt, floating rate financial debt is \$1,671 million (comprising local bank loans and overdraft facilities), of which \$1,671 million is due within one year and \$nil between one and three years. No interest obligation in respect of this debt is included in the table above. There is no contractual obligation to renew this debt. The debt amount, and the interest payments associated with it, will vary over time according to Syngenta's funding requirements and future interest rates.

Fixed rate debt of \$7,753 million is comprised primarily of the outstanding Eurobonds, Swiss franc domestic bonds, USD bonds and private placement notes and term loans. Fixed rate interest payments of \$526 million on these are included above.

Other liabilities arise from deferred payments related to acquisitions and license agreements.

Provisions for long-term liabilities totaling \$475 million shown in Syngenta's consolidated balance sheet have not been included in the above table because the timing of their payment is not contractually fixed and cannot be estimated with sufficient certainty within the context of the time periods in the table. This applies particularly to those amounts which are not expected to be paid during 2025. Note 19 to the consolidated financial statements presents the components of the estimated \$184 million of provisions that are expected to be paid during 2025.

The supply agreements for materials giving rise to the unconditional purchase obligations are entered into by Syngenta to ensure availability of materials meeting the specifications required by Syngenta. Where suppliers have made significant capital investment, these agreements generally provide for Syngenta to pay penalties in the event that it terminates the agreements before their expiry dates.

Pension contribution commitments totaling \$19 million represent unconditional fixed payments to the UK pension fund according to the revised schedule of contributions agreed in December 2024. Contributions for future service in the UK and Switzerland which are calculated as a fixed percentage of employees' pensionable pay are not included in the above table. The rules of the Swiss pension fund commit Syngenta to contributing a fixed percentage of employees' pensionable pay to the fund.

As disclosed in Note 21 to the consolidated financial statements, Syngenta expects to pay \$82 million of contributions to its defined benefit pension plans in 2025, excluding restructuring costs and excluding any accelerated payments which Syngenta may decide to make as business and financial market conditions develop during 2025. \$4 million of those contributions are included as commitments in the table above. The remaining \$78 million represents 2025 service contributions, which are not included as commitments in the table above.

The above table excludes income tax liabilities of \$560 million in respect of uncertain tax positions. These are presented within current income tax liabilities in the consolidated balance sheet because it is not possible to make a reasonably reliable estimate of the actual period of cash settlement with the respective taxing authorities.

Off-balance sheet arrangements

Syngenta had no off-balance sheet arrangements as at December 31, 2024, other than the above contractual obligations, commitments and contingent liabilities. Syngenta has no unconsolidated special purpose entities that are likely to create material contingent obligations.

Critical accounting estimates

Critical accounting estimates and new accounting pronouncements are discussed in Notes 2 and 26 to the consolidated financial statements.

Recent developments

See Note 27 to the consolidated financial statements for disclosure of events occurring between the balance sheet date and the date on which the consolidated financial statements were approved by the Board of Directors. There were no events that would require adjustment to the consolidated financial statements.

Trend and Outlook

Sales in 2024 were 12 percent lower than in 2023, 8 percent at constant exchange rates, with 2 percent from lower local currency sales prices and 6 percent lower sales volumes. During 2024, commodity prices declined, reducing farmer profitability. With commodity prices for 2025 at

the levels at the date of this report, farmer income is expected to remain under pressure; this will constrain demand for high quality crop inputs and may have an adverse impact on input prices. Crop Protection channel stock continued to reduce during 2024, resulting in sales below farmer usage. This reduction is seen as substantially complete and sales of Crop Protection products are expected to be closer to the level of usage in 2025. The increased supply capacity of generic crop protection products that came on stream in 2024 will continue to exert negative pressure on the sales prices of older technology products in 2025. Severe disease pressure in corn in Argentina reduced sales of seeds significantly in 2024; approximately half of the area impacted is expected to be recovered in 2025. Limitations on import of seeds to Russia also had a significant impact on 2024 sales and it is not yet possible to determine what import restrictions will apply in 2025.

Declining input costs take time to impact Cost of goods due to supply lead times and inventory carry, but active ingredient costs in supplies purchased in 2024 are expected to benefit Cost of goods and support gross profit margins in 2025. Function expenses are expected to increase slightly in 2025 compared with 2024, due mainly to increased investment in research and development and continuing increases in amortization of previously capitalized development costs as well as increased selling expenses from higher volumes, with productivity savings offsetting the impact of inflation.

During 2024, Syngenta set up a Transformation Office to shape and implement strategic initiatives and enable productivity improvements across the organization over a multi-year period. The programs are designed to streamline operations and enable Syngenta to adapt to evolving market conditions. 2024 included restructuring and impairment charges while in 2025, restructuring costs currently are expected to be less than \$200 million.

Geopolitical tensions continue to introduce significant business uncertainty and heightened risk. USD exchange rates may prove volatile, impacting our global revenue and cost structures. During the second half of 2024, USD short-term interest rates showed a decreasing trend, but by the end of 2024, the outlook for 2025 interest rates was less clear.

Overall, Syngenta has significant currency exposures, which at a high level can be summarized as:

- a short position against the US dollar in Swiss francs and British pounds;
- a net short position in Euros, with Euro priced product costs and over the course of a full year, relatively minor compared with sales in Euros, but with a long position in the first half selling season and a short position in the second half from more evenly spread Euro-based operating costs including raw material costs;
- a long position in Japanese yen, Australian and Canadian dollars and many emerging market currencies.

In Brazil and Argentina, a significant portion of sales are effectively priced in US dollars, resulting in a net short local currency exposure, though the linkage is not absolute and there can be a time lag before local currency prices are adjusted. Syngenta has also acted to link local currency pricing of sales in Russia and particularly Ukraine (both of which export grain to global markets) to US dollars to reduce the long exposure to these currencies. The impact of both the continued military conflict in the Ukraine and related sanctions on Russia continues to be unpredictable.

Forecast transaction exposures in the major currencies are hedged under a rolling 12-month program, largely through forward contracts.

Appendix A

Reconciliation of non-GAAP measures to equivalent GAAP measures

A non-GAAP measure is a numerical measure of financial performance, financial position or cash flows that either:

- includes, or is subject to adjustments that have the effect of including, amounts that are excluded in the most directly comparable measure calculated and presented under IFRS; or
- excludes, or is subject to adjustments that have the effect of excluding, amounts that are included in the most directly comparable measure calculated and presented under IFRS.

Syngenta uses non-GAAP measures in this report where they are regarded by management as important for the investor to fully understand Syngenta's performance. The non-GAAP measures presented in this report are measures adjusted for exchange rate movements and to exclude restructuring gains and losses, impairment losses and divestment gains and losses. The Company presents these measures because:

- movements in exchange rates historically have had, and in the future are expected to have, a significant impact on sales and operating income from period to period; and
- restructuring and impairment charges historically have fluctuated, and in the future are expected to fluctuate, significantly from period to period and thereby have a volatile impact on results.

Syngenta has been engaged in significant restructuring activities since its formation in 2000. The incidence of restructuring charges is periodic and volatile, reflecting the timing of irrevocable commitments related to specific sites and operations. Therefore, the impact on reported performance varies from period to period and there is limited continuity in the specific composition or size of such charges. Internal financial reporting and management and employee incentive plans are substantially based on financial measures excluding the charges for restructuring and impairment so that management is incentivized to deliver the benefits of the associated restructuring and not to achieve short-term financial targets by deferring implementation of restructuring plans. Restructuring programs typically deliver benefits with a payback over several years, similar to capital investments, and control over restructuring expenditures is performed on a similar project basis to that applied with capital investments.

Syngenta presents non-GAAP measures on operating income before restructuring and impairment at both the segmental and Syngenta AG group levels. Restructuring and impairment charges have had a material effect on operating income in the period covered by the review. In the opinion of management, reporting operating performance excluding restructuring and impairment in addition to the GAAP measures provides a more thorough understanding of business performance. Together with disclosure of the material elements within restructuring and impairment and of the overall anticipated size and timeframe of restructuring programs, these measures may assist investors in forecasting future operating performance.

Syngenta presents non-GAAP information on income before taxes excluding restructuring and impairment together with income tax expense before restructuring and impairment to assist investors to calculate the Syngenta tax rate both including and excluding the impact of restructuring and impairment charges. The tax rate on restructuring and impairment charges has been volatile and different from the tax rate on income before taxes excluding restructuring and impairment, due in part to many categories of restructuring or impairment charges not being deductible for tax purposes.

In addition to GAAP measures, Syngenta uses these measures excluding restructuring and impairment in internal reporting to management and the Board of Directors, and these measures are used in the incentive plans for Syngenta management and other employees. Restructuring and impairment charges have been incurred in all the periods covered by the review and are expected to continue to arise and have a material effect on operating performance in future periods. Consequently, non-GAAP measures of operating income before restructuring and impairment do not present a complete picture of operating performance and these measures should be seen only as supplementary to the GAAP measures.

For improved clarity, the definitions of these non-GAAP measures and reconciliations of non-GAAP measures to the appropriate GAAP measure are provided below. The tables below are included to show the reconciliation of the GAAP measures to the non-GAAP measures used in the report and do not represent income statements prepared under IFRS.

2024 (\$m)	Total	Restructuring and impairment	Before restructuring and impairment

Constant exchange rates

Attributable to non-controlling interests

Net income attributable to Syngenta AG shareholder

Net income

Tax rate

Syngenta compares results from one period to another period in this report using variances calculated at constant exchange rates ("CER"). To present that information, current period results for entities reporting in currencies other than US dollars are converted into US dollars at the prior period's exchange rates, rather than the exchange rates for the current year. See Note 23 to the consolidated financial statements for information on average exchange rates in 2024 and 2023. For example, if a European entity reporting in CHF sold CHF 100 million of products in 2024 and 2023, Syngenta's financial statements would report \$114 million of revenues in 2024 (using 0.88 as the rate, which was the average exchange rate in 2024) and \$111 million in revenues in 2023 (using 0.90 as the rate, which was the average exchange rate in 2023). The CER presentation would translate the 2024 results using the 2023 exchange rates and indicate that underlying revenues were flat. Syngenta presents this CER variance information in order to assess how its underlying business performed before taking into account currency exchange fluctuations. Syngenta also presents its actual reported results in order to provide the most directly comparable data under GAAP.

Cash and cash equivalents at the beginning of the year		1,639	1,408
Cash and cash equivalents at the end of the year		1,025	1,639

¹ Proceeds from increase in third party interest-bearing debt and Repayments of third party interest-bearing debt for 2023 have each been decreased by \$345 million to present short-term borrowing flows on a net basis when the financing is for the purpose of seasonal working capital

The accompanying notes form an integral part of the consolidated financial statements.

Of total cash and cash equivalents of \$1,025 million (2023: \$1,639 million), \$90 million (2023: \$69 million) is required to meet insurance solvency requirements of Syngenta's insurance subsidiaries. These amounts therefore were not readily available for the general purposes of Syngenta. Other significant restrictions on Syngenta's ability to use assets or settle liabilities are disclosed in Note 25. At December 31, 2024 cash equivalents totaled \$580 million (2023: \$1,008 million) and consisted of bank and money market fund deposits.

The accompanying notes form an integral part of the consolidated financial statements.

Additional paid-in capital, Fair value reserves and Cumulative translation adjustment are presented combined as Other reserves on the consolidated balance sheet.

The amount available for dividend distribution is based on Syngenta AG's shareholder's equity determined in accordance with the legal provisions of the Swiss Code of Obligations. No dividend was declared or paid in 2024. On November 28, 2023, a dividend of \$500 million (\$5.40 per share) was declared. This was paid to Syngenta's parent company, Syngenta Group (NL) B.V. on December 20, 2023.

Following a share transfer on December 28, 2023, Syngenta AG's parent company became Syngenta Group (HK) Investment Co. Ltd.

There were 92,578,149 ordinary shares of par value CHF 0.10 that were authorized, issued, fully paid and outstanding at December 31, 2024 and 2023. Each ordinary share carries one vote at the shareholder's meetings of Syngenta AG.

Included within the fair value reserves are (i) cash flow hedge reserves, which comprise the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged items that have not yet been recognized in profit or loss, and (ii) fair value reserves, which comprise the cumulative net change in the fair value of equity investments at fair value through OCI. Movements in the cash flow hedge reserves are shown in Note 24 and movements in the fair value reserves for equity investments are shown in Note 25. Amounts within OCI related to remeasurement of defined benefit post-employment plans are presented within retained earnings. The tax impact of these movements is presented in Note 7.

The cumulative translation adjustment comprises all foreign currency differences arising from the translation of the financial statements of foreign operations, as well as from the translation of long-term monetary items that are part of net investments in foreign subsidiaries.

1. Basis of preparation of the consolidated financial statements

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards (IFRS or IFRSs) as issued by the International Accounting Standards Board (IASB). The consolidated financial statements have been prepared on a historical cost basis, except for items that are required by IFRSs to be measured at fair value, principally certain financial instruments, which are valued at fair value less costs to sell.

The consolidated financial statements incorporate the financial statements of Syngenta AG, a company domiciled and incorporated in Switzerland, and all of its more than 150 subsidiaries globally (together referred to as "the Syngenta AG group" or "Syngenta") and the Syngenta AG group's interests in associates and joint ventures. Approximately 40 subsidiaries are considered to be significant legal entities. There are no material non-controlling interests and no material structured entities. The Syngenta AG group's main research and development facilities are located in Switzerland, UK and USA and its main production sites are in Switzerland, UK, USA, France, China and Brazil. Syngenta AG's principal executive offices are at Rosentalstrasse 67, 4002 Basel, Switzerland.

The parent of Syngenta AG as of December 31, 2024 is Syngenta Group (HK) Investment Co Ltd., a private company incorporated in Hong Kong. The ultimate parent of Syngenta AG is Sinochem Holdings Co. Ltd. (Sinochem Holdings), a state-owned enterprise incorporated under the laws of China, under the supervision of the State-owned Assets Supervision and Administrative Commission of the State Council (SASAC) of the People's Republic of China.

The consolidated financial statements are presented in United States dollars ("\$") as this is the major currency in which revenues are denominated. "\$m" refers to millions of United States dollars. The functional currency of Syngenta AG is the United States dollar, which is the main currency in which its funding, receipts and payments are denominated.

The Syngenta AG group is a world leading agribusiness operating in the crop protection, seeds, professional solutions and flowers markets. Crop protection includes chemicals such as herbicides, insecticides, fungicides and seed treatments to control weeds, insects and diseases in crops, as well as biological products, and are essential inputs enabling growers around the world to improve agricultural productivity and food quality. In Seeds, the Syngenta AG group operates in the high value commercial sectors of field crops (including corn, oilseeds and cereals) and vegetables. The Professional solutions business provides turf and landscape and professional pest management products, and the Flowers business provides flower seeds, cuttings and young plants, to professional growers and consumers.

The preparation of financial statements requires management to exercise judgment when applying accounting policies and to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimated. Note 2 below includes further discussion of certain critical accounting estimates.

2. Material accounting policy changes, judgments and estimates

This note describes the impact on Syngenta's consolidated financial statements of material accounting judgments made when applying IFRSs and critical assumptions and accounting estimates.

Application of critical accounting policies

Royalty and license income

Individual agreements licensing to third parties the right to use Syngenta technology can and do have unique terms and, consequently, the accounting judgments required to apply IFRS 15 to each such agreement can differ significantly. Syngenta recognizes revenue for non-refundable lump sum and guaranteed minimum license income at the start of a license only when the license is distinct from any related Syngenta obligations to supply licensed products during the license term and Syngenta has performed any obligations related to the license grant. For licenses of seed germplasm and trait technology, Syngenta considers that these criteria are met when the license has become effective, the licensee either has control of biological material from which it can independently breed, produce and sell seeds containing the technology Syngenta has licensed to it under the agreement or can obtain any seed purchase requirements in the market from producers other than Syngenta. For licenses of crop protection technology, Syngenta considers that these criteria are met when the license grants the right to manufacture and sell chemical products containing the licensed technology, the right to obtain related manufacturing and formulation know-how and the right to use existing regulatory data necessary for the licensee to establish its own independent registration to sell the licensed products.

Research and development expense

Research costs are expensed as incurred. Costs arising from internal product development projects are recognized as intangible assets if, and only if, Syngenta is able to, has sufficient resources to and intends to complete and use or sell the technology or product being developed, and such completion and use or sale is technically feasible and commercially viable.

Costs of projects to develop new crop protection chemical active ingredients that have not yet obtained regulatory approval are expensed as incurred because their technical feasibility and commercial viability cannot be demonstrated until such approval has been obtained. Costs of projects to develop new formulations or extend the use of existing formulations of active ingredients that have regulatory approval, or widen product label indications of existing products already on the market to include additional uses of such products, are capitalized as intangible assets throughout the duration of the projects, which is approximately 3 to 5 years, and are amortized over the useful economic lives of the related new products, starting from the date they are ready for use or sale. Useful economic lives are disclosed under 'Intangible Assets' in Note 26. Costs capitalized for a project are immediately and fully impaired if the project is discontinued before completion. Costs of projects to re-register active ingredients with existing approvals are expensed as incurred because such projects are considered to maintain existing intangible assets rather than create new ones.

Costs of seed breeding programs that include genetically modified traits that require regulatory approval are expensed as incurred because their technical feasibility and commercial viability cannot be demonstrated until such approval has been obtained. Costs relating to deregulated genetically modified traits and conventional seed breeding programs are capitalized starting from the breeding stage in which new seed hybrids or varieties are identified as potential candidates for commercialization until the launch of the output of the related breeding

program, which is approximately 7 years. Breeding costs are recorded by crop, region and, for amortization purposes, by breeding program year. Capitalized costs are impaired before completion of breeding if product launches are no longer expected as a result of major changes to Syngenta's seed crop portfolio. Costs capitalized for a breeding year are amortized over the average commercial life of a new seed product, as disclosed in Note 26, starting from launch.

Impairment

For purposes of testing goodwill for impairment, goodwill is allocated to cash generating units (CGUs). Syngenta generally defines each crop protection product active ingredient and each seed crop as a CGU. However, where one active ingredient is sold in mixture with other active ingredients to a significant extent, the active ingredients concerned are grouped together into a single CGU because independent cash inflows only exist at this higher level. Each CGU is generally defined on a global basis, reflecting the international nature of the business, and contains tangible assets such as property, plant and equipment (PP&E) as well as intangible assets such as product and patent rights and capitalized development costs.

North America corn and soybean seeds are defined as a single CGU because of common intellectual property and other interdependencies between these two crops, which do not apply to other crops. Rest of world corn and soybean is also grouped as a single CGU because of common intellectual property and other interdependencies; however, these are distinct from the North American market and as such this CGU generates its own cash inflows that are independent of the North America corn and soybean seed CGU. Goodwill arising on business acquisitions that provide economic benefits to multiple operating segments, is allocated to each segment in proportion to each such segment's relative value at the time Syngenta established its current basis of segmentation, and is tested for impairment at those levels by relating the allocated amount for each segment to the total cash flows of the respective segment. The goodwill amounts allocated to segments and significant other CGUs are disclosed in Note 12.

For CGUs to which no goodwill is allocated, a reduction in latest forecasts of current year gross profit compared with the current year budget, is generally considered an indicator of market-related impairment and results in the performance of detailed impairment tests. Syngenta also performs detailed impairment tests when there are asset specific indicators of impairment such as withdrawal of or restrictions placed upon product registrations, plans to divest products or, for property, plant and equipment, plans to restructure or close a site.

Syngenta performs the full annual impairment assessment on September 30 each year. At the end of each reporting period, Syngenta reassesses whether there is any indication that an asset may be impaired.

If a CGU becomes impaired, the impairment loss is allocated first to any goodwill in the CGU, and then to reduce the CGU's other assets pro rata.

Critical accounting estimates

Acquisition accounting

Applying the acquisition method of accounting requires significant management judgment to estimate the fair values and useful lives of the acquired assets, in particular intangible assets such as intellectual property (IP) related to currently marketed products and in-process research and development (IPR&D). In 2024, Syngenta recognized new intangible assets, excluding goodwill, of \$112 million (2023: \$19 million) resulting from acquisitions. These acquisitions and the fair values recognized for the acquired intangible assets are set out in Note 3. Key valuation assumptions include market size and share, sales pricing trends and competitors' reaction, cost and efficiency of the production process for the products, and the period over which the products are likely to generate economic benefits. Forecast cash flows for each asset are discounted using a rate developed from the estimated Weighted Average Cost of Capital (WACC) of the acquired company. Where Syngenta considers the risks applicable to an asset are not fully reflected in the forecast data available, it incorporates a risk premium into the discount rate. If actual cash flows are materially different from those used in calculating fair values, this may lead to changes in amortization expense or asset specific impairment losses in future periods.

Adjustments to revenue and trade receivables

Syngenta's products are consumed mainly by growers, but Syngenta invoices the majority of its sales to distributors. The timing and amount of cash inflows received by growers is impacted by a broad range of economic and political risks, including crop yields and prices, the availability of credit, and the cost of agricultural inputs such as the products sold by Syngenta and its competitors. The cash flows of distributors that supply Syngenta's products to growers and represent the majority of Syngenta's customers are also impacted by these factors. These distributors vary in size and nature from large publicly owned entities to small or medium sized owner-managed businesses. Syngenta's customer base reflects the geographical diversity of its operations, which encompass more than 90 countries and all significant agriculture areas. Considerable management effort and judgment is applied to actively manage and mitigate the risks to Syngenta from these factors and to determine the accounting estimates associated with them, which are set out below:

- the estimated cost of incentive programs that provide rebates and discounts is dependent upon achievement of sales targets, as well as cash discounts for punctual payment of accounts receivable. Syngenta records the estimated cost of these programs when the related sales are made, based on the programs' terms, market conditions and historical experience. At December 31, 2024, trade accounts payable include \$2,288 million (2023: \$2,456 million) of accruals for customer rebates and incentive programs.
- commercial terms in certain markets also provide a right of return, subject to eligibility restrictions by product and either an annual cap equal to a percentage of sales in the immediately prior year, or a return period typically extending up to the end of the agricultural season in which the product was originally sold, which can be 9 months. Accruals for estimated product returns are based on contractual sales terms and on historical experience of actual returns where Syngenta considers these to be reliable estimates of future returns. In accordance with IFRS 15, sales subject to returns are recognized only to the extent that it is highly probable that a significant reversal in the amount of revenue recognized will not occur when the uncertainty associated with the amount of returns is subsequently resolved. At December 31, 2024, trade accounts payable includes \$299 million (2023: \$361 million) of accruals for sales returns. Actual returns can vary significantly from estimates in market segments where the distribution channel holds several months' sales of Syngenta products at the reporting date; forecast consumption of those products by growers could be materially affected if market or weather conditions after the reporting date were significantly different from those expected and the volume of products returned by distributors varies with changes in grower consumption. This is especially relevant to Brazil and certain other markets in the southern hemisphere given Syngenta's financial reporting year-end falls in the middle of the peak demand season for Syngenta's crop protection products. Actual sales returns in 2023 in Brazil of crop protection products Syngenta sold during 2022 were \$258 million, representing 8 percent of

relevant sales. This was aligned to the \$262 million provided at December 31, 2022. Actual sales returns in 2024 in Brazil of crop protection products Syngenta sold during 2023 were \$131 million, representing 4 percent of relevant sales. This was aligned to the \$143 million provided at December 31, 2023. At December 31, 2024, Syngenta has recorded a \$115 million allowance for sales returns of crop protection products in Brazil, representing 5 percent of relevant sales in 2024. Syngenta expects similar levels of sales returns in 2025 compared to 2024 mainly driven by continuous effort to manage the level of inventory held at distributors and retailers.

- during 2023, Syngenta experienced high levels of returns in its field crop seeds business in Brazil. Actual sales returns in 2023 were \$111 million, representing 19 percent of the relevant sales. This is higher than the \$21 million provided at December 31, 2022. The main cause of the significantly higher returns during 2023 was insufficient visibility of in-channel inventory and a shortfall in competitive germplasm that met customer needs due to challenging production conditions. During 2024, Syngenta experienced significantly lower levels of returns in its field crop seeds business in Brazil driven by improved planning and production processes. Actual sales returns in 2024 were \$13 million, representing 4 percent of the relevant sales. This was aligned to the \$15 million provided at December 31, 2023. At December 31, 2024, Syngenta has recorded a \$9 million allowance for sales returns for the field crop seeds business in Brazil, representing 3 percent of relevant sales in 2024.
- allowances for doubtful receivables, which are estimated by critically analyzing individual receivable account balances, taking into account historical levels of recovery and the value of any security held or agreed barter programs which mitigate credit exposure, the economic condition of individual customers, and the overall economic and political environment in relevant countries. As shown in Note 8, the provision for doubtful receivables at December 31, 2024 amounted to \$595 million, or 11 percent (2023: \$587 million or 10 percent) of total trade receivables, of which \$374 million, (2023: \$368 million) related to sales made in Brazil, Ukraine, Russia, Argentina and Venezuela in current and prior years. In 2024, Syngenta reported \$118 million bad debt expense (2023: \$30 million credit to income). The increase in 2024 mainly relates to adverse weather conditions in Brazil and a significant pest impact on the corn harvest in Argentina impacting farmer liquidity. In 2023, bad debt provisions recognized in 2022 in Ukraine and Russia for the estimated impacts of the conflict, as well as in Africa and Middle East region due to an uncertain economic environment, were partially released due to better visibility of those impacts on business performance.

Syngenta records these estimates as separate allowances, but its estimation process recognizes their interdependency, as the level of credits to accounts receivable for discounts and product returns may affect the probability of receiving full payment of the net receivable balances.

Income Taxes

Deferred tax assets

At December 31, 2024, Syngenta's deferred tax assets are \$1,620 million (2023: \$1,834 million), as further analyzed in Note 7. Included in this balance are deferred tax assets for unused tax losses and tax credits of \$105 million (2023: \$52 million), of which \$88 million (2023: \$30 million) relates to tax losses. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible or in which tax losses can be utilized. The tax effect of unused tax losses is recognized as a deferred tax asset when it becomes probable that the tax losses will be utilized. In making assessments regarding deferred tax assets, management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies.

At December 31, 2024, based upon the level of historical taxable income and projections for future taxable income over the periods in which deferred tax assets are deductible, management believes that it is more likely than not that Syngenta will realize the benefits of these deductible differences. The amount of deferred tax assets considered realizable could however be reduced in subsequent years if estimates of future taxable income during their carry forward periods are reduced, or rulings by the tax authorities are unfavorable. Estimates are therefore subject to change due to both market-related and government-related uncertainties, as well as Syngenta's own future decisions on restructuring and other matters. Syngenta is unable to accurately quantify the future adjustments to deferred income tax expense that may occur as a result of these uncertainties.

The principal jurisdictions where deferred tax assets have not been fully recognized at December 31, 2024 are Switzerland, Argentina and Brazil (2023: Brazil and Argentina).

Uncertain tax positions

Syngenta estimates and accrues taxes that will ultimately be payable when reviews or audits by tax authorities of tax returns are completed. These estimates include significant management judgments about the eventual outcome of the reviews and audits of all open years based on the latest information available about the positions expected to be taken by each tax authority. Actual outcomes and settlements may differ significantly from the estimates recorded in these consolidated financial statements. This may affect income tax expense reported in future years' consolidated income statements.

Syngenta has a global supply chain, and intellectual property rights owned by Syngenta are used internationally within the Syngenta AG group. Transfer prices for the delivery of goods and charges for the provision of services, which include contract research and development, contract manufacturing and internal financing arrangements, by one Syngenta subsidiary to another may be subject to challenge by the national tax authorities in any of the jurisdictions in which Syngenta operates. Syngenta has a global transfer pricing policy in place and applies, to the maximum extent possible, a consistent methodology on a global basis. Transfer pricing determination in general, and the benchmarking process in particular, involve significant judgment and therefore a certain level of uncertainty remains as to whether tax authorities will challenge the pricing applied according to the applicable complex and judgmental transfer pricing regulations.

At December 31, 2024, Syngenta's balance sheet includes assets of \$182 million (2023: \$110 million), and liabilities of \$739 million (2023: \$735 million), for current income taxes. These liabilities include \$560 million in respect of the uncertain tax positions described above (2023: \$501 million).

Significant management judgment has been required to estimate the income tax benefits associated with Viptera litigation settlements recognized in 2017 and 2023 (reported in Note 19) because the Syngenta entities named as parties to the litigation are incorporated in different tax jurisdictions. Syngenta's estimates at December 31, 2024 and 2023 assume that all of the Viptera settlement costs will be deductible for income taxes but that deductions will be claimed in more than one jurisdiction. Syngenta estimated the benefit using an average of the tax rates of the relevant jurisdictions and the amounts it has recorded in 2024 and 2023 for both current and deferred income taxes reflect this estimate. The ultimate benefit realized may be different from this estimate and this difference may have a material effect on Syngenta's income tax expense for 2025 and/or future periods.

In Brazil, Syngenta received adverse rulings at administrative court level in transfer pricing disputes for fiscal years 2003 and 2011 and has filed appeals at civil court level. Additionally, Syngenta has appealed at administrative level against transfer pricing assessments for fiscal years 2013 to 2015 and won at various appeal levels cancelling those assessments thus reducing the overall exposure in 2024. In 2021 Syngenta received a transfer pricing assessment for 2016 and filed an appeal at administrative court level requiring the cancellation of this assessment. Syngenta believes it will succeed and has recognized no liability for the estimated aggregate \$162 million (2023: \$285 million) contingent liabilities in these disputes.

OECD Pillar Two Top-Up Tax

In December 2023, the Swiss government decided to partially implement Pillar Two by introducing a Qualified Domestic Minimum Top-up Tax ("QDMTT") to reach the required taxation level of 15 percent on Pillar Two qualifying profits earned by companies domiciled in Switzerland effective from January 1, 2024.

Switzerland has implemented the Income Inclusion Rule (IIR) effective from January 1, 2025 onwards and therefore profits earned by subsidiaries domiciled in tax jurisdictions outside of Switzerland would be subject to an OECD Pillar Two top up tax if either a local QDMTT or an IIR at a lower subsidiary level is effective for 2024. Where such minimum tax rules are in place, they should raise local tax obligations to the 15 percent minimum rate. Syngenta has assessed these additional tax obligations based on the available information.

For the countries in which Syngenta operates and which have enacted a local QDMTT and an IIR, Syngenta has performed a calculation of the Transitional Safe Harbour rule. For most jurisdictions Syngenta is benefitting from the Transitional Safe Harbour rule. For the remaining jurisdictions, the respective QDMTT or IRR are immaterial. Given Syngenta's ultimate parent company has not finalized its global analysis of OECD Pillar Two, and the interpretation and adoption of such rules are subject to change globally, uncertainty exists as to the ultimate amount of OECD Pillar Two liabilities of Syngenta for 2024.

IAS 12 has been amended to clarify that the standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the OECD. Syngenta applies the mandatory exception to recognizing and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

Seeds inventory valuation and allowances

Inventories of \$6,288 million (2023: \$7,976 million) reported in Note 10 include \$1,565 million (2023: \$1,792 million) of seeds, which are subject to the risk of loss through physical deterioration at all stages of the operating cycle. Syngenta accounts for normal losses that occur during production, both in the pre-harvest growing and the post-harvest processing stages, as part of the cost of inventories of in-process and finished seeds. Normal losses in production, which include the cost of seeds discarded before processing because they do not meet Syngenta's quality standards, are therefore expensed when the related finished seed is sold to customers. Losses of finished seeds are expensed as incurred. Syngenta records allowances against the cost of seeds inventories for both quality and obsolescence. Syngenta records allowances for quality for finished seed which is currently of defective quality and for finished seed which is expected to deteriorate physically before sale, based on past experience. Syngenta records allowances for obsolescence for excess seed for which there is insufficient forecast customer demand over the expected remaining commercial life of each seed variety. For excess seeds that Syngenta is likely to be able to sell in the commodity market, the allowance is the cost of the seed minus its net realizable value, which is estimated as the expected net proceeds of commodity sale. If commodity sale is not probable, the allowance is the full cost of the excess seed inventories.

To determine the allowances required, management effort and judgment is applied to analyze at crop, variety and batch level seed inventory quantity, quality and forecast sales data, developing commercial practices, available markets and the speed of expected product portfolio changes. The rapidly evolving combination of corn seed genetics and trait stacks in North America and Latin America result in shorter commercial lives of a typical hybrid seed variety than in other crops and regions, with variation between actual and previously forecast sales and consequent greater risk of excess seed at individual hybrid level. Excess seed quantities are also affected by harvest yield, which is influenced by unpredictable weather and growing conditions. Seeds inventory allowance expense for 2024 was \$196 million (2023: \$299 million), with the decreased provision expense driven largely by reductions in uncertainties in Ukraine regarding the impact of the conflict with Russia and lower returns in Brazil. The allowance balance at December 31, 2024 was \$457 million (2023: \$492 million), reflecting the decrease in total seeds inventory driven by lower production volumes across almost all regions.

Impairment review

At December 31, 2024, Syngenta has reported intangible assets of \$2,438 million (2023: \$2,571 million) for goodwill and \$4,208 million (2023: \$4,221 million) for intangible assets other than goodwill, as reported in Note 12. The recoverable amount for goodwill has been determined based on the value-in-use of the relevant operating segment, CGU or group of CGUs to which the goodwill is allocated. The recoverable amounts of all material intangible assets and property, plant and equipment (PP&E) have also been assessed for indicators of impairment.

The main assumptions used in determining the recoverable amounts for operating segments and other CGUs include market size and Syngenta's market share, future sales prices and volumes, future development expenditures required to maintain products' marketability and registration in the relevant jurisdictions, and products' lives. At operating segment level, the key assumptions related to sales volume and value are expressed separately for each product line, market segment and crop. At CGU level, assumptions are expressed by product. The assumptions are reviewed annually as part of management's budgeting and strategic planning cycles. These assumptions can be subject to significant adjustments from such factors as changes in crop growing patterns in major markets (for example, as a result of movements in crop prices), changes in product registration, or pressure from competitor products.

Key assumptions used in value-in-use calculations as at September 30	2024		2023		
	Period of cashflow projections	Terminal growth rates (%)	Period of cashflow projections	Terminal	
Crear Cava		<u> </u>	<u>'</u>	growth rates (%)	
Crop Core	4 years	2.0	4 years	2.0	
Professional Solutions	4 years	2.0	4 years	2.0	
Field Crops	9 to 14 years	2.0 to 4.0	9 to 14 years	2.0 to 4.0	
Flowers	9 years	2.0	9 years	2.0	
Vegetables	9 years	3.0	9 years	3.0	

For assessing value-in-use, estimated cash flows for operating segments and other CGUs were based on Syngenta's management forecasts and other key assumptions as follows:

- For CGUs relating to Syngenta's seeds business a nine-year forecast horizon was used for the majority of CGUs, with a portion of one CGU using a fourteen-year forecast horizon. The Seeds CGUs' longer forecast horizon and higher long-term growth rates are considered to better reflect these higher-growth business streams and the length of the product development cycle for the development and introduction of new products in these business streams which are in excess of four years.
- The discount rate is determined from a capital asset pricing model using data from capital markets, including market yields on 30-year US government bonds. The post-tax weighted average cost of capital considered in the annual impairment assessment as of September 30, 2024 was 7.6 percent (2023: 8.0 percent). The updated post-tax weighted average cost of capital as of December 31, 2024 was 8.1 percent (2023: 7.2 percent). The discount rate includes market estimates of the industry sector risk premium.
- The pre-tax discount rates used for all segments, CGUs and groups of CGUs ranged from 8.2 percent to 17.8 percent (2023: 8.5 percent to 10.0 percent), with the increase in the upper range primarily being driven by increases in the risk-free-rate as a result of global inflationary pressures.

At December 31, 2024 and 2023, the largest amounts of goodwill were allocated to the following CGUs, for which the key inputs used in value-in use calculations in the annual impairment assessment as at September 30, 2024 and 2023 are as follows:

	2024				2023	
	Goodwill (\$m)	Pre-tax discount rate (%)	Terminal growth rates (%)	Goodwill (\$m)	Pre-tax discount rate (%)	Terminal growth rates (%)
Crop Core	1,412	9.0	2.0	1,313	9.4	2.0
North America corn and soybean seed	316	8.8	2.6	316	9.1	2.6
Rest of world (excluding North America) corn and soybean seed	408	8.7	2.5	467	9.0	2.5

The use of a nine-year forecast horizon (fourteen-year for a portion of one seeds CGU) for CGUs relating to Syngenta's seeds business exposes the recoverability of the GGUs to additional risk from changes in assumptions. The recoverability is most sensitive to changes in the discount rate. As at September 30, 2024, the estimated recoverable amount of the Field Crops operating segment, which includes several seeds CGUs, exceeded its carrying amount by approximately \$199 million (2023: \$1,909 million). The pre-tax discount rate applied to this operating segment was 8.6 percent (2023: 8.9 percent) and would need to increase to 8.7 percent (2023: 10.6 percent) for the estimated recoverable amount to be equal to the carrying amount. The estimated recoverable amount of the Field Crops operating segment was reassessed as of December 31, 2024 as a result of the Seeds Field Crops transformation plan. The updated recoverable amount exceeded its carrying amount by approximately \$2,740 million based on the updated pre-tax discount rate of 9.3 percent. Management believes that any other reasonably possible change in key assumptions described above would not cause the aggregate carrying amount of the CGUs to exceed their recoverable amounts.

For the year ended December 31, 2024, impairment losses for intangible assets were \$236 million, of which \$99 million relate to the Flowers CGU as the carrying amount of this CGU was determined to be higher than its recoverable amount of \$95 million. These charges, recognized in other general and administrative expenses, included \$14 million related to the impairment of goodwill, \$68 million to capitalized development costs and \$17 million to products rights, trademarks and other intangibles. The Flowers business performance is currently being affected by reduced market demand in all regions. The forecast used for the impairment review reflects the current and expected future business environment and has been adjusted downwards compared to the previous projections, which has a significant impact on the calculated recoverable amount of the CGU. As at September 30, 2024 the pre-tax discount rate applied to this CGU was 8.6 percent (2023: 9.1 percent). The updated pre-tax discount rate applied to this CGU as of December 31, 2024 was 9.1 percent (2023: 9.1 percent).

Impairment losses of \$77 million were recognized for development projects and \$6 million related to other intangibles in the Field Crops CGU, recorded as a result of the Seeds Field Crops transformation plan. This impairment reflects strategic decisions to exit certain geographies and crops. Impairment losses for development projects totaling \$50 million were also recognized in the Crop Core CGU where further development of certain technologies held by Syngenta was not considered to be cost effective and activities had been suspended. As at September 30, 2024, the recoverable amount of this CGU was \$36,715 million.

For the year ended December 31, 2023, impairment losses for intangible assets were \$41 million, all of which related to the Crop Core CGU where further development of certain technologies held by Syngenta was not considered cost effective and activities had been suspended. As at September 30, 2023, the recoverable amount of this CGU was \$39,433 million.

For the year ended December 31, 2024, impairment losses for property, plant and equipment were \$45 million (2023: \$3 million), of which \$33 million relate to the impairment of Flowers CGU assets and \$12 million of other impairments where asset values are not supported by future business plans.

Environmental provisions

At December 31, 2024, Syngenta reported in Note 19 provisions for environmental remediation of \$138 million (2023: \$156 million), some of which are included within restructuring provisions. Remediation of environmental damage at sites with which Syngenta is associated typically takes a long time to complete due to the substantial amount of planning and regulatory approvals normally required before remediation activities can begin. The assumptions used by Syngenta to estimate its environmental provisions may change significantly before or during the remediation period due to changes in the extent of remediation required or the method used to remediate the damage. In addition, increases in or releases of environmental provisions may be necessary whenever new developments occur or additional information becomes available. The major uncertainties that impact the outcome of remediation are:

 the extent of the contaminated land area, which is not always limited to land occupied by the Syngenta site. Ongoing monitoring or remediation work may identify changes in the area believed to be contaminated;

- the nature of the work Syngenta will be obliged to perform or pay for. This depends upon the current or proposed use of contaminated land, substantively enacted legislation, and land zoning by and negotiation with the relevant regulatory authorities. In Switzerland, proposed remediation plans at certain sites may be subject to public referenda;
- sharing of costs with other past and present occupiers of Syngenta's sites. At certain shared sites, Syngenta is responsible for an
 agreed proportion of remediation costs, which may change following discussions with authorities and the affected third parties. At other
 sites, third parties have agreed to reimburse Syngenta for some or all of the costs it incurs.

Consequently, environmental provisions can change significantly. Because of the inherent uncertainties in estimating such long-term future obligations, Syngenta periodically supplements its internal expertise with external expertise when determining environmental provisions.

In 2024, \$2 million of additional environmental provisions were recognized due to updated estimates of costs for remediation activity (2023: \$10 million of environmental provisions were released) and a further \$4 million of environmental provisions were recognized in relation to a third party contractor's facility experiencing extensive operational and regulatory issues where regulators have required companies who used the facility to share the costs of remedial action (2023: \$10 million). Syngenta has a 16 percent share of these costs. Otherwise, in 2024 and 2023, except for \$18 million (2023: \$13 million) of cash outflows reflecting remediation activity, there were no significant changes to environmental provisions.

Proposals have been made suggesting remediation of the existing contamination on certain shared sites in preference to monitoring and containment. Syngenta will negotiate the proposals with the relevant authorities but the final adopted solution is subject to regulatory uncertainty and the ultimate liability may be higher or lower than the amount provided. Taken together, the provisions at December 31, 2024, for these shared sites comprise approximately 27 percent of total environmental provisions. The top ten exposures at the end of 2024 comprise approximately 85 percent of the total environmental provisions. In the opinion of management, reasonably possible increases in the provisions related to these top 10 exposures would not exceed approximately 150 percent of the total environmental provision recognized at December 31, 2024.

Defined post-employment benefits

At December 31, 2024, Syngenta has reported other non-current assets of \$468 million (2023: \$246 million) and provisions of \$154 million (2023: \$171 million) as net defined benefit (DB) pension assets and liabilities, respectively, as set out in Note 21. These amounts may change significantly from one accounting period end to another due not only to expense recognized in profit and loss and cash payments, but also to changes in the actuarial assumptions used to measure the defined benefit obligation (DBO) and to variances between those assumptions and actual outcomes ("experience variances"), both of which are recognized in OCI. Significant judgment is required when selecting key assumptions for measuring post-employment benefit expense for a period and the DBO at the period end for each defined benefit plan. The specific assumptions used and experience variances are disclosed in Note 21. These variances were caused principally by external financial market movements in corporate bond yields used to benchmark the discount rate, and in asset prices affecting the actual return on assets. These factors are outside Syngenta's direct control, and it is reasonably possible that future variances will be at least as great as past variances.

At December 31, 2024 and 2023, for each of Syngenta's three largest defined benefit pension plans, the sensitivity of the DBO to a change in each significant actuarial assumption is as follows:

<u>(</u> \$m)	2024			2023			
Increase (decrease) in DBO	Switzerland	UK	USA	Switzerland	UK	USA	
Discount rate – 25 basis point decrease in rate	91	38	11	91	53	12	
Discount rate – 25 basis point increase in rate	(86)	(37)	(10)	(86)	(50)	(11)	
Pension increase – 25 basis point increase in rate	n/a	35	n/a	n/a	48	n/a	
Pension increase – 25 basis point decrease in rate	n/a	(34)	n/a	n/a	(47)	n/a	
Interest credit rate – 25 basis point increase in rate	20	n/a	n/a	20	n/a	n/a	
Interest credit rate – 25 basis point decrease in rate	(19)	n/a	n/a	(18)	n/a	n/a	
Life expectancy ¹	73	51	5	70	54	6	

¹ The life expectancy sensitivity is calculated using the difference between the reported DBO amount and the DBO amount projected using a one-year increase, compared with the assumptions actually used, in the life expectancy for each plan member. This alternative projection is calculated using mortality rates that produce an immediate increase of one year for a plan member at normal retirement date, with corresponding changes at other ages.

Each sensitivity amount is calculated assuming that all other assumptions are held constant. It should be noted that economic factors and conditions often affect multiple assumptions simultaneously. For the UK pension plan, the discount rate and pension increase sensitivities shown are relative to price inflation, because limited price indexation of pensions in payment and deferred pension rights is required both by the Syngenta UK pension plan rules and by UK statutory pension regulations. For Syngenta's Swiss and US plans, the sensitivities are for changes in the nominal discount rates, because the rules and statutory regulations applicable to those plans contain no inflation linkage and indexation of benefits to inflation is not general market practice in those countries. Syngenta is not able to predict the extent of likely future changes in the discount rate or life expectancy assumptions, but based on past experience, the discount rate for each plan could change by up to 350 basis points (bp) within a twelve-month period. Pensionable pay is now permanently frozen for the UK DB pension plan as explained below, and the sensitivity of the DBO to the assumed rate of increase in pensionable pay is not material for the Swiss or US plans.

To select the discount rate, Syngenta uses yields of AA-rated corporate bonds. The relevant yield is determined either by analyzing a population of bonds whose cash flows collectively approximate the estimated cash flow profile of benefit payments by a Syngenta plan (UK and USA), or by using the yield of a published bond index and adjusting it in line with the relevant market yield curve to the extent that the average maturity of the bonds in the index is different from that of the relevant Syngenta benefits (Switzerland). Nominal discount rates at December 31, 2024 are as follows:

 Switzerland
 1.00 percent
 (2023: 1.50 percent)

 UK
 5.49 percent
 (2023: 4.63 percent)

 USA
 5.60 percent
 (2023: 5.05 percent)

In valuing the UK DBO at December 31, 2024, the UK long-term rate of retail price inflation (RPI) is assumed to be 3.22 percent (2023: 3.09 percent). Future statutory pension increases are based on consumer price inflation (CPI). Most Syngenta UK pension plan members have benefits specifically linked to RPI in accordance with the plan rules, but some members will see increases linked to CPI. CPI is assumed to be 50 basis points (2023: 45 basis points) below RPI.

Over the last 20 years, life expectancy estimates steadily increased in all major countries in which Syngenta sponsors pension plans, although available data for the UK and USA for the four most recent years indicates a slight decline compared to previous projections, and Syngenta's projections of future life expectancy improvement have been reduced accordingly. Syngenta sets mortality assumptions after considering the most recent statistics practicable. Syngenta uses generational mortality tables to estimate probable future mortality improvements. These tables assume that the trend of increasing life expectancy will continue, although at a decreasing rate, resulting in pension benefit payments to younger members being likely to be paid for longer time periods than older members' pensions, given that assumed retirement ages are those defined in the rules of each plan. At December 31, 2024, the UK DBO was estimated using mortality rates based on the UK Institute and Faculty of Actuaries' CMI SAPS Pensioner Amounts Light Tables with 1.25 percent per annum long-term trend from 2017 (2023: UK Institute and Faculty of Actuaries' CMI SAPS Pensioner Amounts Light Tables with 1.75 percent per annum long-term trend from 2002-2018), with assumed future improvement of 1.25 percent (2023: 1.25 percent) per annum in line with the CMI Core Projections model 2023 (2023: CMI Core Projections model 2022). Syngenta adopts the default value of 7.0 for the default smoothing parameter as mortality experience suggests more weight should be placed on recent data and in 2024, a nil percent (2023: nil percent) weighting was placed on 2020 and 2021 experience due to COVID-19 impacts but a 15 percent weighting was placed on 2023. Mortality, commutation and withdrawal assumptions were updated in 2024 following the most recent triennial valuation for UK statutory purposes at March 31, 2024, decreasing the DBO by \$95 million (6 percent). The next statutory valuation of the plan will be performed at the latest at March 31, 2027.

At December 31, 2024 and 2023, Syngenta valued the defined benefit obligation for its Swiss pension plan using mortality, disability and employee turnover assumptions from the BVG 2020 generational table. At December 31, 2024, Syngenta valued the defined benefit obligation for its US pension plan using mortality assumptions from the PRI-2012 generational mortality table together with Scale MP-2021 mortality improvements starting with base year 2012 (2023: base year 2012).

Syngenta's major pension plans give members lump sum or annuity benefit payment options. Syngenta values its pension liabilities on the assumption that the choices made by members who will retire in the future will be consistent with choices made by members who have retired recently.

For calculating benefits of UK plan members, pensionable pay remains frozen at January 1, 2016 levels. The plan remains open to benefit accrual for existing members, and pay increases awarded after January 1, 2016, which are not part of defined benefit pensionable pay, are pensionable under the Syngenta Group Personal Pension (GPP), a separate defined contribution plan, for those who choose to join. Employees who choose to leave the defined benefit section of the UK pension plan are able to join the GPP. Historical regulatory changes allow members aged at least 55 to transfer their benefits out of the plan into arrangements which allow flexible cash withdrawals, in contrast to the previous requirement that members take at least 75 percent of their benefit in annuity form. While market conditions in recent years have resulted in transfer values favorable to members, increases in gilt yields in 2023 and 2024 have reduced transfer values. These factors resulted in \$2 million (2023: \$4 million) of benefit payments out of the UK plan as some members withdrew all their benefits. Syngenta has not made any allowance for future transfers out in connection with the regulatory changes. Available data indicates that if transfers were to continue at the current rate until the next statutory valuation, this would not cause Syngenta to recognize a material actuarial gain or loss in its consolidated financial statements.

Between 1978 and 1997, UK legislation required certain pension plans, including Syngenta's UK plan, to accrue Guaranteed Minimum Pensions ("GMP") in a way that resulted in gender inequalities. This affected both the GMP and the non-GMP element of members' pensions. The European Court of Justice's 1991 Barber ruling mandated equal pensions for men and women for benefits earned thereafter. However, how to address the inequality in GMPs was unclear until the 2018 Lloyds case in the UK High Court. This case determined that pension plans must equalize the non-GMP benefits accrued between 1990 and 1997. It also allowed employers to mandate a specific equalization method, "Method C2," which involves comparing pension payable with those of a notional member of the opposite gender and making retrospective payments for the difference, with interest. Syngenta has adjusted its UK DBO to reflect the application of Method C2, although there is uncertainty due to pending clarifications, lack of detailed member calculations, and potential variations in the actual impact of equalization. A further judgment in November 2020 confirmed that historical transfers out also require allowance for GMP equalization.

IFRSs require Syngenta to estimate the economic benefit it can obtain from the amount by which the fair value of assets held in a DB plan exceeds the DBO measured in accordance with IAS 19 ("surplus"), and recognize a reduction in the net DB asset to the extent that the future economic benefit is lower than the actual surplus at the reporting date, or an increase in the net DB liability if the future economic benefit is lower than the projected future surplus that would arise when Syngenta meets an existing minimum funding obligation. Accounting recognition of a surplus in Syngenta's UK defined benefit pension plan is supported by the economic benefit of future contribution savings and, when that benefit is less than the surplus, also by the future refund, net of applicable taxes, which will be unconditionally available to Syngenta when all liabilities have been settled. At December 31, 2024, Syngenta recognized \$54 million (2023: \$92 million) reduction to the net surplus to reflect taxes Syngenta would suffer on the portion of the projected surplus supported by Syngenta's refund rights. Benefit accrual for existing members of Syngenta's main US pension plan was frozen as from December 31, 2018, as further described in Note 21 below. At December 31, 2024 and 2023 the US pension plan was not in a surplus. At December 31, 2024, Syngenta's Swiss pension plan had a surplus of \$289 million (2023: \$348 million). The surplus was able to be recognized in full as it was equal to the amount that the estimated future employer contributions (minimum funding requirement) exceed service costs which represents the economic benefit arising from the surplus (2023: restricted to \$161 million). Swiss pension law does not permit a refund of the surplus.

Litigation provisions

Syngenta's accounting estimates related to provisions for litigation are disclosed in Note 19.

3. Acquisitions, divestments and other significant transactions

The following significant transactions occurred during 2024 and 2023.

2024

Acquisitions

On July 1, 2024, Syngenta acquired 100 percent of the issued shares of Produtécnica Nordeste Comércio de Insumos Agrícolas Ltda. ("Produtecnica"), a limited liability company incorporated in Brazil, a distributor of agricultural products in the Brazilian states of Maranhao, Piaui and Tocantis of Brazil. The acquisition will enable Syngenta to strengthen its presence and explore further expansion opportunities in the North and Northeast regions of Brazil.

On December 24, 2024, Syngenta exercised a call option and obtained 100 percent control of Intrinsyx Bio Inc., ("Intrinsyx Bio"), a former associate in which Syngenta held a 40 percent equity ownership, for consideration of \$50 million. Intrinsyx Bio is a US-based research and development company involved in the development of biological products for the Crop Protection segment and will enable Syngenta to develop new products for the biological market. Due to Syngenta's previous 40 percent non-controlling ownership interest, the acquisition is considered to have occurred in stages, requiring Syngenta to fair value its existing Intrinsyx Bio investment immediately prior to the acquisition date, which resulted in recognizing a \$5 million gain in Other general and administrative in the income statement.

The acquisition-date fair values of assets, liabilities and consideration for these acquisitions were not individually or in aggregate material, and therefore were aggregated in the table below. The major classes of assets acquired, and liabilities assumed at the acquisition date, which are still provisional due to the timing of the acquisitions, are:

<u>(</u> \$m)	Total
Cash and cash equivalents	2
Inventories	15
Trade receivables and other current assets	32
Property, plant and equipment	1_
Intangible assets	112
Trade and other liabilities	(70)
Deferred tax liabilities	(21)
Net assets acquired	71
Purchase price, after agreed-upon adjustments	56
Fair value of 40 percent equity interest previously held by Syngenta	33
Goodwill	18
Cash flow related to these acquisitions was as follows:	
<u>(</u> \$m)	Total
Total cash paid	47
Net cash acquired	(2)
Net cash outflow	45

Deferred consideration payments of \$5 million are included in Financial debt and other non-current liabilities. Payments of deferred consideration related to acquisitions completed in prior periods were \$37 million. The \$82 million net consolidated cash outflow is included in Business acquisitions, net of cash acquired, in the consolidated cash flow statement.

Divestments

On December 17, 2024, Syngenta completed the sale of certain of its subsidiaries based in China to Syngenta Group Co. Ltd, the parent company of Syngenta Group, for a consideration of \$225 million. The divestment resulted in a gain of \$73 million, after the recycling to the income statement of currency translation losses previously reported in Other reserves in the consolidated balance sheet of \$33 million, recognized within Divestment gains in the consolidated income statement.

The net proceeds of \$207 million, after withholding tax settlement, are reported in Other receivables in the balance sheet and were paid in January 2025. Cash flow related to the divestment, included in Business divestments, net of cash divested in the consolidated cash flow statement, was as follows:

<u>(</u> \$m)	Total
Withholding tax	18
Net cash divested	(93)
Net cash outflow	(75)

In addition to cash and cash equivalents, the carrying amounts of assets, liabilities and non-controlling interest divested were as follows:

_(\$m)	Total
Inventories	180
Trade receivables and other current assets	202
Property, plant and equipment	74
Intangible assets	178
Other non-current assets	30
Trade accounts payable, other current liabilities and provisions	(509)
Financial debts	(96)
Other non-current liabilities	(16)
Non-controlling interest	(17)
Net assets and non-controlling interest divested	26

Sale and leaseback transactions

On October 23, 2024, Syngenta completed a sale and leaseback transaction for three of its sites in the United States of America. The total gain from the associated site disposals was \$190 million, of which \$42 million was recognized as a gain at the disposal date and \$148 million, corresponding to the value of the retained leaseback, is deferred in accordance with IFRS 16, through reduction in the amount recognized for the right-of-use asset, and is being amortized over a 17-year period from the disposal date. The net proceeds of \$203 million are reported as Proceeds from disposals of property, plant and equipment in the consolidated cash flow statement.

On July 1, 2024, Syngenta renegotiated the lease on one of its previous sale and leaseback transactions with a new lease provider. Under the new lease arrangement, the duration of the lease was decreased from its initial 20-year term down to 5 years. This reduction in lease term resulted in Syngenta recognizing an additional \$28 million of gain that was required to be deferred under the terms of the original lease agreement.

2023

Acquisitions

On April 28, 2023, Syngenta acquired 100 percent of the issued shares of Macspred Pty Ltd. ("Macspred"), a limited liability company incorporated in Australia, a specialist in weed management for the forestry, roads, rail, utilities, and infrastructure sectors. The acquisition enables Syngenta to enter, through its Professional Solutions business, into the forestry products and vegetation markets in Australia.

On May 3, 2023, Syngenta acquired 100 percent of the issued shares of Agrocerrado Produtos Agricolas E Assistencia Tecnica Ltda. ("Agrocerrado"), a limited liability company incorporated in Brazil, a distributor of agricultural products in the Minas Gerais state of Brazil. The acquisition enables Syngenta to strengthen its presence and explore further expansion opportunities in Minas Gerais.

On June 20, 2023, Syngenta acquired 100 percent of the issued shares of Kubix AgroIndustrial Ltda. ("Kubix"), a limited liability company incorporated in Brazil. Kubix, based in Indaiatuba, state of Sao Paulo, is a production facility that manufactures crop protection products. The acquisition will increase Syngenta's manufacturing capacity to meet growing demand.

On July 3, 2023, Syngenta acquired 100 percent of the issued shares of Feltrin Sementes Ltda. ("Feltrin"), a limited liability company incorporated in Brazil. Feltrin is a vegetable seed breeding and distribution company based in Rio Grande do Sul. The acquisition enables Syngenta to increase its vegetable seeds position through Feltrin's strong distribution network.

The acquisition-date fair values of assets, liabilities and consideration for the aforementioned acquisitions were not individually and in aggregate material, and therefore were aggregated in the table below. During 2024, the final purchase price allocations of the aforementioned acquisitions were completed and did not result in any significant revisions of the provisional assets and liabilities balances reported as at December 31, 2023. The major classes of assets acquired, and liabilities assumed at the acquisition date are:

_(\$m)	Total
Cash and cash equivalents	10
Inventories	22
Trade receivables and other current assets	41
Property, plant and equipment	21
Intangible assets	19
Deferred tax and other non-current assets	6
Trade and other liabilities	(79)
Net assets acquired	40
Purchase price, after agreed-upon adjustments	77
Goodwill	37

Cash flow related to these acquisitions was as follows:

<u>(</u> \$m)	Total
Total cash paid	69
Net cash acquired	(10)
Net cash outflow	59

Deferred consideration payments of \$8 million are included in Financial debt and other non-current liabilities. Payments of deferred consideration related to acquisitions completed in prior periods were \$73 million. The \$59 million net cash outflow is included in Business acquisitions, net of cash acquired, in the consolidated cash flow statement.

Sale and leaseback transactions

On December 1, 2023, Syngenta completed the sale and leaseback transaction on three research and development sites, and one formulation and packaging site, all of which were located in the United States of America. The total gain on the associated site disposals was \$171 million, of which \$16 million was recognized as a gain at the disposal date and \$155 million, corresponding to the value of the retained leaseback, is deferred in accordance with IFRS 16, through reduction in the amount recognized for the right-of-use asset, and is being amortized over a 20-year period from the disposal date. The proceeds from the disposal amount to \$240 million and are reported as Proceeds from disposals of property, plant and equipment in the consolidated cash flow statement.

4. Segmental breakdown of key figures

Syngenta has five operating segments consisting of the Crop Core, Professional Solutions, Field Crops, Vegetables and Flowers businesses. These have been aggregated into the global Crop Protection reporting segment, consisting of Crop Core and Professional Solutions, and the global Seeds reporting segment, consisting of Field Crops, Vegetables and Flowers. Aggregation is based on internal management structures and underlying economic similarity. Crop Core and Professional Solutions have been aggregated because the similarities in their products, production processes, distribution methods and regulatory environments are much more significant than the differences in the market segments to which their respective customer bases sell, and they each have similar economic performance. Field Crops, Vegetables and Flowers have been aggregated because the extensive similarities which each of these businesses has with the others in their products and customers, their production and distribution processes and the regulatory environment for their products are much more significant than their respective differences, which relate to regulatory processes for GM traits used in certain Field Crops products and to the differences in a proportion of their respective customer bases. Also, the economic performance of these businesses is expected to be similar. Segment performance is managed based on segment operating income before restructuring costs and divestments, which is the measure of segment profit or loss presented, and is based on the same accounting policies as consolidated operating income.

Transactions between segments are generally priced based on the third party selling prices achieved by the purchasing segment less an allowance for selling and distribution profit margins for the purchasing segment.

The segmental breakdown of key figures for the years ended December 31, 2024 and 2023 is as follows:

2024 (\$m)	Crop Protection	Seeds	Total segments	Restructuring	Syngenta
Product sales - to third parties	13,205	3,432	16,637	-	16,637
Royalty and license income - from third parties	3	341	344	-	344
Total segment sales	13,208	3,773	16,981	-	16,981
Cost of goods sold	(8,816)	(2,071)	(10,887)	-	(10,887)

¹ Diverse field crops comprise primarily sunflower and cereals

In 2024, regional management structures were strategically realigned to more effectively address market dynamics. The analysis of revenue by primary geographical market has been revised to reflect the new organization and comparative figures have been restated accordingly.

The analysis of revenue by primary geographical market for the years ended December 31, 2024 and 2023 is as follows:

_(\$m)	2024	2023
Asia, Middle East and Africa	2,737	3,095
China	735	691
Europe	2,869	3,112
Latin America	6,080	6,749
North America	3,823	4,669
Other	737	880
Total sales	16,981	19,196

Summarized additional information on the nature of expenses for the years ended December 31, 2024 and 2023 is as follows:

_(\$m)	2024	2023
Salaries, short-term employee benefits and other personnel expense	3,571	3,548
Pension and other post-employment benefit expense	182	166
Total personnel costs	3,753	3,714
Depreciation of property, plant and equipment and right-of-use assets	566	534
Impairment of property, plant and equipment and right-of-use assets	45	2
Amortization of intangible assets	295	276
Impairment of intangible assets	236	41

5. Regional breakdown of key figures

The following countries individually accounted for more than 5 percent of one or more of the respective Syngenta totals for the years ended December 31, 2024 and 2023:

(\$m, except %)	Sales ¹			Tot	Total non-current assets ²			
Country	2024	%	2023	%	2024	%	2023	%
Argentina	773	5	1,220	6	595	5	492	4
Brazil	4,430	26	4,612	24	1,263	10	1,463	12
Switzerland	36	-	43	-	4,629	38	4,755	38

USA	3,295	19	4,092	22	2,681	22	2,421	19
Rest of world	8,296	49	9,077	47	2,104	18	2,491	20
Total	16,981	100	19,196	100	12,097	100	12,454	100

¹ Sales by location of third-party customer

No single customer accounted for 10 percent or more of Syngenta's total sales.

6. General and administrative

The following items were recognized within General and administrative for the years ended December 31, 2024 and 2023:

_(\$m)	2024	2023 ¹
Productivity programs and other restructuring costs	(242)	(36)
Acquisition, divestment and related costs	(25)	(7)
Restructuring costs	(267)	(43)
Divestment gains (Note 3)	73	-
Impairment and accelerated depreciation not allocated to functions	(278)	(30)
Other general and administrative costs	(314)	(527)
Other general and administrative	(592)	(557)

¹ For 2023, \$30 million of impairments and other non-cash items have been reclassified from Restructuring costs to Other general and administrative to be consistent with the 2024 presentation

Productivity programs and other restructuring costs

2024

During 2024, Syngenta set up a Transformation Office to shape and implement strategic initiatives and enable productivity improvements across the organization over a multi-year period. Cash costs of \$236 million were incurred for these initiatives, including \$175 million of severance and other employee related costs due to strategic alignment of regional management structures and head-count reduction programs, \$21 million for system projects covering Procurement, Production and Supply and several system migrations as part of a multi-year initiative targeting a global ERP platform, \$22 million of severance, dismantling and other costs associated with the mandatory relocation of a manufacturing facility in China, \$10 million of reinstatement and lease penalty costs associated to the closure of certain facilities in Singapore, and \$8 million across a number of individually small initiatives. The remaining \$6 million consists of costs to wind down certain sustainable agricultural initiatives, which are being replaced by the newly announced sustainability priorities.

2023

Cash costs of \$36 million were incurred for productivity initiatives consisting of \$17 million for system projects covering Procurement, Production and Supply and several system migrations as part of a multi-year initiative targeting a global ERP platform, \$8 million of severance costs due to strategic alignments in the R&D organization, and \$11 million across a number of individually small initiatives driving operational efficiencies and strategic alignments in the Crop Protection and Seeds businesses.

Acquisition, divestment and related costs

2024

Cash costs include \$11 million incurred for merger and acquisition projects and transaction costs, and \$14 million incurred for projects to integrate completed acquisitions.

2023

Cash costs included \$10 million incurred for merger and acquisition projects and transaction costs, \$4 million incurred for projects to integrate completed acquisitions, \$17 million of costs related to the integration of the Syngenta Group, as well as costs relating to analyzing and preparing for a future Syngenta Group IPO, partially offset by a \$24 million gain due to the release of a tax contingency provision recognized for a previously completed acquisition that expired in the current year.

² Excluding deferred tax assets, post-employment benefit assets and derivative financial assets

Impairments and accelerated depreciation not allocated to functions

2024

Impairment and other non-cash items include \$29 million of accelerated depreciation of a manufacturing facility caused by adopting a shorter asset life due to the mandatory relocation mentioned above, \$83 million of impairments of capitalized development costs and other intangibles, \$15 million of inventory write-down within the Seeds business due to strategic decisions to exit certain geographies and crops, \$7 million of impairment of Syngenta's investment in MAS Seeds SA (see Note 14), and \$12 million of other smaller impairments where asset values are not supported by future business plans. As described in Note 2, impairment losses were also recognized in the cash-generating unit Flowers for \$132 million (comprising \$14 million of goodwill, \$68 million of capitalized development costs, \$17 million of products rights, trademarks and other intangibles, and \$33 million of property, plant and equipment).

2023

Impairment and other non-cash costs included \$32 million of accelerated depreciation of a manufacturing facility caused by adopting a shorter asset life due to mandatory relocation, partially offset by a \$2 million gain relating to a reversal of an inventory write-off from a restructuring initiative from previous years.

Other general and administrative costs

Significantly lower Other general and administrative costs in 2024 included productivity savings from travel and personnel costs, deferral of project costs and a significant decrease in litigation expenses due to the conclusion in 2023 of all material exporter plaintiff claims related to Viptera. Other general and administrative costs are allocated to the operating segments (see Note 4).

7. Income taxes

Income before taxes for the years ended December 31, 2024 and 2023 consists of the following:

<u>(</u> \$m)	2024	2023
Switzerland	(115)	425
Foreign	809	1,004
Total income before taxes	694	1,429
Income tax (expense)/benefit on income for the years ended December 3°	, 2024 and 2023 consists of the following:	
<u>(</u> \$m)	2024	2023
Current income tax (expense):		
Switzerland	(36)	(97)
Foreign	(331)	(285)
Total current income tax (expense)	(367)	(382)
Deferred income tax (expense)/benefit:

Adjustments to current tax for prior periods	52	52
Total current income tax (expense)	(367)	(382)

The components of deferred income tax (expense)/benefit on income tax the years ended December 31, 2024 and 2023 are:

<u>(</u> \$m)	2024	2023
Origination and reversal of temporary differences	(53)	(47)
Changes in tax rates or legislation	5	1
Other adjustments to deferred tax for prior periods	(14)	-
Utilization of tax losses previously recognized as deferred tax assets	(1)	(4)
Recognition of previously unrecognized deferred tax assets	7	89
Non-recognition of deferred tax assets	(10)	(5)
Total deferred income tax (expense)/benefit	(66)	34

OCI and Income tax relating thereto, for each component of equity, for the years ended December 31, 2024 and 2023 are as follows:

_	2024			2023		
(\$m)	Pre-tax	Tax	Post-tax	Pre-tax	Tax	Post-tax
Items that will not be reclassified to profit or loss:						
Fair value reserves: Equity investments at fair value through OCI	(31)	2	(29)	-	-	_
Retained earnings: Actuarial gains/(losses)	184	(12)	172	85	7	92
Items that may be reclassified to profit or loss:						
Fair value reserves: Cash flow and net						
investment hedges	(39)	(3)	(42)	(92)	20	(72)
Currency translation effects	(483)	(1)	(484)	(125)	-	(125)
Total	(369)	(14)	(383)	(132)	27	(105)

Current income tax credits recognized in OCI were \$nil (2023: \$9 million). No income tax was directly (charged)/credited to shareholder's equity for the years ended December 31, 2024 and 2023.

Analysis of tax rate

The table below presents the main elements causing Syngenta's effective tax rate to differ from the statutory tax rate for the years ended December 31, 2024 and 2023. Syngenta's statutory tax rate consists of the ordinary tax rate applicable in the canton of Basel Stadt, where Syngenta is headquartered. Syngenta applies the domestic Swiss tax rate as it believes this is more meaningful than using a weighted average tax rate.

The Swiss domestic rate applicable in the canton of Basel Stadt is 13 percent and has been used for the tax rate reconciliation (2023: 13 percent).

	2024 %	2023 %
Statutory tax rate	13	13
Effect of income taxed at different rates	35	11
Effect of other disallowed expenditures and income not subject to tax	(4)	9
Tax deduction for amortization and impairments not recognized	(6)	-
Effect of changes in tax rates and laws on previously recognized deferred tax assets and liabilities	(1)	-
Effect of recognition of previously unrecognized deferred tax assets	(1)	(6)
Effect of recognition of previously unrecognized tax losses	(2)	-
Changes in prior year estimates and other tax items	3	(4)
Effect of non-recognition of deferred tax assets on temporary differences	1	-
Effect of non-recognition of deferred tax assets on tax losses in current year	24	1
Effective tax rate	62	24

Effect of income taxed at different rates includes rate differences from the domestic Swiss tax rate attributable to income generated by inmarket distribution companies, which is higher compared to the prior year mainly driven by an increased proportion of profits outside of Switzerland.

Non-recognition of current year tax losses in Switzerland and Argentina increased Syngenta's effective tax rate by 24 percent. Tax deductible investment impairment under local GAAP decreased Syngenta's effective tax rate by 6 percent. Changes in prior year income tax estimates increased the effective tax rate by 3 percent in 2024 mainly due to closures of previous tax periods.

Recognition of deferred tax assets on temporary differences and tax losses decreased the effective tax rate by 3 percent whereas the non-recognition of previously recognized deferred tax assets increased Syngenta's effective tax rate by 1 percent in 2024.

The estimated tax liability of Syngenta related to OECD Pillar Two is immaterial for the year ended December 31, 2024 and therefore Pillar Two related tax expenses are not disclosed separately.

The movements in deferred tax assets and liabilities during the year ended December 31, 2024 are as follows:

		Recognized in	Recognized in	Currency translation	Other movements and

Net deferred tax asset/(liability)	534	34	18	(78)	5	513

¹ The net deferred tax assets for other temporary differences mainly relate to accrued and other liabilities, including lease liabilities of \$174 million (2023: \$156 million).

The deferred tax assets and liabilities at December 31, 2024 and 2023 reconcile to the amounts presented in the consolidated balance sheet as follows:

<u>(</u> \$m)	2024	2023
Deferred tax assets	2,008	2,363
Adjustment to offset deferred tax assets and liabilities ¹	(388)	(529)
Adjusted deferred tax assets	1,620	1,834
Deferred tax liabilities	(1,724)	(1,850)
Adjustment to offset deferred tax assets and liabilities ¹	388	529
Adjusted deferred tax liabilities	(1,336)	(1,321)

¹ Deferred tax assets and liabilities relating to income taxes levied by the same taxation authority on the same taxable entity or on entities which intend to settle current tax assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously are offset for presentation on the face of the consolidated balance sheet where a legal right of set-off exists.

The gross value at December 31, 2024 and 2023 of unused tax loss carry forwards for which no deferred tax asset has been recognized, by expiration date, is as follows:

_(\$m)	2024	2023
One year	2	1
Two years	-	-
Three years	22	-
Four years	-	1
Five years	213	10
More than five years	753	1
No expiry	343	337
Total	1,333	350

2024 gross values consist mainly of tax loss carry forwards in Switzerland, Argentina, UK, Brazil, Spain, Belgium and Philippines (2023: UK, Brazil, Spain and Belgium).

Deferred tax assets, other than those related to unused tax losses, are not subject to expiry except for \$44 million (2023: \$55 million) unrecognized tax credit carry forward in one jurisdiction that will expire in more than five years. A deferred tax asset of \$52 million (2023: \$48 million) has not been recognized at December 31, 2024 on temporary differences.

A deferred tax liability has not been recognized at December 31, 2024 on temporary differences associated with investments in subsidiaries of \$391 million (2023: \$758 million).

There are no income tax consequences for Syngenta of paying a dividend to its shareholder.

8. Trade and other accounts receivable

Trade receivables at December 31, 2024 and 2023 are as follows:

<u>(</u> \$m)	2024	2023
Trade receivables, gross	5,492	5,980
Provision for doubtful trade receivables	(595)	(587)
Trade receivables	4,897	5,393

Information relating to Syngenta's credit risk exposure at December 31, 2024 and 2023 and movements in the provision for expected credit losses (ECL) on trade and other receivables and amortized cost financial assets in accordance with IFRS 9 for the years ended December 31, 2024 and 2023 are as follows. In addition, further details on the allowance for doubtful receivables charged to income are presented in Note 2.

	2024		2023	
<u>(</u> \$m)	12-month ECL	Lifetime ECL (collectively assessed)	12-month ECL	Lifetime ECL (collectively assessed)
Maximum exposure to credit risk	1,479	5,492	1,220	5,980
Collateral held	-	203	-	106
Impairment provisions				
January 1	(11)	(587)	(6)	(620)
Additions due to business acquisitions	-	(9)	-	(11)
Amounts credited/(charged) to income	(10)	(114)	(1)	29
Amounts written off		43	(3)	11
Currency translation effects and other		72	(1)	4
December 31	(21)	(595)	(11)	(587)
Carrying value, net	1,458	4,897	1,209	5,393

The analysis of gross carrying amount by internal rating grades for the years ended December 31, 2024 and 2023 is as follows:

	2024	2023
_(\$m)	Lifetime ECL (collectively assessed)	Lifetime ECL (collectively assessed)
Amounts not yet due	4,252	4,928
Amounts past due:		
0-90 days	531	415
90-180 days	186	143
180 days-1 year	300	265
More than 1 year	223	229
Maximum exposure to credit risk	5,492	5,980

The carrying amount of trade receivables includes \$56 million (2023: \$39 million) that are due more than one year from the balance sheet date

The carrying amount of trade receivables subject to full and partial recourse factoring arrangements, but not derecognized is \$20 million (2023: \$28 million). Related current liabilities of \$20 million (2023: \$28 million) are disclosed in Note 16. The amount of these receivables before the transfer transactions was \$83 million (2023: \$86 million).

Syngenta engages in risk-sharing factoring arrangements as part of its working capital management strategy, resulting in the derecognition of trade receivables in their entirety. Syngenta's continuing involvement in these arrangements is limited to a second loss guarantee. In certain arrangements, the second loss guarantee is collateralized by Syngenta's investment in the securitization entity. As at December 31, 2024, Syngenta's investments related to these arrangements was \$136 million (2023: \$98 million) comprising \$41 million (2023: \$10 million) reported within Derivative and other financial assets and \$95 million (2023: \$88 million) reported within Financial and other non-current assets in the consolidated balance sheet. The carrying amount of the investments approximates their fair values. As at December 31, 2024, the maximum exposure to credit losses under these arrangements, assuming that all the customers default and Syngenta is required to fulfil its second loss guarantee, was \$215 million (2023: \$226 million).

Credit risk management practices

Syngenta's Corporate Finance team, in collaboration with Business Finance leaders, proposes and coordinates credit management policies and processes including credit limit setting for customers and risk transfer objectives. At regional or country level, the responsibility of execution is delegated, within defined authority levels, to local Credit Committees (CC). The CC defines risk mitigation programs such as barter, collateral policy, payment terms, early payment rebates, and refinancing. The CC approves customer credit facilities, credit scoring and payment terms and defines and reviews collection strategies, including credit hold and release processes, treatment of critical customer cases and taking legal actions when collection efforts are insufficient to collect overdue balances.

To assign customers into specific credit risk categories, a standardized credit scoring methodology is applied to all customers generating a creditworthiness score computed using a points-based system, which takes into consideration financial and non-financial attributes. The respective credit risk category drives policy and approach relating to sales order release, collection process and credit limit.

Collaterals are an integral part of Syngenta's risk mitigation strategy. Collaterals are based on a list of locally accepted securities which may include cash, other financial instruments, barter operations or third-party credit enhancements such as guarantees or insurance, but normally excludes non-financial assets. Collaterals are validated based on the probability of and time to legal enforcement.

Receivable balances are written off only when there is no realistic prospect of their being collected, after completion of related legal actions and permanent cessation of business activity with the defaulting customer. Write-offs are subject to defined authority levels and are not used to solve small payment differences or valid commercial disputes with continuing customers.

Estimation of expected credit losses

To estimate expected credit losses, trade receivables are grouped into portfolios by credit risk category and country and a provision matrix method is used. The principal inputs when determining matrix percentages are historical records of amounts written off in previous years, amounts currently subject to insolvency proceedings and the likelihood of eventual write-offs of those amounts, the average credit period, past due information and historical experience. Assumptions are also made about forecast conditions for market credit, commodity price, currency and country risk, competition and regulation over the remaining credit period of the trade receivables outstanding at the balance sheet date. These assumptions are consistent with those used to prepare operational budgets for the following period. Rebate credits and validated collateral are deducted from outstanding receivable balances when determining the maximum exposure to credit loss to which matrix percentages are applied. Expected recoveries under credit insurance policies, which are not part of the agreement with the customer, are accounted for separately from the expected credit losses and are recognized as assets when the insurer has agreed the claim.

Expected credit losses on other receivables and amortized cost financial assets are generally estimated by assessing each receivable individually. For balances reported as other receivables and current financial assets, lifetime expected credit losses are estimated. For balances reported as non-current financial assets, 12-month expected credit losses are estimated unless the credit risk has increased significantly since the asset was first recognized, in which case lifetime credit losses are estimated. Amounts more than 90 days past due are considered to be in default for this purpose.

9. Other current assets

Other current assets at December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
Prepaid expenses	366	643
Assets held under barter agreements	108	61
Other	5	7
Assets held for sale	23	6
Combined total	502	717

Assets held for sale at December 31, 2024 and 2023 relate mainly to various sites planned for disposal under integration and site rationalization plans. During 2024 and 2023, divestment gains recognized on sale of assets held for sale were not material.

10. Inventories

Inventories at December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
Raw materials and consumables	717	956
Biological assets	44	44
Work in progress	2,416	2,900
Finished products	3,111	4,076
Total	6,288	7,976

Inventories expensed through cost of goods sold were \$9,927 million (2023: \$11,254 million).

Finished products include \$193 million (2023: \$239 million) of inventory held by customers under a sale with a right of return.

Movements in the inventory write-down provision for the years ended December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
January 1	(649)	(458)
Additions charged to income	(315)	(388)
Reversals of inventory write-downs	30	18
Amounts utilized on disposal of related inventories	276	225
Currency translation effects and other	81	(46)
December 31	(577)	(649)

Reversals of inventory write-downs arise in the normal course of business when actual outcomes are more favorable than assumptions made in prior periods about Syngenta's future ability to sell inventories that are subject to risks of degradation and obsolescence, such as germination of seeds.

Movements in biological assets for the years ended December 31, 2024 and 2023 are as follows.

_(\$m)	2024	2023
January 1	44	43
Changes in fair value	136	133
Sales and harvest	(135)	(132)
Currency translation effects and other	(1)	-
December 31	44	44
Of which: carried at fair value less costs to sell	44	44

Syngenta's inputs for measuring the fair value of those assets that are carried at fair value less costs to sell include both market data from actual sales and inputs based on the stage of growth of immature assets, which is not observable in the market. The fair values therefore represent a level 3 measurement in the fair value hierarchy as defined by IFRS 13. Their sensitivity to changes in the unobservable inputs is not material to the consolidated financial statements.

Quantities of biological assets in inventories at December 31, 2024 and 2023 are:

	2024	2023
(Millions of plants)		
Plants	58	53
Cuttings	573	633

11. Property, plant and equipment

Movements in property, plant and equipment for the year ended December 31, 2024 are as follows:

			Machinery and	Assets under	
2024 (\$m)	Land	Buildings	equipment	construction	Total
Cost

December 31	(277)	(3,118)	(105)	(43)	(562)	(502)	(521)	(5,128)
Net book value – December 31	2,438	604	107	6	169	2,924	398	6,646

Additions in 2024 and 2023 include intangible assets arising from license agreements involving non-monetary exchanges or where the cash flows related to the acquisition of the asset are payable over several years. Cash paid to acquire and develop intangible assets was \$741 million (2023: \$760 million).

Included in Capitalized development costs is an amount of \$81 million (2023: \$60 million) that represents borrowing costs capitalized during the year using a capitalization rate of 4.0 percent (2023: 3.6 percent). Also included in Capitalized development costs is an amount of \$45 million (2023: \$43 million) that represents depreciation that has been capitalized as it has been incurred on assets used within the development activities.

Amortization is included within Cost of goods sold, Research and development and General and administrative expenses.

Other intangibles consist principally of values assigned to supply contracts, production know-how and customer relationships acquired in business combinations.

Movements in intangible assets for the year ended December 31, 2023 were as follows:

		Product				Capitalized development	Other	
2023 (\$m)	Goodwill	rights	Trademarks	Patents	Software	costs	intangibles	Total
Cost								
January 1	2,723	3,837	217	45	666	1,888	867	10,243

December 31	(271)	(3,230)	(104)	(40)	(586)	(213)	(498)	(4,942)
Net book value – December 31	2,571	793	151	10	166	2,716	385	6,792

The net book value at December 31, 2024 and 2023 of goodwill is allocated to Syngenta's operating segments and other CGUs as summarized below:

_(\$m)	2024	2023
Allocated to operating segments:		
Crop Core	1,278	1,313
Professional Solutions	38	40
Field Crops	21	21
Vegetables	98	103
Flowers	-	13
Total allocated to operating segments	1,435	1,490
Allocated to other individual CGUs:		
North America Corn and Soybean seed	316	316
Corn and Soybean seed rest of world	408	467
Other, not individually significant	279	298
Total allocated to other individual CGUs	1,003	1,081
Total goodwill	2,438	2,571

The total amount of goodwill attributable to the Field Crops operating segment is \$891 million (2023: \$955 million), consisting of \$21 million (2023: \$21 million) allocated at the operating segment level and a further \$870 million (2023: \$934 million) allocated to other individual CGUs that form part of the overall operating segment as follows: Corn and Soybean seed rest of world \$408 million (2023: \$467 million), North America Corn and Soybean seed \$316 million (2023: \$316 million) and \$146 million (2023: \$151 million) allocated to Other, not individually significant CGUs.

The total amount of goodwill attributable to the Crop Core operating segment is \$1,411 million (2023: \$1,460 million), consisting of \$1,278 million (2023: \$1,313 million) allocated at the operating segment level and a further \$133 million (2023: \$147 million) allocated to Other, not individually significant CGUs that form part of the overall operating segment.

13. Financial and other non-current assets

Financial and other non-current assets at December 31, 2024 and 2023, are as follows:

_(\$m)	2024	2023
Equity securities at fair value through OCI	162	182
Precious metal catalysts	38	44
Royalties receivable	66	92
Long-term marketable securities	218	91
Other non-current receivables	118	118
Post-employment benefit assets (Note 21)	588	349
Long-term derivative financial assets (Note 25)	40	22
Total financial and other non-current assets	1,230	898

14. Associates, joint ventures and transactions and agreements with related parties

Associates and joint ventures

Investments in associates and joint ventures at December 31, 2024 are \$156 million (2023: \$220 million).

None of Syngenta's investments in associates and joint ventures are publicly quoted. At December 31, 2024, these investments consist mainly of \$140 million (2023: \$144 million) for a 50 percent ownership of the associate CIMO Compagnie Industrielle de Monthey SA, Switzerland (CIMO), which provides utility services to Syngenta and other occupants of the Monthey manufacturing site.

During 2024, Syngenta's share of CIMO's net actuarial gains recognized in OCI is \$8 million (2023: \$7 million). Other effects on Syngenta's consolidated income statement for the periods presented, or any financial statement line items of the above associates and joint ventures themselves, are not material.

On December 23, 2024, Syngenta disposed of its 40 percent ownership interest in MAS Seeds SA (MAS) which produces and sells seeds, with Syngenta being one of MAS's customers, for a cash consideration of \$19 million equivalent to the carrying amount of the investment at the disposal date. Prior to the disposal, an impairment of \$7 million was recognized in Other general and administrative (See Note 6). The \$19 million cash inflow is included in Proceeds from disposals of intangible and financial assets, in the consolidated cash flow statement.

As reported in Note 3, on December 24, 2024, Syngenta acquired the remaining 60 percent ownership interest in its former associate Intrinsyx Bio Inc., a US based research and development company involved in the development of biological products.

Transactions between Syngenta and its associates and joint ventures during the year ended December 31, 2024 are as follows:

- Goods and services provided by Syngenta to its associates and joint ventures \$16 million (2023: \$18 million)
- Goods and services provided by associates and joint ventures to Syngenta \$128 million (2023: \$158 million)

At December 31, 2024, Syngenta has trade and other accounts receivable from associates and joint ventures of \$2 million (2023: \$11 million) and accounts payable and other current liabilities to associates and joint ventures of \$26 million (2023: \$24 million).

A bank overdraft guarantee of \$23 million (2023: \$21 million) has been provided to an associate.

On January 1, 2012, Syngenta agreed to advance CHF 3 million to CIMO over a 26-year term to help finance the construction of a container and handling area for use in the utility services provided to Syngenta. At December 31, 2024, the balance outstanding was \$2 million (2023: \$2 million).

Syngenta Group

The Syngenta AG group is part of the Syngenta Group, a global leader in agricultural science and innovation, with parent company Syngenta Group Co. Ltd. The entity, which is domiciled in China, but operationally headquartered in Switzerland, encompasses four business units: Syngenta Crop Protection, based in Basel, Switzerland; Syngenta Seeds, based in Chicago, USA; Adama, based in Airport City, Israel; and Syngenta Group China, based in Shanghai, China. Transactions between the Syngenta AG group and fellow subsidiaries, associates and joint ventures of Syngenta Group, during the year ended December 31, 2024 are as follows:

- As described in Note 3, during December 2024, Syngenta completed the sale of certain of its subsidiaries based in China to Syngenta Group Co. Ltd, the parent company of Syngenta Group, for a consideration of \$225 million
- Goods and services provided to fellow subsidiaries, associates and joint ventures of Syngenta Group \$908 million (2023: \$790 million).
 This amount includes \$502 million (2023: \$307 million) of revenue generated under a repurchase arrangement with a fellow subsidiary of the Syngenta Group, which is eliminated in these consolidated financial statements. Under this arrangement, raw materials and active ingredients are supplied to the fellow subsidiary and manufactured goods are repurchased for further sale
- Goods and services provided by fellow subsidiaries, associates and joint ventures of Syngenta Group \$1,361 million (2023: \$976 million)

At December 31, 2024, the Syngenta AG group has trade and other accounts receivable from fellow subsidiaries of Syngenta Group of \$628 million (2023: \$386 million) and accounts payable and other current liabilities to fellow subsidiaries of Syngenta Group of \$218 million (2023: \$166 million).

The following borrowings were raised from fellow subsidiaries of the Syngenta Group:

- In October 2024, a CNY 10 million loan from a fellow subsidiary of the Syngenta Group with a 2.55 percent interest rate and a term of one year
- In October 2024, a CNY 3,790 million loan from a fellow subsidiary of the Syngenta Group with a 2.55 percent interest rate and a term of three years
- In October 2023, a CNY 5,000 million loan from a fellow subsidiary of the Syngenta Group with a 2.85 percent interest rate and a term of three years
- In March 2023, a CNY 3,500 million loan from a fellow subsidiary of the Syngenta Group with a floating interest rate based on China Loan Prime Rate (LPR) and a term of three years
- In October 2022, a \$500 million loan from a fellow subsidiary of Syngenta Group with a 5.05 percent interest rate and a term of three
 years and six months
- In July 2022, a \$360 million loan with a floating interest rate based on SOFR and a term of three years and in September 2022, the loan
 was increased by a further \$140 million

During 2021, a Syngenta AG subsidiary entered into a revolving credit facility of up to \$1.5 billion with a fellow subsidiary of the Syngenta Group and in March 2023, the facility was increased to \$5 billion. \$3,700 million was drawn down during the year (2023: \$2,450 million). As at December 31, 2024, Syngenta's drawings under the facility were \$1,000 million (2023: \$2,950 million). As at December 31, 2024, Syngenta AG subsidiaries had other short term borrowings from subsidiaries of the Syngenta Group of \$26 million (2023: \$96 million).

In total, as at December 31, 2024, borrowings from fellow subsidiaries of the Syngenta Group were \$3.7 billion, including CNY 16.1 billion at December 31, 2024 exchange rates (2023: \$5.8 billion, including CNY 7,884 million at December 31, 2023 exchange rates).

Sinochem Holdings

Transactions between the Syngenta AG group and fellow subsidiaries, associates and joint ventures of Sinochem Holdings, its ultimate parent company, excluding those with Syngenta Group disclosed above, during the year ended December 31, 2024 are as follows:

- Goods and services provided to fellow subsidiaries, associates and joint ventures of Sinochem Holdings \$2 million (2023: \$3 million)
- Goods and services provided by fellow subsidiaries, associates and joint ventures of Sinochem Holdings \$8 million (2023: \$4 million)

At December 31, 2024, the Syngenta AG group has \$nil accounts receivable and \$1 million accounts payable with fellow subsidiaries of Sinochem Holdings (2023: \$nil accounts receivable and \$nil accounts payable).

At December 31, 2024, \$1,550 million of borrowings were from China state-owned banks, which are controlled by the same government as Sinochem Holdings. One of these state-owned banks is also a hedging counterparty (see Note 24 for a description of risk management and hedge accounting). There are no other individually or collectively significant transactions with China state-owned enterprises other than Sinochem Holdings.

Other related party transactions

Transactions and balances between Syngenta and its employee post-retirement benefit plans are disclosed in Note 21.

Key management personnel

Key management personnel are considered to be the members of the Global Leadership Team and the Board of Directors of both Syngenta AG and the Syngenta Group. The Global Leadership Team is collectively responsible for the active leadership of both Syngenta AG and the Syngenta Group under the guidance of the Syngenta Group Board of Directors. The Syngenta Group Board of Directors includes members of key management of Sinochem Holdings, the ultimate parent of Syngenta AG.

The compensation expense incurred by the Syngenta AG group is as follows for the years ended December 31, 2024 and 2023. These charges cover most members of the Global Leadership Team and those members of the Board of Directors of Syngenta AG that received compensation for their services from the Syngenta AG group. Two members of the Global Leadership Team did not render any services to Syngenta AG for which they received compensation from the Syngenta AG group. During 2024 and 2023, due to changes in the Global Leadership Team, there are transition periods where different numbers of active members have been included. As at December 31, 2024 and 2023, the Global Leadership Team had nine members.

<u>(</u> \$m)	2024	2023
Fees, salaries and other short-term benefits	17	40
Post-employment benefits	1	1
Total	18	41

Those members of the Global Leadership Team and the Syngenta AG Board of Directors that are remunerated by Syngenta AG, receive their cash compensation in Swiss francs, except one member of the Leadership Team who is partly remunerated in Chinese yuan and one member of the Leadership Team who is based in the US and is paid in US dollars. The compensation amounts presented above have been converted into US dollars using the average currency exchange rate in effect during each year reported (see Note 23).

Post-employment benefits include healthcare, disability, death in service and pension costs.

15. Trade accounts payable and contract liabilities

The contractual maturities of trade accounts payable at December 31, 2024 and 2023 are as follows:

_(\$m)	Total	0-90 days	90-180 days	More than 180 days
2024	5,654	2,892	509	2,253
2023	5,929	3,183	449	2,297

The carrying amount of trade accounts payable includes \$25 million (2023: \$25 million) that are due more than one year from the balance sheet date.

Trade accounts payable include \$380 million (2023: \$349 million) arising from reverse factoring arrangements between suppliers and financial institutions. The impact from currency translation differences was \$48 million decrease (2023: \$32 million increase) in trade accounts payable under reverse factoring arrangements. The carrying amounts of the trade accounts payables for which suppliers have already received payment from the financial institutions under the supplier financing arrangement were \$358 million. The trade accounts payable included under the supplier financing arrangements have payment due dates ranging from 60 to 220 days from the invoice date. Comparable trade accounts payable that are not part of supplier financing arrangements have payment due dates ranging from 30 to 180 days from the invoice date which is considered in line with the agricultural industry standard.

Under supplier finance arrangements, participating suppliers may elect, without Syngenta's influence, to receive early payment from the financial institutions for invoices owed and Syngenta makes a payment to the financial institutions on the original invoice due date, regardless of whether the supplier has elected to receive early payment or not. Syngenta provides no guarantees to the financial institutions and incurs no interest charges payable to the financial institutions on the payments made to suppliers. The amounts payable to the suppliers are not derecognized because the original liability is not substantially modified on entering into the arrangements and the new liability carries the characteristic of trade accounts payable. Syngenta has presented these under trade accounts payable because they represent liabilities to pay for goods and services, formally agreed with suppliers and are part of the normal operating cycle. The settlements to the financial institutions are included within operating cash flows because they continue to be part of the normal operating cycle and represent payments for the purchase of goods and services.

Included within trade accounts payable are rebates payable and provisions for sales returns. Movements in these liabilities with customers for the years ended December 31, 2024 and 2023 are as follows:

(\$m)	2024	2023
January 1	2,817	2,861
Changes in liabilities recognized in the period from:		
Products supplied in the period	3,843	3,887
Prior period estimates	(75)	(163)
Rebates settled and product returns received	(3,826)	(3,792)
Decrease due to divestments	(36)	-
Currency translation effects and other	(136)	24
December 31	2,587	2,817

Contract liabilities consist of advance payments from customers and deferred revenue, mainly from customer loyalty programs.

Movements in contract liabilities for the years ended December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
January 1	939	1,079
Additions due to acquisitions	1	3
Advance payments received from customers	2,735	3,606
Performance obligations recognized in the period	99	87
Revenue recognized in the period from:		
Amounts included in the contract liability at the beginning of the period	(910)	(1,100)
Contract liabilities applied to current period	(1,799)	(2,726)
Decrease due to divestments	(25)	-
Currency translation effects and other	(71)	(10)
December 31	969	939

At December 31, 2024, contract liabilities for customer loyalty programs are \$93 million (2023: \$120 million) and will be recognized as revenue as the promised goods and services are transferred to the customers, which is expected to occur over the next three years.

16. Current financial debt and other financial liabilities

Current financial debt and other financial liabilities at December 31, 2024 and 2023 are as follows:

<u>(</u> \$m)	2024	2023
Short-term financial debt:		
Bank and other financial debt	1,651	3,606
Receivables factored with recourse	20	28
Total short-term financial debt	1,671	3,634
Current portion of long-term financial debt:		
Unsecured bonds	732	567
Liabilities to banks and other financial institutions	502	1,000
Lease liabilities	134	127
Total current portion of long-term financial debt (Note 18)	1,368	1,694
Total current financial debt	3,039	5,328
Short-term derivative and other financial liabilities	451	649
Total	3,490	5,977

Included in Bank and other financial debt are borrowings of \$1,026 million (2023: \$3,046 million) from fellow subsidiaries of the Syngenta Group, as described in Note 14.

The contractual maturities of current financial debt at December 31, 2024 and 2023 are as follows:

_(\$m)	Total	0-90 days	90-180 days	180 days-1 year
2024	3,039	1,571	750	718
2023	5,328	3,387	1,165	776

The maturities of short-term derivatives are presented in Note 24. The maturities of other financial liabilities are as follows: \$264 million 0-90 days; \$12 million 90-180 days and \$51 million 180 days-1 year (2023: \$95 million 0-90 days; \$43 million 90-180 days and \$14 million 180 days-1 year).

Information about fair values of financial liabilities is presented in Note 25.

17. Other current liabilities

Other current liabilities at December 31, 2024 and 2023 consist of the following:

<u>(</u> \$m)	2024	2023
Accrued short-term employee benefits	451	544
Taxes other than income taxes	141	162
Social security and pension contributions	69	74
Advance payments from barter agreements	133	41
Other payables	177	239
Other accrued expenses	201	292
Total	1,172	1,352

The maturities of other current liabilities are as follows. For liabilities without a contractual maturity date, the analysis represents the estimated timing of cash outflows.

<u>(</u> \$m)	Total	0-90 days	90-180 days	180 days-1 year
2024	1,172	850	112	210
2023	1,352	904	258	190

18. Financial debt and other non-current liabilities

In April 2024, Syngenta repaid two \$500 million term loans at maturity and raised a \$1 billion floating rate loan maturing in 2027. In August 2024, Syngenta repaid a CHF 225 million bond at maturity. In October 2024, Syngenta rolled over two term loans, one for \$250 million maturing in April 2025 and one for \$300 million maturing in April 2026, into a single \$550 million loan maturing in October 2027. This transaction was non-cash. In November 2024, Syngenta repaid a CHF 250 million bond at maturity and issued a CHF 120 million bond maturing in November 2027.

In April 2023, Syngenta raised a \$300 million floating rate loan maturing in 2026 and repaid a \$1,000 million bond at maturity. In October 2023, Syngenta repaid a CHF 265 million bond at maturity.

Financial debt and other non-current liabilities at December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
\$ private placement notes	66	66
0.625% CHF bond 2024	-	269
1.625% CHF bond 2024	-	298
4.892% USD bond 2025	677	677
3.375% Eurobond 2026	942	1,005
0.700% CHF bond 2026	154	167
1.250% Eurobond 2027	520	552
1.500% CHF bond 2027	132	-
5.182% USD bond 2028	336	336
2.125% CHF bond 2029	166	179
4.375% \$ Notes 2042	20	20
5.676% USD bond 2048	153	153
Unsecured bond issues and US private placement notes	3,166	3,722
Liabilities to banks and other borrowings	4,587	4,649
Lease liabilities (Note 22)	1,368	1,191
Less: current portion of financial debt (Note 16)	(1,368)	(1,694)
Total non-current financial debt	7,753	7,868
Non-current derivative financial liabilities	243	198
Other non-current liabilities and deferred income	169	253
Total	8,165	8,319

Included in Liabilities to banks and other borrowings are borrowings of \$2,702 million (2023: \$2,738 million) from fellow subsidiaries of the Syngenta Group, as described in Note 14.

Information about fair values of financial liabilities is presented in Note 25.

Other non-current liabilities and deferred income relates to license and acquisition agreements with several counterparties and long-term incentive programs. Of the \$169 million, related cash flows of \$60 million (2023: \$134 million) are payable between one and five years, \$20 million (2023: \$32 million) of deferred income will be recognized as related licensed product sales occur and \$89 million (2023: \$87 million) of government grants will be amortized over periods between 5 and 30 years.

All non-current debt ranks equally. Covenants are monitored on a regular basis and Syngenta is in full compliance with all applicable covenants.

Syngenta AG has fully and unconditionally guaranteed on a senior unsecured basis the due and punctual payment of the principal of and any premium and interest on the debt securities issued by Syngenta Finance AG, which is a direct, wholly owned finance subsidiary, and Syngenta Finance N.V., which is an indirect, wholly owned finance subsidiary. The guarantees rank equally with all of Syngenta's other unsecured and unsubordinated debt. No other subsidiary of Syngenta guarantees such debt securities.

19. Provisions, commitments and contingencies

Provisions

Provisions at December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
Restructuring provisions	125	29
Employee benefits:		
Pensions (Note 21)	149	170
Other post-retirement benefits (Note 21)	12	20
Other long-term employee benefits	68	58
Environmental provisions	138	156
Provisions for legal and product liability settlements	90	224
Other provisions	77	97
Total	659	754

_(\$m)	2024	2023
Current portion of:		
Restructuring provisions	112	11
Employee benefits	5	9
Environmental provisions	15	12
Provisions for legal and product liability settlements	19	136
Other provisions	33	48
Total current provisions	184	216
Total non-current provisions	475	538
Total	659	754

The timing of payment in respect of non-current provisions is, with few exceptions, not contractually fixed and cannot be estimated with certainty. Key assumptions and sources of estimation uncertainty are discussed in Note 2.

At December 31, 2024, Syngenta recognized \$4 million (2023: \$4 million) in Financial and other non-current assets in respect of virtually certain reimbursements related to the above provisions. During 2023, Syngenta recognized and received as part of Other General and Administrative \$30 million of insurance reimbursement relating to product liability claims.

Syngenta has recorded provisions for environmental liabilities at some currently or formerly owned, leased and third-party sites throughout the world. These provisions are estimates of amounts payable or expected to become payable and take into consideration the number of other potentially responsible parties at each site and the identity and financial positions of such parties in light of the joint and several nature of certain of the liabilities. The material components of Syngenta's environmental provisions are based on a risk assessment involving investigation of the various sites.

It is reasonably possible that Syngenta may be required to make expenditures in excess of the established provisions to remediate environmental liabilities at some currently or formerly owned, leased and third-party sites throughout the world. Further, in cases where it is not possible to estimate reliably the remediation costs that may be incurred in the future for environmental damage that has occurred at sites currently in operation and having no present obligation for environmental damage remediation, no provisions have been made. This is because it is neither possible to determine a time limit beyond which the sites will no longer be operated, nor what remediation costs may be required upon their eventual closure.

In the USA, Syngenta and/or its indemnitors or indemnitees, have been named under federal legislation (the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended) as a potentially responsible party ("PRP") in respect of several sites. Syngenta expects to be indemnified against a proportion of the liabilities associated with a number of these sites by the sellers of the businesses associated with such sites and, where appropriate, actively participates in or monitors the clean-up activities at the sites in respect of which it is a PRP.

Provisions for legal and product liability settlements, all of which are individually immaterial, relate to various legal proceedings incidental to the normal conduct of Syngenta's business, including proceedings involving product liability claims, commercial claims, employment and wrongful termination claims, patent infringement claims, competition law claims, indirect tax assessment claims, regulatory compliance claims, waste disposal claims and tort claims relating to the release of chemicals into the environment.

Transfore

Other provisions mainly comprise provisions for long-term contractual obligations under license and other agreements.

Movements in provisions for the year ended December 31, 2024 are as follows:

(\$m)	January 1	Charged to income	Release of provisions credited to income	Payments	Actuarial (gains)/ losses	offset in defined benefit pension assets	Currency translation effects/ other	December 31
Restructuring provisions:								
Employee termination costs	15	165	-	(81)	-		(2)	97
Other third-party costs	14	45	(5)	(15)	-		(11)	28
Employee benefits:								
Pensions	170	83	(4)	(153)	18	44	(9)	149
Other post-retirement benefits	20	1	(5)	(10)	(3)	14	(5)	12
Other long-term employee benefits	58	6	(3)	(7)	-	-	14	68
Environmental provisions	156	7	(1)	(18)	-	-	(6)	138
Provisions for legal and product liability settlements	224	17	(26)	(119)	_	-	(6)	90
Other provisions	97	31	(25)	(12)	-	-	(14)	77
Total	754	355	(69)	(415)	15	58	(39)	659

Within restructuring provisions, employee termination costs include severance, pension and other costs directly related to affected employees and other third-party costs principally include payments for early termination of contracts with third parties related to redundant activities. Other movements include provisions acquired through the business combinations and provisions disposed due to the divestment described in Note 3.

Commitments

Commitments for the purchase of property, plant and equipment and intangible assets at December 31, 2024 are \$153 million (2023: \$171 million).

At December 31, 2024 and 2023, Syngenta had entered into long-term commitments to purchase minimum quantities of certain raw materials, long-term research agreements with various institutions to fund various research projects, and other commitments. The estimated timing of minimum future committed payments is as follows:

	2024	2024		
<u>(</u> \$m)	Materials purchases	Other	Materials purchases	Other
Within one year	1,350	74	1,823	84
From one to two years	218	34	265	31
From two to three years	148	17	140	16
From three to four years	39	10	65	8
From four to five years	19	4	5	8
After more than five years	14	10	4	2
Total	1,788	149	2,302	149

Syngenta's sales are made subject to normal warranties, which cover product technical specifications and, in some cases, products' performance effect on grower crop yields. Certain license agreements indemnify the other party against liabilities arising from claims related to the intellectual property licensed to or by Syngenta. Leases might include a clause where Syngenta has to cover any damage or losses that its actions cause to either the lessor or lessee. Syngenta has also issued warranties to purchasers of businesses or product lines relating to events that arose before the sales. It is not possible to predict the maximum future payments possible under these or similar provisions because it is not possible to predict whether any of these contingencies will occur.

Syngenta has obtained licenses from others for the rights to sell certain products, or products containing certain technology, under agreements which require Syngenta to pay royalties based on its future sales of those products or that technology.

Contingencies

Litigation matters

Litigation is subject to many uncertainties, and the outcome of individual matters cannot be predicted with certainty. Consequently, it is reasonably possible that the final resolution of some of these matters could require Syngenta to make expenditures in excess of the established provisions that are reported above. Further, the range of amounts involved, as well as the period of time over which many of these expenditures may be made, cannot be reasonably estimated.

Syngenta maintains general liability insurance, including product liability insurance, covering claims on a worldwide basis with coverage limits and retention amounts which management believes to be adequate and appropriate in relation to Syngenta's businesses and the risks to which it is subject.

Significant recent or on-going legal proceedings are described below.

\/IPTER∆™

Beginning on September 12, 2014, several thousand lawsuits were filed against Syngenta in state and federal courts in the United States by plaintiffs seeking damages from Syngenta for commercializing its AGRISURE VIPTERA® (MIR162) and DURACADE™ corn seed in the United States without having obtained import approval from China for those products. In September 2017, plaintiffs and Syngenta reached a settlement to resolve all claims on behalf of all U.S. non-Viptera and Viptera producers as well as grain elevators and ethanol plants and the settlement is now final.

The settlement of the producer cases did not cover claims of the exporter plaintiffs such as Cargill, ADM, Louis Dreyfus, Trans Coastal Supply Company, Inc. ("Transcoastal"), The DeLong Company ("DeLong"), and Agribase International, Inc. ADM and Syngenta reached in December 2017 a settlement of the Viptera litigation that ADM had brought against Syngenta in Louisiana Court. Louis Dreyfus and Syngenta reached a settlement in May 2019. Agribase and Syngenta reached a settlement in February 2020. Transcoastal and Syngenta reached a settlement in October 2020. In August 2023, Syngenta and Cargill executed a settlement agreement regarding the Viptera litigation which Cargill had brought against Syngenta in Louisiana. As a result, Cargill's claims against Syngenta regarding its AGRISURE VIPTERA® and DURACADE™ corn seed have been dismissed. The United States District Court in Kansas remanded the DeLong lawsuit for trial to the United States District Court for the Western District of Wisconsin. In April 2024, DeLong and Syngenta executed a settlement agreement. Payment was made on May 21, 2024 and the lawsuit was dismissed. The agreement expressly stated that the settlement was not an admission of liability and was strictly a business decision. The DeLong settlement concluded all remaining Viptera litigation in the U.S.

In December 2015, a claim was filed in Ontario, Canada by a proposed representative plaintiff on behalf of a putative class comprising all farmers in Canada against Syngenta Canada Inc. and Syngenta AG seeking damages from Syngenta for commercializing its AGRISURE VIPTERA® (MIR162) and DURACADE™ corn seed in the North American corn market without having obtained import approval from China for those products. The causes of action referred to in the lawsuit include negligence and negligent misrepresentations. The allegations include claims that Syngenta actively misled farmers about the importance of the Chinese market, the timing and substance of the application for approval in China, its ability to channel VIPTERA™ corn into non-Chinese markets and its ability to contain the infiltration of VIPTERA™ corn to the North American corn supply. The proposed representative plaintiff is seeking on behalf of the putative class general and special damages of 300 million Canadian dollars (\$209 million at December 31, 2024, exchange rates), punitive and aggravated damages of 100 million Canadian dollars (\$70 million at December 31, 2024, exchange rates), the costs of distributing all monies awarded to class members, pre-judgment interest, and costs on a substantial indemnity basis. Syngenta's motion to strike this action was argued in April 2018, and on November 28, 2018, the judge dismissed the plaintiffs action in its entirety. The plaintiff appealed this decision. The appeal was heard in June

2019 and while the Court of Appeal denied plaintiff's appeal of the lower court's decision dismissing the claim as to the negligent misrepresentation and Competition Act claims, it granted the appeal as to the premature commercialization claim which would allow the lawsuit to continue as to that claim alone. Syngenta filed the documents necessary to seek leave to appeal the Court of Appeal's decision to the Supreme Court of Canada. On December 10, 2020, Syngenta's application for leave to appeal to the Supreme Court of Canada was denied. The parties proceeded to the certification stage of the proceeding. The motion for certification was heard on May 10-12, 2021. On September 29, 2021, the Superior Court certified the lawsuit. The certification decision was procedural and made no determination on the merits of the case. On January 15, 2024, the parties argued Syngenta's motion for summary judgment. That motion was denied on October 28, 2024 and Syngenta has filed a motion for leave to appeal. Syngenta is awaiting the court's decision.

On February 14, 2017, a similar action was filed in Quebec against Syngenta Canada Inc. and Syngenta AG. The Petitioners are seeking essentially the same relief as in the Ontario action on behalf of all corn producers conducting business in Quebec who sold corn for commercial purposes after November 18, 2013. They allege that Syngenta was negligent and engaged in illegal commercial practices, contrary to the Competition Act and the Civil Code of Quebec, and that damages (amount unspecified) will continue to accrue until the corn business between North America and China is re-established at the levels that existed before Syngenta's negligence occurred. Punitive damages, pre-judgment interest and costs are also claimed. Syngenta has entered an appearance in the action. No other steps have been taken.

Syngenta is continuing to vigorously defend against the Canadian actions and strongly believes that they are without merit.

Canada beekeeper lawsuits

In September 2014, a claim was filed in Ontario, Canada by two proposed representative members on behalf of a putative class comprising all beekeepers who have owned or continue to own and operate honey producing, pollinating, and/or queen bee rearing businesses in Canada since January 1, 2006, against a number of Syngenta legal entities together with certain entities of a second manufacturer of neonicotinoid insecticides. Plaintiffs allege negligence through the sale by that manufacturer and by Syngenta of products containing such insecticides in the knowledge that they would be injurious to bees and by virtue of misrepresentations and concealment relating thereto. Plaintiffs claim 400 million Canadian dollars (\$278 million at December 31, 2024, exchange rates) general and 50 million Canadian dollars (\$35 million at December 31, 2024, exchange rates) punitive damages. The pleadings in the Ontario proceedings were subsequently amended by plaintiffs' counsel to add waiver of tort and unlawful conspiracy to the single cause of action, negligence, which was previously pleaded. Both of the additional causes of action are ancillary to and largely dependent on the negligence claim. The class has not yet been authorized.

In October 2014, a Motion for Authorization was filed by the same firm of plaintiffs' counsel in Montréal, Quebec seeking permission to bring a similar class proceeding in that province. The proposed representative plaintiff operates a family business specialized in the breeding of queen bees. The Quebec litigation closely resembles the original Ontario lawsuit claiming negligence except that, rather than a nationwide class, it alleges a class limited to Quebec. At this early stage, damages are unspecified. The Motion for Authorization was argued in November 2017. The Quebec class has been authorized on August 20, 2018, and notices have been sent to potential class members. Plaintiffs' motion to add Syngenta AG as a defendant has been granted.

Syngenta will defend these lawsuits, the claims in which are without foundation.

Paraquat Parkinson's disease litigation

Since September 2017, approximately 9,100 lawsuits, including more than 1,600 lawsuits that have been voluntarily dismissed or otherwise resolved, have been filed against Syngenta in state and federal courts in the United States by plaintiffs seeking damages from Syngenta arising from their use of or exposure to Syngenta's paraquat products. Plaintiffs allege that their use or exposure to Syngenta's paraquat products has caused them to develop Parkinson's disease and/or kidney disease. The cases name Syngenta AG, Syngenta Crop Protection, LLC, and Syngenta Seeds, and variously named alleged distributors of paraquat as additional defendants.

While the counts raised in each complaint differ slightly by plaintiff and jurisdiction, they tend to include: (1) Strict Liability - Design Defect; (2) Strict Liability - Failure to Warn; (3) Negligence; (4) Public Nuisance; (5) Violation of Consumer Fraud & Deceptive Business Practices Acts; (6) Breach of Implied Warranty of Merchantability; and (7) Punitive Damages. Certain suits also include claims by the spouses of individuals with Parkinson's disease for Loss of Consortium. The pending state court cases are in California, Delaware, Illinois, Pennsylvania, Washington, and West Virginia. The pending federal court cases were filed in various U.S. District Courts, though the majority of new cases are being filed directly in the Southern District of Illinois as part of the pending Multi-District Litigation.

Multi-District Litigation (MDL). On June 7, 2021, the Judicial Panel on Multi-District Litigation determined that consolidation is appropriate and that the pending actions would be transferred to the Southern District of Illinois for pretrial purposes. The first Case Management Order, issued June 10, 2021, stayed all responsive pleading and related deadlines for the coordinated cases. The Court has also appointed a Special Master to oversee discovery.

On February 14, 2022, the Court granted the defendants' motions to dismiss as to all public nuisance claims and certain state consumer protection claims and denied the motions to dismiss as to the other causes of action without prejudice. On April 13, 2022, Syngenta submitted answers in sixteen potential bellwether cases identified by the Court. On the same date, the Court selected six of those bellwether plaintiffs for further case-specific discovery; that discovery has been completed. On August 17, 2022, the Court selected twenty additional plaintiffs and ordered limited discovery and depositions in each of those cases to collect representative data and evaluate claims. On August 30, 2022, the Court granted motions to remand for six cases that were originally filed in Delaware state court and removed to the MDL- additional remand orders have been issued in other state court proceedings since that date. On July 28, 2023, the parties completed summary judgment and Daubert briefing, and a hearing on those motions was held from August 21-24, 2023. At the conclusion of the hearing, the MDL court canceled the trial scheduled to begin in October 2023. On January 22, 2024, the Court ordered additional limited discovery of 25 plaintiffs. Since that order, the Court has ordered discovery of additional replacement plaintiffs in response to dismissals filed by some of the plaintiffs selected in the January 22, 2024, and dismissals filed by replacement plaintiffs.

On April 17, 2024, the MDL court granted Defendants' Motion to Exclude the expert testimony of the sole expert on the critical issue of general causation that had been presented by the Plaintiffs in the four initial bellwether cases selected for trial. On the same date, the MDL court also granted Defendants' Joint Motion for Summary Judgment dismissing those four cases due to the Plaintiffs' inability to establish a causal link between occupational paraquat exposure and Parkinson's disease without the proffered expert testimony. Plaintiffs have since filed a notice of appeal of these dismissals to the 7th Circuit Court of Appeals; briefing was completed on October 16, 2024 and oral argument was held on

February 12, 2025 and a decision is expected in the coming months. Also on April 17, 2024, the MDL court ordered the parties to select 16 member cases from the global Plaintiff pool for limited fact discovery, following which the court will issue a Case Management Order addressing discovery and trial dates. On August 6, 2024, the MDL court selected 10 additional bellwether plaintiffs for case-specific discovery but no trial dates have been set.

New cases will continue to be transferred to the MDL as tag-along actions as they are filed, and certain new cases are being filed directly into the MDL proceedings pursuant to the first Case Management Order.

Illinois State Court Claims. Two additional cases are pending in Illinois state courts, and Syngenta has filed its answers as to both following denial of its motions to dismiss. The cases are in Vermillion and St. Clair County, Illinois. Discovery is in progress in the St. Clair County suit and trial is scheduled to begin on March 16, 2026. In February 2024, an amended complaint was filed in the Vermillion County case to replace the plaintiff with the plaintiff's estate after he passed away.

California Consolidated Proceeding. Beginning in April 2019, plaintiffs in California state court filed complaints against Syngenta AG and Syngenta Crop Protection LLC and variously name Chevron USA, Inc., Growmark, Inc., and/or Wilbur-Ellis Company, LLC (or subsidiaries and/or affiliates thereof) as additional defendants. The ten California cases filed in 2019 have been consolidated for pretrial purposes. Defendants demurred to the complaints in the consolidated California cases on the grounds of federal preemption and primary jurisdiction. Defendants' demurrer was denied by order dated December 23, 2019, except as to Count IV (the California Consumer Legal Remedies Act claim), which was dismissed, and on January 21, 2020, Syngenta filed its answers in the consolidated California cases. The settlement, discussed in further detail below, covers and conditionally settles the ten California state court claims that were pending. Additional cases were filed since the consolidation. On December 7, 2021, the Court entered an order coordinating the state court proceedings with the MDL. On March 15, 2022, the Court selected four bellwether plaintiffs from among the potential selections proposed by each side. Since bellwether selection, one plaintiff has passed away, and an additional bellwether plaintiff's case was withdrawn after a medical exam concluded that they did not have Parkinson's disease. The parties completed summary judgment and Sargon briefing. On November 26, 2024, the Court granted exclusion of the plaintiffs' sole general causation expert under California law. The first state court trial was scheduled to begin on January 8, 2024, but that trial date has been adjourned. The case to be tried is still to be determined.

Additional State Court Claims. Additional complaints, which raise nearly identical claims as the previously filed cases, have been filed in state courts; certain state court proceedings have been removed to federal court and transferred to the MDL. There are currently active suits pending in state court in Delaware, Pennsylvania, Washington, and West Virginia. The Delaware cases remain in the pleading or early discovery stage and coordination efforts and responsive pleadings have been filed or are otherwise in development. On November 23, 2021, one of the pending Washington state court cases, Smith v. Syngenta AG, was dismissed with prejudice in response to Syngenta's motion to dismiss, but the dismissal was reversed on appeal. Discovery has been completed and pre-trial briefing is in progress. A trial is scheduled to begin on May 5, 2025.

On May 10, 2022, the court in Philadelphia County, Pennsylvania issued an order coordinating the pending Pennsylvania state court actions for pre-trial proceedings. On June 6, 2022, the Court issued a case management order temporarily staying all responsive pleading deadlines and dispositive motions until further order of the court. Discovery deadlines have also been stayed while additional conferences occur. On November 9, 2023, the Court entered a Case Management Order which set out a schedule for bellwether selection, discovery, and motions practice. Defendants' preliminary objections to Plaintiffs' proposed Long Form Complaint were denied with respect to Syngenta Crop Protection LLC but granted with respect to Syngenta AG on jurisdictional grounds. Discovery is complete for the first tranche of 10 bellwether cases, and the initial cases have been selected for trial. Four trials have been scheduled for 2025 and 2026, with the first trials set to begin June 2, 2025 and the second on August 4, 2025.

Additional cases have been filed in the Delaware Superior Court including some cases with multiple plaintiffs. On May 31, 2024, the Delaware court granted-in-part and denied-in-part Defendants' motion to dismiss. Specifically, the Court granted the motion to dismiss certain implied warranty claims and strict products liability claims based on the applicable statutes of limitation, statutes or repose, or preemption; certain other implied warranty and strict products liability claims were dismissed based on a failure to state a claim or otherwise meet state-specific pleading requirements, and punitive damages claims by certain plaintiffs were dismissed for failure to state a claim. The Court denied Defendants' motion as to joinder. No case schedule has been set, nor have the cases been formally consolidated.

Canadian Litigation. Lawsuits alleging that Syngenta's paraquat products have caused their Parkinson's disease have been filed by plaintiffs seeking class certification in Quebec, Ontario, and British Columbia. The Plaintiffs proceeded first in Quebec seeking to authorize a national class. Syngenta opposed the motion, and maintained that if authorized, the class should be limited to Quebec. The authorization motion was heard June 6, 2022, and a Quebec only class was authorized on July 27, 2022. In February 2023, the court granted the plaintiff's motion to discontinue the Ontario proceeding to pursue the action in British Columbia. On August 9, 2024, the British Columbia Supreme Court issued a decision authorizing a Canadian class (excluding Quebec). Syngenta is appealing the decision, in part, related to claims certified in battery and of certain evidentiary admissibility issues.

Syngenta will continue to defend all these lawsuits, the claims in which are without merit.

Federal Trade Commission and related litigation

On September 29, 2022, the Federal Trade Commission ("FTC") and ten states filed a complaint in the United States District Court for the District of North Carolina against Syngenta Crop Protection AG, Syngenta Corporation, Syngenta Crop Protection, LLC., and Corteva, Inc. alleging violations of federal and state antitrust laws. The allegations cover what the complaint asserts are "many years," and involve the distributor loyalty programs of Syngenta Crop Protection, LLC. and Corteva, Inc. and claim that the programs are used to exclude generic competition. The complaint sought to enjoin the defendants from engaging in the alleged unlawful conduct, now and in the future, regarding all crop protection products and active ingredients. The complaint further sought unspecified monetary and other equitable relief, as well as civil penalties on behalf of the state plaintiffs under their respective state laws, and costs including attorneys' fees. Additional complaints were subsequently filed in the federal courts in Indiana, North Carolina, and Mississippi by individuals against the Syngenta entities, Corteva, Inc. and other unrelated parties alleging violations of federal and state antitrust laws as well as other statutes and common law ("the Individual Lawsuits"). The allegations involved the loyalty programs which were the subject of the FTC complaint. The Individual Lawsuits seek class certification and compensatory and treble damages (as yet unspecified) as well as injunctive relief, costs, attorneys' fees and post and prejudgment interest.

On December 12, 2022, Syngenta filed a motion to dismiss the FTC complaint. Following the filing, the FTC amended its complaint in an effort to address the deficiencies pointed out in Syngenta's motion. The amended complaint also added two additional states as plaintiffs, bringing the total number of state plaintiffs to twelve. Syngenta has filed a revised motion to dismiss directed at the amended complaint. On December 30, 2022, the state of Arkansas filed a separate lawsuit in federal court in Arkansas modeled on the FTC complaint.

Plaintiffs in some of the Individual Lawsuits moved the United States Judicial Panel on Multi-District Litigation (the "JPML") to transfer and consolidate the Individual Lawsuits in the Southern District of Indiana (the "MDL Motion"). Syngenta and other defendants filed a response to the MDL Motion requesting that the JPML instead transfer all Individual Lawsuits to the Middle District of North Carolina. The JPML held a hearing on the MDL Motion on January 26, 2023. On February 6, 2023, the JPML issued an order centralizing the Individual Lawsuits in the Middle District of North Carolina. The individual plaintiffs and Syngenta agreed that briefing on Syngenta's motion to dismiss the private plaintiffs' lawsuits would wait until after a decision on the motion to dismiss the FTC lawsuit. Syngenta filed a motion to transfer the Arkansas lawsuit to the MDL. On January 17, 2024, that motion was denied.

Syngenta's motion to dismiss the FTC complaint was argued on December 2, 2023. The motion was denied on January 12, 2024. Syngenta filed its motions to dismiss the individual plaintiffs' lawsuits on March 11, 2024, and the Arkansas litigation on April 27, 2024. On January 29, 2025, the United States District Court for the District of North Carolina issued its decision regarding the individual plaintiffs' lawsuits. The court granted the motion in part and denied it in part, striking the federal damage claims and some of the state law claims. The federal claims for injunctive relief and several state law claims remain. Syngenta is awaiting a decision on the motion to dismiss the Arkansas lawsuit. Discovery on these lawsuits, including that brought by the FTC, are underway. Depositions will take place in 2025.

Syngenta believes that the allegations of these complaints are totally without merit and will continue to defend the lawsuits.

Tax matters

Significant management judgment is required to estimate the tax liabilities related to the eventual outcome of reviews and audits by tax authorities of tax returns filed by Syngenta's subsidiaries. Tax returns filed by many of Syngenta's subsidiaries during the past several years are either currently under examination by tax authorities or are open for future examination until expiry under statutes of limitation. In Syngenta's opinion, the likelihood is remote that a material amount in excess of recorded provisions will result from the resolution of any such examination or case. Syngenta is also subject to certain tax claims pending before the judiciary. See Note 2 "Uncertain tax positions" for detail regarding on-going transfer pricing disputes in Brazil. Syngenta believes it will successfully defend its position in these disputes. However, it is reasonably possible that actual outcomes and settlements may differ significantly from the estimated liabilities shown in the consolidated balance sheet for income taxes and in Note 17 for other taxes.

Contingencies summary

Given the inherent difficulties in estimating liabilities relating to post-employment benefit obligations, litigation, tax, environmental and certain other matters due to uncertainty concerning both the amount and timing of future expenditures, it is reasonably possible that additional costs may be incurred materially in excess of provisions recorded for such liabilities. Such expenditures, in excess of established provisions, could have a material effect on Syngenta's consolidated operating results and cash flows for a particular reporting period, but management does not believe they will have a materially adverse effect on Syngenta's consolidated financial position or liquidity, although there can be no assurances in this regard.

20. Notes to the consolidated cash flow statement

Non-cash and other reconciling items included in income before taxes

Non-cash and other reconciling items included in income before taxes for the years ended December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
Depreciation, amortization and impairment of:		
Property, plant and equipment (Note 11)	508	446
Right-of-use assets (Note 22)	148	133
Intangible assets (Note 12)	531	317
Financial assets	4	-
Less: depreciation and amortization capitalized (Note 12)	(45)	(43)
Deferred revenue and other gains	(29)	(7)
Gains on disposal of non-current assets	(118)	(29)
Charges in respect of pension provisions (Note 19)	79	68
Charges in respect of other provisions (Note 19)	207	123
Financial expense, net	737	1,142
Gains on hedges reported in operating income	(38)	(44)
Income from associates and joint ventures	-	(8)
Total	1,984	2,098

Change in liabilities arising from financing activities

Movements in assets and liabilities arising from financing activities for the year ended December 31, 2024 are as follows:

		Net cash flows				
		from/ (used for) financing	Changes		Currency translation	
2024 (\$m)	January 1	activities	in fair value	Other	effects	December 31
Bonds and US private placement notes						
(Note 18)	3,722	(406)	-	-	(150)	3,166
Lease liabilities (Note 18)	1,191	(156)	-	380	(47)	1,368
Other long-term debt (Note 18)	4,649	15	-	1	(78)	4,587
Short-term debt (Note 16)	3,634	(1,881)	-	(41)	(41)	1,671
Total financial debt	13,196	(2,428)	-	340	(316)	10,792
Bond hedges net liability/(asset)	138	-	101	(8)	-	231
Margin deposit liability	3	242	-	-	-	245
Margin deposit asset	(283)	105	-	-	-	(178)
Net liabilities arising from financing activities	13,054	(2,081)	101	332	(316)	11,090

Other movements include \$227 million of new leases, \$157 million of lease liabilities recognized on sale and leaseback transactions, \$25 million short-term debt acquired with Produtécnica Nordeste Comércio de Insumos Agrícolas Ltda, \$96 million debt divested (including \$4 million lease liabilities and \$92 million short-term debt) and \$26 million intragroup balances reclassified to short-term debt as part of the sale of certain China-based subsidiaries to Syngenta Group Co. Ltd., \$4 million adjustment to gross up bond issuance fees, \$5 million amortization of bond discounts and \$8 million of cash outflows on bond interest rate swaps and cross currency hedges, which are reported as operating cash flows.

Movements in assets and liabilities arising from financing activities for the year ended December 31, 2023 are as follows:

		Net cash flows from/ (used for)	Changes		Currency translation	
2023 (\$m)	January 1	financing activities	in fair value	Other	effects	December 31
Bonds and US private placement notes						
(Note 18)	4,867	(1,291)	-	7	139	3,722
Lease liabilities (Note 18)	892	(137)	-	399	37	1,191
Other long-term debt (Note 18)	3,133	1,475	-	19	22	4,649
Short-term debt (Note 16)	1,286	2,351	-	7	(10)	3,634
Total financial debt	10,178	2,398	-	432	188	13,196
Bond hedges net liability	108	-	4	26	-	138
Margin deposit liability	73	(70)	-	-	-	3
Margin deposit asset	(229)	(54)	-	-	-	(283)
Net liabilities arising from financing						
activities	10,130	2,274	4	458	188	13,054

Other movements include \$182 million of new leases, \$217 million of lease liabilities recognized on sale and leaseback transactions, \$19 million of other long-term debt and \$7 million of short-term debt acquired with Agrocerrado Produtos Ltda and Feltrin Sementes Ltda, \$4 million adjustment to gross up bond issuance fees, \$3 million amortization of bond discounts and \$26 million of cash inflows on bond interest rate swaps and cross currency hedges, which are reported as operating cash flows.

See Note 24 for a description of bond hedges and margin deposits. Bond hedges are presented in the consolidated balance sheet as follows: current assets of \$1 million (2023: \$38 million) are included within "Derivative and other financial assets", non-current assets of \$12 million (2023: \$22 million) are included within "Financial and other non-current assets", current liabilities of \$1 million (2023: \$nil) are included within "Current financial debt and other financial liabilities" and non-current liabilities of \$243 million (2023: \$198 million) are included within "Financial debt and other non-current liabilities".

Margin deposit liabilities are included within "Current financial debt and other financial liabilities", and margin deposit assets are included within "Derivative and other financial assets".

Cash flows are presented in the consolidated cash flow statement as follows:

(\$m)	2024	2023
Proceeds from increase in third-party interest-bearing debt	2,561	4,628
Repayments of third-party interest-bearing debt	(4,642)	(2,354)
Net	(2,081)	2,274

21. Post-employment benefits

Syngenta has, apart from legally required social security arrangements, numerous independent pension plans, which are either "defined contribution" plans where company contributions and resulting benefit costs are a set percentage of employees' pay or "defined benefit" plans where benefits are generally based on employees' length of service and pensionable pay. Syngenta's contributions to defined contribution plans were \$105 million for the year ended December 31, 2024 (2023: \$98 million). Approximately 27 percent of Syngenta's employees are members of defined benefit plans. All of Syngenta's major defined benefit plans are funded through legally separate trustee administered funds. The cash funding of these plans, which may from time to time involve special payments, is designed to ensure that present and future contributions should be sufficient to meet future liabilities. Syngenta's main defined benefit pension plans are in the UK, Switzerland and the USA.

UK

In accordance with its rules, Syngenta's UK Pension Fund (the UK Fund) is governed by a company (the Trustee) that is controlled by a publicly listed independent professional trustee corporation. That corporation appoints the Trustee's directors, including its own representative, Syngenta-nominated and member-nominated directors. The Trustee manages the UK Fund and appoints professional advisers independently to assist it in doing so. The UK Fund is subject to UK pensions legislation, is regulated by the UK Pensions Regulator and is exempt from most UK taxation through its registered status. The defined benefit section of the UK Fund has been closed to new members since 2002. New employees since 2002 instead joined a defined contribution pension plan also within the UK Fund. This was open to new members until August 31, 2013. After that date, new employees are eligible to join a separate defined contribution plan. The defined benefit section of the UK Fund is open to future accrual for employees who were members before 2002; however, effective January 1, 2016, pensionable pay for these employees has been frozen, as described in Note 2. At retirement date, defined benefit members have the right to take up to 25 percent of the value of their benefits as a lump sum, with the balance being paid as an annuity. Alternatively, after taking appropriate advice, members may transfer their defined benefits to a different authorized pension arrangement.

The Trustee is required by the UK Fund's rules to increase pensions in payment and accrued deferred pension rights each year by the lower of 5 percent and price inflation, as measured by the UK Retail Price Index (RPI) or Consumer Price Index (CPI), as applicable. An independent actuary is required to value the UK Fund's liabilities in accordance with UK pension regulations and certify the required contributions, both for future service and elimination of any deficit, at least every three years. Following each such valuation, employer contribution amounts must be formally agreed between Syngenta and the Trustee, subject to review by the Pensions Regulator, and remain binding until re-assessed in the following valuation. The solvency of the UK Fund, defined as its ability to pay benefits as they fall due, is guaranteed by the sponsoring subsidiary, Syngenta Ltd., and by Syngenta AG. In addition, certain benefits under the UK Fund are guaranteed by the UK Pension Protection Fund.

The Trustee agrees the investment strategy for the UK Fund's assets and implements it through an investment sub-committee (the UK Investment Committee) it appoints from among the Trustee directors. The investment objectives are to ensure the assets are appropriately diversified and liquid to generate sufficient returns to meet the benefit liability and control the long-term costs of the UK Fund. These objectives are achieved through appointing and monitoring a number of third-party investment managers, each with specific investment managers that collectively cover a wide range of investment classes and geographical markets and utilize both asset liability matching and return seeking strategies. Asset liability matching is attained through a liability driven investment ("LDI") strategy achieved both through underlying investment class selection (e.g. fixed interest) and through using derivatives to limit the potential impact of changes in interest rates, price inflation and foreign currency exchange rates on the benefits payable by and assets of the UK Fund. The UK Fund recognizes that the use of derivatives introduces collateral risk, but this is tightly monitored and controlled, and the UK Fund has access to other liquid assets should additional collateral be required by the LDI manager. The Trustee continues to reshape the investment portfolio reducing the overall investment risk and hence expected return. This is in line with the funding agreement between the Trustee and Syngenta Limited. As a result, the Trustee has invested certain of the plan's assets to purchase insurance policies with UK local insurers to cover around 14 percent of Syngenta's UK pension liabilities. The insurers pay the Trustee an income flow to match a defined set of benefit payments.

Switzerland

The Swiss federal law on occupational old age, disability and survivors' pensions ("BVG") sets minimum standards for occupational pension plans, which Syngenta's Swiss pension fund (the Swiss Fund) exceeds. All employees having had an employment contract for more than three months with any of Syngenta's Swiss subsidiaries or with its CIMO associate entity (see Note 14) and whose age and income exceed the minimum stipulated by BVG are automatically insured in the Swiss Fund. The benefits payable on retirement are calculated according to the capital sums that each member accumulates through transfer of benefits from previous employments, employer and employee contributions during service with Syngenta or with CIMO, interest and member voluntary contributions. Disability and survivors' death in service benefits are defined on the basis of the member's insured remuneration. Leavers before retirement are required to transfer their accumulated retirement and capital savings to the occupational pension plan of their new employment. The Swiss Fund is governed by a twelve-member Board of Trustees. Six members, including the President, are nominated by Syngenta (five members) and CIMO (one member), and six are elected by insured plan members from among the employees. Its decisions regarding certain items, including rates of retirement credits for service and interest credits, conversion rates on retirement and plan asset investment strategy require a two-thirds majority vote. Legal conformity of the Swiss Fund's regulations is verified by the Swiss Pension Inspectorate. Syngenta's legal obligations, including required employer contributions, are defined in the pension fund rules which are agreed by the Board of Trustees.

Employer and employee contributions are payable according to an age-related scale of percentages of pay. Under BVG, the Swiss Fund guarantees the vested benefit amount as confirmed annually to members. Interest may be added to member balances at the discretion of the Board of Trustees. Members have the right to take their retirement benefit as a lump sum, an annuity or part as a lump sum with the balance converted to a fixed annuity at the rates defined in the Fund's rules. The Board of Trustees may increase the annuity at their discretion subject to the Swiss Fund's funded status including sufficient free funds as determined according to Swiss statutory valuation rules. Syngenta accounts for the Swiss Fund as a defined benefit pension plan.

An actuarial balance sheet is usually drawn up annually by the Swiss Fund's actuary. If the balance sheet reveals a deficit, the Board of Trustees defines appropriate measures to eliminate the deficit. If necessary, and after consultation with the actuary, the contributions payable

by employees and by Syngenta may be increased or the benefits may be adjusted to the funds available. The Board of Trustees manages the Swiss Fund's assets in conformity with the investment policy rules laid down by Swiss law, with the objectives of achieving investment that is secure, produces an appropriate yield and meets the liquidity needs of the Swiss Fund. This is implemented through an investment subcommittee similar to the UK Investment Committee mentioned above.

USA

Syngenta's main US defined benefit pension plan (the US Plan) is a non-contributory defined benefit pension plan subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA) and the US Internal Revenue Code of 1986, as amended (Code). In addition, certain benefits under the US Plan are guaranteed by the US Pension Benefit Guaranty Corporation. The US Plan was closed to new members effective January 1, 2009. Employees joining Syngenta after that date participate in a defined contribution pension plan. The defined benefits of existing members of the US Plan were not affected by this change. The US Plan offers members the choice of taking their retirement benefits, which are generally based on their age, pay and years of service, as a full lump sum at retirement date or as a fixed annuity. In these consolidated financial statements, the benefit obligation has been valued assuming that 80 percent of current eligible members will take the lump sum option at normal retirement or other permissible commencement dates. This assumption is consistent with historical and expected future member choices.

US plan assets are held in a separate trust with State Street Bank and Trust Company as trustee and custodian. The assets must generally remain in the trust until all pension benefits are paid. An Investment Committee of Syngenta employees (the US Investment Committee), appointed by the Board of Directors of Syngenta Corporation, a wholly owned subsidiary of Syngenta AG, oversees the investment of the plan assets, either directly or through the appointment of investment managers. The US Investment Committee develops and implements an investment strategy that takes into account the liability profile of the US Plan. Asset classes are selected that include equities, fixed income and alternative assets. Interest rate derivatives may be used to hedge the interest rate risk of the US Plan. The Plan's key risks include interest rate risk that impacts the value of the liability and the fixed income assets of the US Plan, investment performance volatility, and to a lesser degree inflation and longevity risk. An actuarial valuation is required each year and is used to determine the valuation and characteristics of the liability of the US Plan.

Syngenta Corporation's funding policy is to contribute to the US Plan amounts necessary on an actuarial basis to at least satisfy the minimum funding requirements of the Code. Additional discretionary contributions above the minimum funding requirements can be made and are generally based on the annual administrative expense of the plan, along with an adjustment for any over/under funding.

Benefits under the plan were frozen effective December 31, 2018, and no participants shall accrue additional benefits after that date.

Defined benefit plan disclosures

The status of Syngenta's defined benefit plans at December 31, 2024 and 2023 using actuarial assumptions determined in accordance with IAS 19 is summarized below. The following tables provide reconciliations of benefit obligations, plan assets and funded status of the defined benefit pension plans to the amounts recognized in the consolidated balance sheet at December 31, 2024 and 2023:

<u>(</u> \$m)	2024	2023
Benefit obligations		
January 1	5,143	4,471
Current service cost	82	68
Past service cost	2	1
Employee contributions	41	41
Interest cost	144	164
Actuarial losses/(gains):		
From changes in demographic assumptions	(90)	(16)
From changes in financial assumptions	15	340
From actual experience compared to assumptions	81	26
Benefit payments	(332)	(290)
Currency translation effects and other	(241)	338
December 31	4,845	5,143
Of which arising from:		
Funded plans	4,713	5,001
Wholly unfunded plans	132	142

(\$m)	2024	2023
Plan assets at fair value		
At January 1	5,497	5,011
Actual return on plan assets	115	205
Employer contributions	154	148
Employee contributions	41	41
Benefit payments	(332)	(290)
Currency translation effects and other	(262)	382
December 31	5,213	5,497
Actual return on plan assets can be analyzed as follows: (\$m) Interest on plan assets	2024 153	2023
Interest on plan assets	153	179
Actuarial (losses)/gains	(38)	26
Total	115	205
Funded status	368	354
Effect of asset ceiling	(54)	(279)
Net accrued benefit asset	314	75
Amounts recognized in the balance sheet:		
Prepaid benefit costs (Note 13)	468	246
Accrued benefit liability	(4.5.4)	(4-4)
Accided benefit liability	(154)	(171)

All material changes in the amount shown for the asset ceiling arose from the effect of applying the ceiling at each period end. Changes in the asset ceiling amount due to interest and foreign currency translation during 2024 and 2023 were immaterial.

Of the accrued benefit liability for pensions of \$154 million at December 31, 2024, \$149 million is included in Note 19 as pension provisions and \$5 million as restructuring provisions (2023: \$170 million as pension provisions; \$1 million as restructuring provisions).

The following table shows the estimated undiscounted future defined benefit payments that are projected to occur within ten years from the balance sheet date. Actual payments may differ from those shown because of uncertain future events, including members' choice of benefit options as described above.

_(\$m)	
2025	345
2026	311
2027	311
2028	318
2029	312
Years 2030-2035	1,477
Total 2025-2035	3,074

Syngenta's estimate of employer contributions to be paid to defined benefit plans in 2025 is \$82 million. Actual payments could differ materially from this estimate if any new funding regulations or laws are enacted or due to business and market conditions, which may result in Syngenta prepaying contributions. Additional contributions, the amount and timing of which are uncertain, may also be required as Syngenta's restructuring programs are implemented.

In accordance with UK pension regulations, Syngenta has agreed with the Trustee to pay fixed contributions to meet the valuation deficit determined at each valuation date, administration costs and part of the costs of employee service. The balance of the costs of employee service is payable as a percentage of pensionable pay in each year. In 2024 and 2023, \$22 million and \$38 million of fixed contributions were paid respectively. In December 2024, Syngenta agreed revised pension funding arrangements with the Trustee as part of the 2024 triennial valuation. Under these arrangements, as long as the Fund is not in deficit on a UK statutory basis, no fixed contributions are required except for future service contributions. If the funding level falls below 99 percent before the next triennial valuation in 2027, additional contributions of \$13 million will be required to repair the deficit. This agreement will apply until December 31, 2029.

The fair values of assets and liabilities of the major defined benefit pension plans, together with aggregated data for other defined benefit plans, are as follows. Unquoted investments represent investments in pooled funds in which the underlying investments are not publicly traded in a market that provides pricing information on an ongoing basis:

¹ Includes \$72 million investment in a property fund held by the UK Fund that is suspended due to valuation uncertainties arising from remediation liabilities that are still to be quantified and the impact of the Leasehold Reform (Ground Rent Act) 2022 on future residential ground rents. The investment is held at the latest net asset value provided by the fund manager, which includes an allowance for these uncertainties.

Other assets include investments in private equity funds, diversified hedge funds, infrastructure funds, insurance funds and inflation, interest rate and foreign currency derivatives.

The following table provides an analysis of the benefit costs recorded in the consolidated income statement for the defined benefit pension plans for the years ended December 31, 2024 and 2023:

_(\$m)	2024	2023
Current service cost	82	68
Past service cost	2	1
Interest on the effect of the asset ceiling	7	14
Interest on the net defined benefit asset	(9)	(15)
Net periodic benefit cost	82	68

Amounts recognized in OCI were as follows for the years ended December 31, 2024 and 2023:

<u>(</u> \$m)	2024	2023
Actuarial losses	44	324
Effect of asset ceiling	(221)	(391)

The sensitivity of the benefit obligation to the significant actuarial assumptions is discussed in the "Critical accounting estimates" section of Note 2.

Other post-retirement benefits

Syngenta's most significant other post-retirement benefit plan is the retiree medical plan in the USA. The plan is self-insured and the principal benefit for the majority of eligible participants is a subsidy of their medical insurance premiums after retirement. The subsidy amount varies based on age and service at retirement. Retirees who are eligible for Medicare enroll in individual Medicare plans available in the open market or public exchange, and are responsible for paying the full cost of coverage in excess of the subsidy. The assumed healthcare cost trend rate for this plan at December 31, 2024 was 7.00 percent, decreasing in each successive year from 2025 onwards, to reach an ultimate rate of 5.0 percent in 2033 (December 31, 2023: 7.25 percent decreasing to 5.0 percent in 2033).

Syngenta had a net benefit asset for other post-retirement benefits at December 31, 2024 of \$120 million (2023: \$103 million) reported within Post-employment benefit asset in Note 13 and a net benefit liability of \$12 million (2023: \$20 million) reported within Other post-retirement benefits provision in Note 19. Actuarial losses recognized in OCI for the period were \$6 million (2023: \$11 million gains). Expense recognized in the consolidated income statement, contributions to the other post-retirement benefit plans and benefit payments by the plans were not material for 2024 and 2023.

22. Leases

Lease activities

Land and buildings

Syngenta leases land and buildings for use in its manufacturing, warehousing and administration activities. The terms for these leases are negotiated on an individual basis to reflect Syngenta's requirements for the underlying asset and to ensure Syngenta complies with any relevant legal regulations and range from 1 to 72 years in length, with a weighted average lease term of 19 years. Lease payments are usually agreed in advance, with some leases providing for additional payments that are based on changes in local price indices, or upon rent reviews conducted to periodically align rental payments with the prevailing market rate. Additionally, in order to allow operational flexibility some land and building leases also grant Syngenta options to extend the lease beyond its initial term or to terminate the lease early. The likelihood of exercising these options is assessed by Syngenta on a lease-by-lease basis and if the option exercise is considered to be reasonably certain it directly impacts upon the lease term used in calculating the right-of-use asset and lease liability values.

During the years ended December 31, 2024 and 2023 Syngenta entered into sale and leaseback arrangements on its land and buildings as disclosed in Note 3.

Machinery and equipment

Machinery and equipment leases relate primarily to Syngenta's car fleet, which is used by the management and sales functions. The average contract duration for fleet assets is 3 years.

Right-of-use assets

Movements in right-of-use assets for the year ended December 31, 2024 are as follows:

2024 (\$m)	Land	Buildings	Machinery and equipment	Total
Cost		2490	oqu.po	
January 1	56	668	254	978
Additions	1	186	81	268
Disposals	(8)	(51)	(54)	(113)
Currency translation effects and other	(3)	(27)	(18)	(48)
December 31	46	776	263	1,085
Accumulated depreciation and impairment losses				
January 1	(22)	(184)	(102)	(308)
Depreciation charge	(4)	(72)	(72)	(148)
Impairment losses	-	-	-	-
Disposals	7	47	53	107
Currency translation effects and other	1	7	7	15
December 31	(18)	(202)	(114)	(334)
Net book value – December 31	28	574	149	751

Movements in right-of-use assets for the year ended December 31, 2023 are as follows:

2022 (4 m)	Lond	Duildings	Machinery and	Total
2023 (\$m)	Land	Buildings	equipment	Total
Cost				
January 1	48	536	182	766
Additions	8	139	100	247
Disposals	(3)	(30)	(36)	(69)
Currency translation effects	3	23	8	34
December 31	56	668	254	978
Accumulated depreciation and impairment losses				
January 1	(16)	(150)	(70)	(236)
Depreciation charge	(9)	(56)	(69)	(134)
Impairment losses	-	-	1	1
Disposals	3	29	37	69
Currency translation effects and other	-	(7)	(1)	(8)
December 31	(22)	(184)	(102)	(308)
Net book value – December 31	34	484	152	670

Lease liability maturity

The maturities of lease liabilities as at December 31, 2024 and 2023 are as follows:

_(\$m)	2024	2023
Within one year	200	177
One to two years	169	146
Three to five years	350	311
More than five years	1,353	1,243
Total	2,072	1,877
Present value (Note 18)	1,368	1,191

As detailed in Note 26, the value of the lease liability is dependent upon a number of judgments around the duration of the lease terms applied to individual leases, together with an assessment as to whether any purchase options contained within leases are reasonably certain of being exercised. The current lease liability represents Syngenta's current assessment of these judgmental areas, with the range of hypothetical lease liabilities that Syngenta's lease portfolio could give rise to being \$1,213 million to \$2,118 million (2023: \$991 million to \$1,511 million).

Other lease disclosures

The amounts charged to the income statement in respect of leases are as follows:

<u>(</u> \$m)	2024	2023
Interest on lease liabilities	(62)	(47)
Expenses relating to variable lease payments	-	(3)
Expenses relating to short-term leases	(57)	(44)

Total cash outflows in respect of leases for the year ended December 31, 2024 are \$218 million (2023: \$186 million). The cash outflows included in the consolidated cash flow statement in respect of leases are presented net of interest paid and for the year ended December 31, 2024 amount to \$156 million (2023: \$137 million).

Syngenta accounts for short-term leases and leases of low value by applying the recognition exemptions permitted in IFRS 16 "Leases", with lease payments expensed as they are incurred.

23. Principal currency translation rates

As an international business selling in over 100 countries and having major manufacturing and research and development facilities in Switzerland, the UK, the USA, France, China and Brazil, movements in currencies impact Syngenta's business performance. The principal currencies and exchange rates against the US dollar used in preparing the consolidated financial statements were as follows.

Year end rates used for the consolidated balance sheets at December 31:

	2024 per \$	2023 per \$
Swiss franc	0.90	0.84
British pound sterling	0.80	0.79
Euro	0.96	0.90
Brazilian real	6.19	4.84
Russian ruble	111.25	89.88
Chinese yuan	7.34	7.12

Average rates during the years ended December 31, used for the consolidated income and cash flow statements:

	2024 per \$	2023 per \$
Swiss franc	0.88	0.90
British pound sterling	0.78	0.81
Euro	0.92	0.93
Brazilian real	5.39	4.99
Russian ruble	92.29	84.26
Chinese yuan	7.19	7.09

24. Risk management of financial risks

Risk management framework

The nature of Syngenta's business and its global presence exposes it to a range of financial risks. These risks include (i) market risks, which include potential unfavorable changes in foreign exchange rates, interest rates, commodity prices and other market prices (equities, credit spreads etc.), (ii) counterparty credit risk and (iii) liquidity and refinancing risk.

A financial risk management framework is in place in the form of a Treasury policy approved by the Board of Directors. This policy provides guidance over all Treasury and finance related matters, is underpinned by delegated authority guidelines and is additionally supported by detailed procedures in place across Syngenta. In accordance with its Treasury policy, Syngenta actively monitors and manages financial risk with the objectives of reducing fluctuations in reported earnings and cash flows from these risks and providing economic protection against cost increases. These objectives are achieved through (a) a monthly assessment of the impact of market risks against defined risk limits (see following section), which take into account the risk appetite of Syngenta and (b) the use of a variety of derivative and non-derivative financial instruments.

Financial instruments available for use to mitigate these risks are selected by Syngenta according to the nature of the underlying risk. These instruments are designed to economically hedge underlying risks arising from operational activities and from funding and investment positions. Syngenta does not enter into speculative financial transactions.

The fair values and the volumes of the derivatives (including the time periods being hedged) used to manage financial market risks at December 31, 2024 and 2023 are below, classified by accounting treatment: CF and FV indicate derivatives where cash flow hedge and fair value hedge accounting is applied, respectively; and M2M indicates derivatives that are marked to market through profit or loss and hedge accounting is not specifically required.

- 1 The fair values of derivatives are reported in the consolidated Balance Sheet as shown in Note 25
- 2 240,802 million (2023: 758,474 million) British thermal units
- 3 Mainly 11,222,816 bushels (2023: 8,969,739 bushels) of soybean, 5,876,333 bushels (2023: 1,217,510 bushels) of corn, 72,777,314 lbs (2023: 30,720,317 lbs) of coffee and 216,945,296 lbs (2023: 35,062,618 lbs) of cotton
- 4 8,875,000 bushels (2023: 8,840,524 bushels) of soybean and 7,005,000 bushels (2023: 7,006,691 bushels) of corn

Hedge accounting is applied wherever possible. Exceptions to this are derivatives where the fair value movements of the hedges and the retranslation of the underlying exposures are largely offset in profit or loss; or derivatives placed, which do not fulfil the specific requirements of the accounting standard to achieve hedge accounting.

For those transactions that do not fulfil the specific requirements of the accounting standard to achieve hedge accounting, the gains and losses on those hedging instruments for the year ended December 31, 2024 were as follows:

- Foreign currency forward contracts that are effective economic hedges of forecast cash flows arising from anticipated sales and purchases between Syngenta affiliates and third parties. The amount recorded in profit or loss for the year ended December 31, 2024 is a gain of \$6 million (2023: loss of \$17 million).
- Commodity derivative contracts that are effective economic hedges of the anticipated purchases of raw materials or purchases principally related to corn and soybean in North America and Latin America, and the resale of various crops in barter arrangements. The amount recorded in profit or loss in respect of these derivatives for the year ended December 31, 2024 is a gain of \$15 million (2023: loss of \$19 million). The profit or loss impact from the corresponding forecasted transactions occurs when the related finished product inventories are sold, which is generally in the year following recognition of the gain or loss on the hedge.

Assessment of the impact of market risks

The impact of market risks is assessed using a variety of Value-at-Risk (VaR) and Earnings-at-Risk (EaR) methods. These are standard risk management models designed to statistically estimate with a pre-set probability the highest potential losses in value (VaR) or earnings (EaR) over a specified time period based on current and forecast positions and possible movements in market prices. These methods are adjusted to reflect the nature of the exposures and the impact of the exposures on profit or loss of the financial year. Diversification impacts between different currencies are factored into the model. VaR and EaR calculations are based on a 99 percent confidence level. The net risk and the specific methods used to assess the impact of financial risks are shown below:

Risk	Method	Exposure (financial statement item)	Time horizon (months)	December 31, 2024 Net Risk (\$m)	December 31, 2023 Net Risk (\$m)
Foreign exchange trading transaction	Welliou	Exposure (infancial statement item)	(IIIOIIIII3)	Net Nisk (\$III)	Net Nisk (VIII)
- committed and issued financial debt		Monetary asset and liability carrying			
and interest	EaR	amounts	12	26	21
Foreign exchange trading transaction					
uncommitted	EaR	Operating income	12	146	269
Foreign exchange translation	VaR	Cumulative translation adjustment in OCI	1	456	391
Interest rate risk	EaR	Interest expense	12	91	96
Commodity price risk ¹	EaR	Operating income	12	5	16

1 US soybean and corn. Other commodity related risks are immaterial for the years ended December 31, 2024 and 2023

The assessment of the impact of market risks is performed monthly and the results are compared against annually defined risk limits. In cases where the net impact is higher than a risk limit, Syngenta enters into derivative financial instrument transactions in order to stay within the risk limits approved in the treasury policy.

Syngenta cannot predict future movements in risk variables precisely, therefore calculations of the impact of market risks neither represent actual losses nor consider the effects of potential favorable movements in underlying risk variables. Accordingly, these calculations may only be an indication of future movements to the extent the historic market patterns repeat in the future.

Foreign exchange risk

Operating worldwide exposes Syngenta to foreign exchange transaction and translation risk at both the Syngenta AG group and subsidiary level.

Foreign exchange transaction risk - committed

Syngenta's individual subsidiaries predominantly transact their operational activities in their respective functional currencies. However, the globally integrated nature of Syngenta's business results in its subsidiaries bearing some amount of transactional balance sheet risk because some monetary items (including financial assets and liabilities) are denominated in foreign currencies. Such committed foreign currency exposures are largely generated by the routing of products between Syngenta's central hub and its foreign locations and by the intragroup funding activities performed by Group Treasury mainly in the respective currency of the affiliate. Following the risk management strategy, Syngenta hedges these committed exposures wherever possible and cost effective. Syngenta uses mainly foreign exchange forward contracts and foreign currency swaps to manage the risk and aligns the maturities of the derivative instruments with the cash flows of the hedged transactions. Net committed transactional currency exposures are identified and reported at least on a monthly basis by business units and monitored and managed by Group Treasury.

Foreign exchange transaction risk – issued financial debt and interest

Syngenta has a funding strategy which involves securing a diversification of funding sources in different markets and maintaining an optimal currency mix of debt. This additional foreign currency exposure arises from the debt issuances in Swiss Francs and Euros under the Euro Medium Term Note (EMTN) program and intragroup term loans with Syngenta Group (HK) Holdings Company Limited denominated in Chinese Renminbi. The risk management objective is to minimize the impact of changes in foreign exchange rates on these foreign currency denominated debt interest and principal repayments. The foreign exchange risk on the foreign currency denominated debt is managed mostly by derivative instruments, and within a portfolio of other committed transactions. Syngenta uses cross currency swaps placed mainly with the same terms as the hedged item to manage the risk and eliminate or reduce the uncertainty in the cash flows.

Foreign exchange transaction risk - uncommitted

Uncommitted transactions are expected, highly probable future transactions for which Syngenta does not yet have a contractual right or obligation (mainly sales and costs).

The US dollar represents the biggest single currency for both sales and costs. However, currency mismatches arise from Syngenta having a centralized cost base, denominated mainly in US Dollars, Euros, Chinese Renminbi and Swiss Francs, against a local selling base, denominated mainly in US dollars, Euros and various other currencies, including those in emerging markets. In addition, due to the seasonality of Syngenta's business, the sales by currency are not phased linearly throughout the year.

The risk management objective is to minimize the impact of changes in foreign exchange rates on the operating income forecasted to result from these transactions. Syngenta considers hedging this exposure unless it can reliably expect that operating income could, without significant adverse economic impact, be protected by adjusting the pricing of forecast transactions for changes in foreign exchange rates before those transactions occur. Hedging transactions are managed to minimize the potential adverse movement for the entire portfolio of the net transactional flows, rather than on an individual currency basis. To reduce the risk of the portfolio, Syngenta may enter into derivatives contracts, namely foreign exchange forward contracts and currency options, with the same or a shorter maturity than the timing of the hedged cash flows.

Foreign exchange translation risk

Translation exposure arises from the consolidation of foreign currency denominated financial statements of Syngenta's subsidiaries. This is reported as currency translation effects in OCI. Translation risk can be significant; however, Syngenta regards its equity base to be of sufficient magnitude generally to absorb the short- to medium-term impact of exchange rate movements. No management of the exposure was undertaken in 2024 or 2023.

Interest rate risk

Syngenta is exposed to fluctuations in interest rates on its borrowings (including forecasted borrowings) and excess cash. While the majority of Syngenta's borrowings have fixed interest rates, portions of Syngenta's net borrowings, including its short-term commercial paper program, drawings under the syndicated credit facility and local borrowings, are subject to changes in short-term interest rates. Syngenta monitors its interest rate exposures and analyzes the potential impact of interest rate movements on net interest expense. The risk management strategy involves ensuring an efficient fixed/floating mix of total debt within approved interest rate risk limits. The risk can be managed by the use of interest rate derivatives relating to future interest payments of financial debt liabilities. The derivative instruments are placed with the same maturity as the expected cash flows of the hedged transactions so that the timing of the cash flows of the hedged transactions effectively matches the timing of the cash flows of the derivative instrument.

Commodity price risks

Operating in the agribusiness sector, changes in certain commodity prices affect Syngenta's reported operating results and cash flows. On a limited basis, Syngenta enters into derivative transactions to hedge the exposure of its cost base to commodity prices. This activity comprises oil and natural gas hedging in the UK and USA, as well as soft commodity hedging for corn and soybean purchases by the Seeds business in the USA, Canada, Brazil and Argentina, where Syngenta contracts to purchase various seed crops from growers and hedges the cost of the purchases. In barter arrangements where Syngenta sells products in exchange for receiving a certain amount of a commodity crop, Syngenta hedges the value of the crop.

Natural gas exposure occurs in Syngenta's primary manufacturing sites and Syngenta manages the exposure by hedging the main risk component, which is the natural gas market price, contractually linked to a natural gas index price. The other risk components within the exposure are immaterial.

The main objective of managing commodity price risk is to reduce the impact of commodity price changes on operating income and to provide economic protection against future cost increases. Syngenta uses fixed price contracts and derivatives (both Over-the-Counter (OTC) and exchange traded instruments, including commodity options and futures contracts) to achieve this objective. The derivative instruments are placed with the same maturity as the expected cash flows of the hedged transactions so that the timing of the cash flows of the hedged transactions effectively matches the timing of the cash flows of the derivative instrument.

Derivatives and hedge accounting

Syngenta seeks to apply, wherever possible, hedge accounting to present its financial statements in accordance with the economic purpose of the hedging activity. Hedges for which hedge accounting is not adopted either (a) do not meet the requirements for hedge accounting treatment under IFRS or (b) when combined with the accounting for the underlying hedged items, impact the financial statements in a manner aligned with the economic purpose of the hedging activity.

Syngenta determines the economic relationship between the hedged items and the hedging instruments by reviewing the critical terms of the hedged items and the hedging instruments. Except as described below, Syngenta concludes that the risk being hedged for the hedged items and risk inherent in the hedging instruments are sufficiently aligned, there is no inherent mismatch in the hedging relationship and a 100 percent hedge ratio applies both for the actual quantities hedged and for the hedge accounting. The impact of the critical terms is also assessed using historical scenario analysis supported by statistical methods (regression analysis).

For the hedging of foreign currency risk of uncommitted forecasted trading transactions, because the foreign currency exposures are largely generated by the routing of products from Syngenta's central manufacturing sites to its foreign locations, the profit or loss impact from the corresponding transactions occurs when the related finished product inventories are sold to third parties. When entering into derivative hedging contracts, Syngenta selects maturity dates based on the forecast period for which Syngenta holds inventories of its products for each commercial market by hedged currency exposure. Limited variability in the holding period occurs mainly due to timing of the third-party sales transactions ("inventory holding period mismatch").

For the hedging of commodity price risk of soy and corn, there is variability between the index being hedged (CBOT) and the drivers of the actual exposures (local elevator prices linked to CBOT). The variability is, however, limited to individual transactions within the group of transactions in this hedging program, and a hedge ratio of 100 percent is observed for the whole group of transactions.

The following table summarizes the accounting treatment, sources of ineffectiveness and the effectiveness assessment method for the identified financial market risks:

			Effectiveness assessment		
Risk	Accounting treatment	Potential sources of ineffectiveness	Method	Frequency	
Foreign exchange risk:					
		Lower volume of hedged items;			
Trading transaction – uncommitted	CF	inventory holding period mismatch	Critical terms match	Quarterly	
Issued financial debt and interest	CF	Lower volume of hedged items	Critical terms match1	Quarterly	
Interest rate risk	CF	Lower volume of hedged items	Critical terms match	Quarterly	
Commodity price risk:					
Gas	CF	Lower volume of hedged items	Critical terms match	Semi-annually	
		Lower volume of hedged items;			
Soft commodities	CF	index mismatch	Regression analysis	Quarterly	

¹ except EUR 900 million 3.375% Eurobond where a quantitative assessment is applied

Ineffectiveness is recognized in the consolidated income statement in Other general and administrative for hedges of uncommitted foreign currency forecast transactions, in Financial expense, net for hedges of committed foreign currency monetary items, in Financial expense, net for hedges of interest rate risk and in Cost of goods sold for hedges of commodity price risk. For the years ended December 31, 2024 and 2023 none of the above potential sources of ineffectiveness, individually or collectively, resulted in material amounts of actual ineffectiveness being reported for any hedge accounting relationships.

Fair Value Hedge Accounting

At December 31, 2024 and December 31, 2023 there was no fair value hedge accounting in place.

Cash flow hedges

The gains and losses on derivative instruments recognized in and classified out of the cash flow hedge reserve during the years ended December 31, 2024 and 2023 were as follows. The amounts shown exclude related income tax effects, which are disclosed in Note 7.

		Continuing hedging relationships					Hedge accounting no longer applied

Closing balance	18	(39)	13	-	(3)	(11)	(74)	-	(74)	(85)

Amounts reclassified from the cash flow hedge reserve into profit or loss are recognized in the consolidated income statement in Other general and administrative for hedges of uncommitted foreign currency forecast transactions, in Financial expense, net for hedges of committed foreign currency monetary items and for hedges of interest rate risk and in Cost of goods sold for hedges of commodity price risk.

Credit risk

Credit risk arises from the possibility that counterparties involved in transactions with Syngenta may default on their obligation, resulting in financial losses to Syngenta. Credit risk relates both to financial assets (including derivatives, marketable securities and money market contracts) as well as to operational assets managed by Syngenta's businesses (such as trade receivables) and cash deposits. Syngenta's maximum exposure to credit risk is the carrying values of its financial assets and receivables, including derivatives with positive market values. These amounts are disclosed in Note 25. Syngenta has policies and operating guidelines in place to ensure that financial instrument transactions are only entered into with high credit quality banks and financial institutions. These include limits in respect of counterparties to ensure that there are no significant concentrations of credit risk. Syngenta continuously monitors the creditworthiness of its counterparties based on credit ratings and credit default swap data. To minimize its exposure to derivative positions, Syngenta enters into netting agreements under an International Swaps and Derivatives Association (ISDA) master agreement with its respective counterparties. In addition, for almost all derivative positions, Syngenta has entered into Credit Support Annex contracts (CSAs) under which cash is exchanged as collateral. Under these agreements, the amounts owed by each counterparty on a single day in respect of all transactions outstanding are aggregated into a single net amount that is payable by one party to the other. In defined material adverse effects, all outstanding transactions under the agreement are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions. Currently, Syngenta does not have any legally enforceable right to offset recognized amounts, because the right to offset is enforceable only on the occurrence of future events such as a default on the bank loans or other credit events. At December 31, 2024, Syngenta had no treasury or derivative transactions representing a significant concentration of credit risk. No credit losses have been incurred from investments in derivative financial instruments during the years ended December 31, 2024 and 2023.

For discussion of credit risk to trade and other accounts receivable see Note 8.

Liquidity risk and refinancing risk

Within Syngenta's risk management framework, liquidity risk is defined as the risk of being unable to raise funds to meet payment obligations when they fall due. Refinancing or funding risk is defined as the risk of being unable, on an ongoing basis, to borrow in the market to fund actual or proposed commitments. Syngenta mitigates its liquidity and refinancing risk by: maintaining a committed unsecured funding facility; ongoing discussions with its core banks to best monitor its funding capacity; simulations; and diversification of its debt portfolio.

Syngenta's liquidity risk policy is to maintain at all times sufficient liquidity reserves both at the Syngenta AG Group and subsidiary level in order to meet payment obligations as they become due and also to maintain an adequate liquidity margin. The planning and supervision of liquidity is the responsibility of the subsidiaries and Group Treasury. Liquidity requirements are forecasted on a daily basis. Syngenta operates regional or country cash pools to allow efficient use of its liquidity reserves. As disclosed in note 15, Syngenta has entered into supplier finance arrangements to manage its working capital. The finance providers are high credit quality banks and Syngenta has no significant concentration of liquidity risk with these finance providers.

Short-term liquidity

Two of Syngenta's larger markets are Europe and North America. Both sales and operating profit in these two regions are seasonal and are weighted towards the first half of the calendar year, reflecting the northern hemisphere planting and growing cycle. Latin America is the largest market for Syngenta and sales and operating profit there are weighted towards the second half of the calendar year, reflecting the southern hemisphere planting and growing cycle. This seasonal operating activity results in seasonal working capital requirements.

Syngenta's principal source of liquidity consists of cash generated from operations. Syngenta makes use of trade receivable factoring across various regions and reverse factoring arrangements to manage timing of cash flows. Working capital fluctuations due to the seasonality of the business are supported by short-term funding available from a \$2.5 billion Global Commercial Paper program, a \$5 billion revolving short-term credit facility with Syngenta Group (HK) Holdings Company Limited and \$3.5 billion committed credit lines with various financial institutions.

_(\$m)		2024		2023
	Balance outstanding at	Average balance	Balance outstanding at	Average balance
	December 31, 2024	outstanding	December 31, 2023	outstanding
Global Commercial Paper program	-	99	-	493
Short-term credit facility with Syngenta Group	1,000	2,683	2,950	1,436
Committed credit lines	200	1,623	-	2,110
Total	1,200		2,950	

The maturity analyses for Syngenta's current financial liabilities other than short-term derivative liabilities are presented in Notes 16 and 17. At December 31, 2024 and 2023 the maturities of short-term derivative liabilities are as follows:

(\$m)	Total	0-90 days	90-180 days	180 days- 1 year
2024	124	86	24	14
2023	497	303	127	67

Long-term financing

Long-term capital employed is currently financed through nine unsecured bonds, two unsecured notes issued under the Note Purchase Agreement in the US Private Placement market, three term loans with financial institutions and five intragroup term loans with fellow subsidiaries of Syngenta Group. Movements in long-term capital are described in Note 18.

The following table shows Syngenta's contractually agreed (undiscounted) interest and principal repayments on long-term financing-related non-derivative financial liabilities and the related derivatives held at December 31, 2024 and 2023. Non-derivative financial liabilities are recorded at amortized cost (less related issuance costs). Derivative financial liabilities are recorded at fair value. The table therefore shows the total carrying amount of Syngenta's financial debt adjusted for the effect, if any, of applying fair value hedge accounting.

	Non-derivative financial liabilities				Derivative financial liabilities				
	(Unse	cured bonds, r	notes and term lo	ans)	(Interest rate and cross-currency swaps)				
	Fixed rate	Variable rate	Principal		Fixed rate	Variable rate			
2024 (\$m)	interest	interest	repayment	Total	interest	interest	Repayment ¹	Total

Total payments	526	293	7,721	8,540	(266)	173	(212)	(305)	
Net carrying amount				7,753				(244)	

		Non-derivative financial liabilities				Derivative financial liabilities			
	(Ur	(Unsecured bonds, notes and term loans)				(Interest rate and cross-currency swaps)			
	Fixed rate	Variable rate	Principal		Fixed rate	Variable rate			
2023 (\$m)	interest	interest	repayment	Total	interest	interest	Repayment ¹	Total	
Less than 1 year	161	141	1,567	1,869	(33)	14	-	(19)	
1-3 years	240	78	5,530	5,848	(47)	17	(165)	(195)	
3-5 years	61	-	889	950	(11)	-	(6)	(17)	
5-10 years	55	-	179	234	-	-	-	-	
More than 10 years	134	-	184	318	-	-	-	-	
Total payments	651	219	8,349	9,219	(91)	31	(171)	(231)	
Net carrying amount				8,371				198	

¹ The repayments above (and the net carrying amount of the derivative financial liabilities) do not include the amounts paid as collateral

Forecast data for liabilities that may be incurred in the future is not included in the table above. Amounts in foreign currency were translated to US dollars at the closing rate at the reporting date. Variable payments at each year end arising from financial instruments were calculated based on the forward interest rate yield curve and the spread that Syngenta pays on its outstanding debt and open derivatives at December 31, 2024 and 2023, respectively. Non-derivative financial liabilities, repayment of which can be demanded by the counterparty at any time, have been assigned to the earliest repayment period.

Capital structure

Absent major acquisitions, Syngenta targets maintaining an investment grade credit rating, as recognized by major third-party rating agencies, which it currently believes provides an optimal balance between financial flexibility and the cost of capital. At December 31, 2024, Syngenta's credit ratings were as follows: Fitch Ratings Ltd BBB/F3; Standard & Poor's Rating Services BBB/A-2; and Moody's Investors' Services Limited Baa3/P-3.

Syngenta manages capital by monitoring levels of net debt, as calculated below, against a target. Syngenta defines net debt as excluding financing-related derivatives and related collateral paid and received under CSA agreements as these balances offset each other. Capital is returned to the shareholder primarily through dividend payments.

The net debt to equity ratio was 130 percent at December 31, 2024 (150 percent at December 31, 2023).

The components of net debt at December 31, 2024 and 2023 are as follows:

(\$m)	2024	2023
Current financial debt	3,039	5,328
Non-current financial debt	7,753	7,868
Cash and cash equivalents	(1,025)	(1,639)
Marketable securities ¹	(368)	(548)
Net debt at December 31	9,399	11,009

¹ Included within 'Derivative and other financial assets' and 'Financial and other non-current assets'

The movements in net debt are as follows:

_(\$m)	2024	2023
January 1	11,009	8,588
New leases in the year	384	399
Other non-cash items	(113)	302
Cash paid under CSAs, net	(347)	124
Foreign exchange effect on net debt	(446)	483
Dividends paid	-	500
Free cash (inflow) / outflow	(1,088)	613
December 31	9,399	11,009

Syngenta defines free cash flow as cash flow from operating and investing activities, excluding investments in and proceeds from marketable securities, which are included in investing activities; excluding cash flows from and used for foreign exchange movements and settlement of related hedges on inter-company loans, which are included in operating activities; and including cash flows from acquisitions of non-controlling interests, which are included in financing activities.

25. Financial assets and liabilities

The following tables show the carrying amounts and fair values of financial assets and liabilities by category of financial instrument and reconciliation to where they are presented in the balance sheet as at December 31, 2024 and 2023. The fair value hierarchy level is shown for those financial assets and liabilities that are carried at fair value in the balance sheet.

Carrying amount

			Fair value	measurement basis) Fair value Fair value			
2024 (\$m)	cost	level 1	level 2	level 31	Total	fair value	Footnote

					-,		

¹ Consist mainly of unquoted companies whose proprietary technologies are still at the development stage. The main valuation input for these transactions is the price from their most recent shareholder financing transactions

² Carrying amount approximates the estimated fair value

³ Fair value is not required to be disclosed for non-financial assets, including defined benefit pension assets, for non-financial liabilities and for lease liabilities

⁴ Derivative financial assets and liabilities are valued through models that incorporate observable market inputs, including foreign exchange spot and forward rates, as well as yield curves

⁵ Marketable securities measured at fair value through profit and loss consist mainly of corporate bonds and mutual funds held for trading, for which the main valuation input is the observable price quotation of these instruments. For marketable securities measured at amortized cost, the carrying amount is a reasonable approximation of their fair value, except when there is observable price quotation of these instruments in which case that input is being used

⁶ Financial liabilities include exchange traded bonds, non-exchange traded private placement notes issued by Syngenta and bilateral term loans. The fair value disclosed includes level 2 fair value measurements derived from observable price quotations for the bonds and discounted cash flow models for loans, incorporating observable market data

Carrying amount

The levels of fair value hierarchy used above are defined as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

In 2024 and 2023, there were no transfers between level 1 and level 2 or into or out of level 3 of the fair value hierarchy or between the fair value and amortized cost categories.

¹ Consist mainly of unquoted companies whose proprietary technologies are still at the development stage. The main valuation input for these transactions is the price from their most recent shareholder financing transactions

² Carrying amount approximates the estimated fair value

³ Fair value is not required to be disclosed for non-financial assets, including defined benefit pension assets, for non-financial liabilities and for lease liabilities

⁴ Derivative financial assets and liabilities are valued through models that incorporate observable market inputs, including foreign exchange spot and forward rates, as well as yield curves

⁵ Marketable securities measured at fair value through profit and loss consist mainly of corporate bonds and mutual funds held for trading, for which the main valuation input is the observable price quotation of these instruments. For marketable securities measured at amortized cost, the carrying amount is a reasonable approximation of their fair value

⁶ Financial liabilities include exchange traded bonds, non-exchange traded private placement notes issued by Syngenta and bilateral term loans. The fair value disclosed includes level 2 fair value measurements derived from observable price quotations for the bonds and discounted cash flow models for loans, incorporating observable market data

Movements in equity investments measured at fair value through OCI for the years ended December 31, 2024 and 2023 were as follows:

		2024	2	2023

- 1 Financial expense, net also includes \$48 million of bank charges (2023: \$48 million) presented in Finance expense within the consolidated income statement
- 2 Interest expense includes derecognition losses on financial assets

Foreign exchange restrictions in Argentina

Beginning in September 2019, the Argentine government has imposed and continues to impose significant restrictions on foreign exchange transactions. During 2023, the restrictions tightened significantly and substantially limited the ability of Syngenta Agro S.A., a subsidiary of Syngenta AG (hereafter "Syngenta Argentina") to secure foreign currency and make payments for imports and distributions out of Argentina. As a result, Syngenta Argentina invested the Argentine pesos generated from operations into marketable securities which had a strategy designed to manage the foreign currency exposure. In the final quarter of 2023, the new Argentine government significantly devalued the peso by more than 100 percent against the US dollar, which adversely impacted the value of Syngenta Argentina's marketable securities held at fair value through profit or loss (FVTPL), resulting in a net loss of \$272 million for the year ended December 31, 2023. As at December 31, 2023, \$441 million of marketable securities were reported within Derivative and other financial assets on the balance sheet, which were subject to currency exchange restrictions as described above.

During 2024, certain restrictions on foreign exchange transactions have been eased allowing Syngenta Argentina to make payments out of Argentina for current and future imports and reducing significantly the amount of available funds to invest into marketable securities. As at December 31, 2024, the total amount of marketable securities held by Syngenta Argentina was \$215 million, comprising \$94 million reported within Derivative and other financial assets and \$121 million reported within Financial and other non-current assets.

26. New IFRSs and accounting policies

Adoption of New IFRSs

Syngenta has adopted the following new or revised IFRSs from January 1, 2024. The adoption of these IFRSs had no material impact on these consolidated financial statements:

- "Classification of Liabilities as Current or Non-current" and "Non-current Liabilities with Covenants", Amendments to IAS 1;
- "Lease Liability in Sale and Leaseback", Amendment to IFRS 16;
- "Supplier Finance Arrangements", Amendments to IAS 7 and IFRS 7;

Syngenta has assessed the potential impact of adopting "Lack of Exchangeability", Amendments to IAS 21; that will be mandatory from January 1, 2025. Based on an analysis to date, Syngenta does not believe that these amendments will have a material impact on its consolidated financial statements when adopted.

Syngenta is currently assessing the potential impacts arising from the adoption of the following amendments, which are not mandatory until after December 2025:

- "Classification and Measurement of Financial Instruments", Amendments to IFRS 9 and IFRS 7;
- "Annual improvements to IFRS Accounting Standards Volume 11";
- "Contracts Referencing Nature-dependent Electricity", Amendments to IFRS 9 and IFRS 7;
- IFRS 18 Presentation and Disclosure in Financial Statements; and
- "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture". Amendments to IFRS 10 and IAS 28.

Accounting policies

Business combinations

Syngenta accounts for business combinations in accordance with IFRS 3, using the acquisition method. For this purpose, a business is an integrated set of activities and assets that includes, as a minimum, an input and a substantive process and is capable of being conducted and managed for the purpose of providing goods or services to customers, generating investment income or other income from ordinary activities, and the fair value of which does not consist substantially exclusively of a single identifiable asset or group of similar identifiable assets. At the date it acquires control of another business, Syngenta records the fair value of the agreed consideration payable, including the estimated fair value of any contingent consideration and of any pre-existing ownership interest it holds in the acquired entity. Directly attributable acquisition transaction costs are expensed as incurred. The assets and liabilities of acquired businesses are identified and recorded in the consolidated financial statements at their acquisition date fair values, with certain exceptions as set out in IFRS 3. Acquired intangible assets are generally valued based on the income approach: the relief from royalty method is generally used for brand names, the distributor method for customer relationships, and the residual income method for product technology rights. Acquired land and buildings are valued based on the market approach and specialized plant and equipment based on the cost approach.

Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate prevailing at the balance sheet date. Non-monetary assets and liabilities denominated in foreign currencies, stated at historical cost or fair value, are translated into the functional currency at the foreign exchange rate prevailing at the date of the transaction or the date the fair value was determined, respectively. Foreign currency transactions are translated into the relevant functional currency at the exchange rate that approximates the actual exchange rate on the date of the transaction. With exceptions for Syngenta AG, Syngenta Agro S.A., and certain regional supply centers, holding and finance subsidiaries, which have the US dollar as their functional currency because their funding, receipts and payments are predominantly transacted in US dollars, each Syngenta subsidiary uses the local currency of its country of operations as its functional currency. Unrealized gains or losses related to designated cash flow hedging arrangements and gains and losses on remeasuring equity investments designated at fair value through OCI are recognized in OCI. All other resulting foreign exchange transaction gains and losses are recognized in profit or loss and presented within Financial expense, net. Foreign exchange gains and losses on marketable securities measured at fair value through profit and loss are presented net as part of fair value changes.

Income, expense and cash flows of foreign operations are translated into US dollars using average exchange rates prevailing during the period. Assets and liabilities of foreign operations are translated to US dollars using exchange rates prevailing at the balance sheet date. Foreign exchange differences arising on these translations are recognized directly in OCI. Upon disposal or loss of control of a foreign subsidiary, the cumulative currency translation difference relating to the subsidiary, is reclassified from equity to profit or loss as part of the gain or loss on disposal.

The consolidated historical cost of inventories that have been transferred between Syngenta AG group entities since their initial purchase or manufacture is measured by translating the currencies in which the costs of purchase or manufacture were incurred into US dollars at the exchange rates prevailing at the date when those costs were incurred, and foreign exchange differences arising on retranslating these amounts to US dollars at the rates at the balance sheet date or the date the inventories were sold, as applicable, are recognized in OCI.

Revenue

Syngenta's main source of revenue is product sales. Control of products passes to Syngenta's customers, and revenue for product sales is recognized, at a point in time which is usually upon shipment or delivery, subject to reasonable assurance of collectability. Syngenta has a range of payment terms which are typically short term, in line with market practice and without any significant financing component. Shipment and delivery are defined based on the terms of the sale contract. Syngenta also derives revenue from licensing the right to use its intellectual property (IP), principally its seeds germplasm and traits. Each licensing contract Syngenta enters into has unique terms and certain licensing contracts may involve significant upfront or milestone payments in addition to sales-based royalties.

Revenue is measured at the amount of consideration to which Syngenta expects to be entitled in exchange for the products or license rights it transfers to customers.

The main forms of variable revenue for Syngenta are as follows and the judgments associated with estimating their amount are discussed in Note 2:

- cash incentive programs that provide rebates and discounts dependent on achievement of targets for purchase of Syngenta products, and cash discounts for punctual or early payment of invoices. Syngenta recognizes sales minus an allowance for rebates, and a refund liability presented within Trade accounts payable in the consolidated balance sheet. The allowance and liability are measured at the amount expected to be refunded or credited to customers, estimated based on the programs' terms, market conditions and historical experience.
- sales returns, which arise both in markets where the customer has a legal or contractual right of return and in markets where customers
 do not have such rights but Syngenta's commercial practice is to accept returns. In either case, Syngenta recognizes sales minus an

allowance for expected returns, an estimated refund liability, and an asset for the right to recover its products corresponding to the expected returns. The refund liability and the asset are presented within Trade accounts payable and Inventories respectively in the consolidated balance sheet. The allowance and liability are measured at the amount expected to be refunded or credited to customers and the asset is measured at the standard purchase or production cost of the underlying Syngenta products, minus allowances for transportation and obsolescence where relevant.

in licenses which grant the right to use Syngenta's IP as it exists when the license is granted, and in which Syngenta receives revenue for non-refundable lump sums and minimum guaranteed income amounts which can be reliably estimated and for which there are no related future Syngenta performance obligations or contingencies other than the passage of time, Syngenta recognizes that revenue on signature of or on the effective date of the license, whichever is later. Revenue for lump sum milestone payments which are contingent on product regulatory approvals is recognized only when the competent regulatory authorities have granted the relevant approvals. Sales-based royalty income is recognized in the period that the licensees make sales in respect of which the royalties are payable.

In certain markets, sales terms allow customers the option of a one-time, non-repeatable extension of credit, for a defined additional period, in respect of a defined proportion of purchases made during a defined period, if the customers still have the inventories on hand upon expiration of the initial agreed credit period. Customers have no right to return these inventories, and must pay unconditionally when the additional credit period expires. In accordance with IFRS 15, revenue for these sales is recognized upon product delivery.

Syngenta periodically enters into prepayment contracts with customers whereby it receives advance payments for products to be delivered in a future period. These advance payments are recorded as liabilities and presented as part of Contract liabilities in the consolidated balance sheet. Advance payment liabilities are released and revenues associated with such advance payment transactions are recognized when control of the prepaid products passes to the customer.

For certain customers in certain markets, trade receivables are settled either with proceeds from sales by such customers of agricultural commodities or by delivery of commodities to Syngenta by such customers. For these arrangements, Syngenta recognizes revenue when it has a legally enforceable receivable, the amount of which is reliably measurable based on an agreed price for the Syngenta products. Where Syngenta has a contract with the customer for physical delivery of a commodity at a fixed price which is hedged using derivative financial instruments, an embedded derivative is recognized for the fair value of the contract until physical delivery. When Syngenta subsequently resells the commodity, it classifies additional revenue as sales only to the extent that the original contract for the sale of Syngenta products included revenue that was contingent upon the commodity sales proceeds. Any remaining gains or losses on the commodity sale are recorded in Marketing and distribution expense in the consolidated income statement.

Research and development

Research expenses are charged to the consolidated income statement when incurred. As disclosed in Note 2, internal development costs are capitalized as intangible assets only when there is an identifiable asset that can be completed and is expected to generate future economic benefits and when the cost of such an asset can be measured reliably. Costs incurred internally to develop new chemical or biological crop protection products based on active ingredients that have not yet obtained regulatory approval, or to develop new seed varieties containing genetically modified (GM) traits that have not yet obtained regulatory approval, are expensed as incurred because of the uncertainty inherent in the outcome of the regulatory approval process. Costs incurred in the design, development and testing of new or improved non-GM or deregulated GM seed varieties and hybrids, of formulations of existing registered chemical active ingredients or projects to extend the application range of existing crop protection products, or of new and improved production processes that do not themselves require regulatory approval and that can be applied to products which have already obtained approval, are capitalized if the processes are technically feasible, Syngenta intends and has sufficient resources to complete the development, the product or process will generate future economic benefits, and expenditure attributable to developing the product or process can be measured reliably. Government grants received in respect of research and development costs, including tax credits treated as government grants for accounting purposes, are recognized in profit or loss in the same periods as the costs to which they relate. Development expenses Syngenta incurs to develop technology on behalf of a third party under a collaboration agreement are capitalized and amortized over the agreement term if Syngenta expects to recover the costs under the terms in that agreement.

Costs of purchasing distribution rights, patent rights and licenses to use or sell products, or technology or registration data are capitalized as intangible assets. Costs of applying for patents for internally developed products, costs of defending existing patents and costs of challenging patents held by third parties where these are considered invalid and are expensed as incurred.

Expenses by function

Cost of goods sold includes costs of purchasing and producing inventories that have been sold to third parties, inbound and inter-site distribution expenses, impairment of inventories, environmental remediation costs associated with ongoing Syngenta manufacturing sites, and general overhead expenses of Syngenta's Production and Supply function which are expensed as incurred. Marketing and distribution includes costs of selling products, providing technical support for products sold, marketing and promotional expenses, distribution of finished products to third party customers, and impairment of trade and other receivables. Research and development includes the expenses of Syngenta's research sites and third party research collaboration agreements, expenses incurred during the regulatory process for Syngenta products and the costs of Syngenta's global field trials organization. Other general and administrative includes expenses of general management, finance, human resources, information systems, legal affairs and taxes, corporate affairs and communications, business planning and corporate development functions. Services provided by these departments to the Production and Supply, Marketing and Distribution and Research and Development functions are allocated to and included within those other functions. Gains and losses arising on routine asset disposals and gains and losses reclassified from OCI when hedged forecast foreign currency trading transactions affect profit or loss are also reported within Other general and administrative. Impairment of property, plant and equipment that results from restructuring plans, rather than ongoing activities of the functions responsible for the assets, is included in Other general and administrative. Impairment of goodwill and intangible assets is also included in Other general and administrative unless a specific function is accountable for the impairment loss. Non-current asset depreciation and amortization are charged to the functions responsible for the related assets.

Restructuring

Restructuring represents the effect on reported performance of initiating and enabling business changes that are considered major and that, in the opinion of management, will have a material effect on the nature and focus of Syngenta's operations, and therefore require separate disclosure to provide a more thorough understanding of business performance. Restructuring includes the incremental costs of closing, restructuring or relocating existing operations, and gains or losses from related asset disposals. Restructuring also includes the effects of

analyzing and preparing for potential industry consolidation transactions as well as completing and integrating significant business combinations and divestments, including related transaction costs, gains and losses. Recurring costs of normal business operations and routine asset disposal gains and losses, including those arising from sale and leaseback transactions carried out to optimize Syngenta AG group financing, are excluded.

Income taxes

Income taxes for the year comprise current and deferred taxes, calculated using rates enacted or substantively enacted at the balance sheet date. Current tax is the expected tax payable on taxable income for the year and any adjustments to tax payable in respect of previous years. Deferred tax is recognized using the liability method and thus is calculated on temporary differences between the tax bases of assets and liabilities and their respective carrying amounts in the consolidated balance sheet. Syngenta accounts for income tax credits as a reduction in income tax expense if they are receivable solely through offset against an income tax liability, and treats them as government grants for accounting purposes if they are receivable in cash if no income tax liability arises against which Syngenta is required or permitted to offset the tax credits. Deferred tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future. Deferred tax liabilities are not recognized on the initial recognition of goodwill if the carrying amount of goodwill exceeds its tax base. Deferred tax assets, including those related to unused tax losses, are recognized to the extent that it is probable that future taxable profit will be available against which the assets can be utilized. Income tax expense, current and deferred, is recognized in profit or loss unless it relates to items recognized in OCI or in equity in which case the tax expense is also recognized in OCI or equity, respectively.

Syngenta's policy is to comply fully with applicable tax regulations in all jurisdictions in which Syngenta's operations are subject to income taxes. Syngenta's estimates of current income tax expense and liabilities are calculated assuming that all tax computations filed by Syngenta's subsidiaries will be subject to review or audit by the relevant tax authorities. Syngenta and the relevant tax authorities may have different interpretations of how regulations should be applied to actual transactions. Syngenta records provisions for taxes it estimates will ultimately be payable when the reviews or audits have been completed, including allowances for any interest and penalties which may become payable. Syngenta releases these provisions when the tax audit of the applicable year is completed or an Advance Pricing Agreement (APA) settlement is reached that impacts previous years' tax payments, or otherwise when the statute of limitations for the applicable year expires, unless there is evident reason for earlier release.

Leases

IFRS 16 requires a lessee to account for all leases, unless exempt as described below, by recognizing a lease asset (right-of-use asset) for the right to use the asset underlying the lease (underlying asset) and a corresponding liability for lease payments during the lease term, defined as the non-cancellable period of the lease and any additional periods for which the lessee has an option to use or purchase the asset that it is reasonably certain to exercise. In assessing whether such periods are reasonably certain, Syngenta considers the length of the non-cancelable lease period in each lease, contractual terms and conditions relating to the optional period(s) and to exercising the option(s), recent or planned future leasehold improvements, the impact of terminating the lease on its operations and associated termination costs, and whether Syngenta is reasonably certain to continue unchanged all other significant terms in the current lease. The lease liability includes payment for an option to purchase the underlying asset if, and only if, Syngenta is reasonably certain to exercise that option.

As permitted by IFRS 16:

- Syngenta has included in the lease liability payments for services associated with leases of cars, but not with leases of other types of asset:
- Syngenta accounts for short term and low value item leases by expensing costs on a straight-line basis over the lease term, without
 recognizing right-of-use assets and liabilities. Short term leases are all leases with a term of less than one year on inception. Low value
 item leases are all leases of underlying assets worth \$5,000 or less when new and which are independent of other assets.

For all other leases, on their commencement Syngenta recognizes:

- a liability equal to the present value of payments required over the lease term for the use of the asset, excluding contingent payments, discounted at Syngenta's incremental borrowing rate (IBR). Syngenta's IBR is comprised of a reference rate based on cash and swap curves for the currency and maturity of the lease payments and a financing spread adjustment which differentiates between asset classes based on the value of the collateral offered by the nature of the underlying asset. The spread adjustment for leases of land and buildings is derived from market data for spreads on debt funded transactions to purchase commercial real estate. The spread adjustment for leases of other assets is derived from the spread on Syngenta's senior unsecured notes;
- a right-of-use asset equal to the lease liability, adjusted by lease payments made or incentives received, by initial direct costs of
 obtaining the lease and by an estimate of costs associated with obligations to decommission or restore the underlying asset or the site
 where it is located.

Where Syngenta sells an asset to a third party and then subsequently leases back the asset, the transaction is accounted for as a sale-and-leaseback transaction in accordance with IFRS 16. Syngenta applies the revenue recognition guidance in IFRS 15 to determine whether control of the underlying asset passes to the buyer-lessor, in which case Syngenta accounts for the transaction as a sale. Where the sale of the asset is considered to have satisfied the performance obligation requirements of IFRS 15, the original asset is derecognized, a lease liability is recognized for the leaseback as described in the paragraph immediately above, and the right-of-use asset arising from the subsequent leaseback is recognized at the proportion of the previous carrying amount of the asset that relates to the right of use retained. Accordingly, only part of the gain or loss on disposal of the underlying asset is recognized immediately as any gain or loss arising on the transaction relates to the rights transferred. The deferred gain is therefore recognized through reduced depreciation charges for the right-of-use asset over the lease term.

After commencement, the right-of-use asset is amortized systematically over the lease term, except where Syngenta is reasonably certain to exercise a purchase option in the lease agreement, in which case the asset is amortized over the same useful life that Syngenta would use to depreciate an item of Property, plant and equipment similar to the underlying asset, and is subject to review for impairment. The lease liability is accounted for at amortized cost using the IBR at lease commencement. The resulting interest cost is presented within Interest expense in the consolidated income statement. Lease payments which are contingent on use of the underlying asset are not included in the lease liability and are expensed as incurred.

Financial instruments

Trade and other accounts receivable

Trade and other accounts receivable include invoiced amounts less adjustments for expected credit losses. Syngenta generally holds trade receivables to collect their contractual cash flows and classifies and measures them at amortized cost.

Factoring arrangements transferring substantially all economic risks and rewards associated with accounts receivable to a third party are accounted for by derecognizing the accounts receivable upon receiving the cash proceeds of the factoring arrangement. When it is not apparent that all the risks and rewards have been substantially transferred or retained, Syngenta uses a Monte Carlo simulation model and derecognizes accounts receivable only when over 90 percent of the cash flow variability has been transferred to a third-party factor. Factoring arrangements that transfer to a third party some, but not substantially all economic risks and rewards are accounted for by continuing to recognize Syngenta's continuing rights over the receivable and by recognizing any related obligation to the third-party factor. Trade receivables derecognized under IFRS 9 were initially recognized at amortized cost under the 'held to collect' business model. This classification reflects Syngenta's intention to hold these receivables and collect the contractual cash flows.

Cash and cash equivalents

Cash includes cash on hand and demand deposits with banks and financial institutions. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value and have a maturity of three months or less at the time Syngenta acquired or first records them.

Marketable securities

Marketable securities are financial assets which are traded in liquid markets and comprise mainly investments in debt securities, debt funds and equity securities. Marketable securities that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost and subject to impairment based on their expected credit losses. Marketable securities not giving rise on specified dates to cash flows that are solely payment of principal and interest are measured at fair value through profit and loss. Marketable securities that are held for trading are presented as current assets.

Derivative and other financial instruments

Regular way purchases and sales of marketable securities are recognized at settlement date.

Financial assets and liabilities which have remaining contractual maturities of 12 months or less at the balance sheet date are presented within Total current assets and Total current liabilities, respectively. Financial assets and liabilities which have remaining contractual maturities of more than 12 months are presented within Financial and other non-current assets and Financial debt and other non-current liabilities, respectively.

Equity investments in other entities which are not subsidiaries, associates or joint ventures of Syngenta are included in Financial and other non-current assets. They are classified and measured at fair value through OCI and are revalued to fair value at each reporting date, with all changes in fair value recognized within OCI. In Syngenta's opinion, presenting gains and losses on these investments in OCI is more consistent with Syngenta's strategic investment objectives than presenting those gains and losses within profit and loss.

Other non-current receivables represent royalty and license receivables, loans to employees and other third parties, and amounts recoverable from third parties in reimbursement of environmental remediation and other costs. These receivables are stated at amortized cost, less provision for impairment where appropriate.

Financial debt is recognized initially at its fair value less transaction costs, which represents the net proceeds from issuing the debt. Subsequently, financial debt is stated at amortized cost using the effective interest method, except where subject to a fair value hedge relationship, in which case the carrying amount of the debt is adjusted by the change in the fair value of the hedged exposure during the hedge relationship.

Derivative financial instruments are recorded initially at their fair value when Syngenta becomes a party to the instrument. They are revalued to fair value at each reporting date and presented as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The fair value changes are reported through profit and loss.

Fair values of publicly traded derivatives are based on quoted market prices of the specific instruments held at the balance sheet date.

Fair values of non-publicly traded derivatives are valued using accepted economic methodologies for pricing these financial instruments, such as discounted cash flow analysis or option pricing models. The valuation models seek to make maximum use of market inputs existing at the balance sheet date. The methods used to determine the fair value of specific types of non-publicly traded derivatives are as follows:

- interest rate and cross-currency swaps are calculated as the present value of the estimated future cash flows. The future cash flows are determined using relevant market forward interest rates at the balance sheet date and are discounted using the zero-coupon rates with equivalent maturities for AA rated entities at the balance sheet date, as adjusted for the counterparty's credit risk. These discount rates incorporate the impact of net credit risk present in those derivative instruments. For cross-currency swaps, the discount rates reflect the impact of the currency basis on the future cash flows denominated in different currencies;
- forward contracts are determined using relevant market exchange rates at the balance sheet date;
- currency options are valued using the Black-Scholes-Merton option pricing model, which incorporates spot exchange rates, zero coupon
 rates with equivalent maturities for entities with credit ratings which approximate Syngenta's counterparty credit risk, and implied volatility
 in the market forward exchange rates at the balance sheet date; and
- commodity options are valued using the Black-Scholes-Merton option pricing model, which incorporates future commodity price curves
 with equivalent maturities and implied volatilities in the commodities markets at the balance sheet date, adjusted for counterparty credit
 risk.

Realized gains and losses on disposal of amortized cost financial assets, revaluation gains and losses on derivatives not designated as accounting hedges, and gains and losses corresponding to the ineffective portion of derivatives designated as accounting hedges are recorded in profit or loss as they arise.

Syngenta applies hedge accounting as follows:

Fair value hedges

The designated hedging instruments are remeasured to fair value and the underlying hedged items are remeasured by the amount of change in the fair value of the hedged risk. The resulting remeasurement gains or losses are recognized in profit or loss as they occur.

Cash flow hedges

For the effective portion of the hedge, gains and losses on remeasuring designated hedging instruments to fair value are recognized in OCI as part of the cash flow hedge reserve. If the hedged transaction results in recognition of a non-financial asset such as inventories, the cumulative hedge gain or loss is reclassified as part of the carrying amount of the related inventories. For other hedged transactions, the cumulative hedge gain or loss is reclassified from OCI into profit or loss in the period (or periods) during which the underlying hedged cash flows affect profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for cash flow hedge accounting, any cumulative unrealized gain or loss on the hedging instrument remains in equity until the underlying hedged item affects profit or loss. However, if a hedged forecasted transaction is no longer expected to occur, the cumulative unrealized gain or loss on the hedging instrument is immediately reclassified into profit or loss.

Net working capital

For the purposes of presenting consolidated cash flows, the balance sheet items included in Net working capital are Inventories, Trade receivables, Other accounts receivable, Trade accounts payable, Contract liabilities, Other current assets, Other current liabilities, and similar items due after more than one year, such as minimum royalties from multi-year license agreements.

Inventories

Purchased products are recorded at acquisition cost while own-manufactured products are recorded at manufacturing cost including a share of production overheads based on normal capacity. Cost of inventories is determined on a first-in-first-out basis. Allowances are made for inventories with a net realizable value less than cost, or which are slow moving. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and costs to sell. Costs to sell include direct marketing, selling and distribution costs. Unsaleable inventories are fully written off.

Property, plant and equipment

Property, plant and equipment are recorded at acquisition or production cost, less accumulated depreciation and any impairment losses. Eligible borrowing costs are capitalized as part of the asset cost if construction is expected to take more than one year to complete. Capitalization ceases when the asset is ready for its intended use. Depreciation is charged on a straight-line basis to the income statement, starting from the date the asset is ready for use, over the following estimated useful lives:

Buildings 20 to 40 years
Machinery and equipment 10 to 25 years
Furniture and vehicles 5 to 20 years
Computer hardware 3 to 7 years

Land is recorded at acquisition cost and is not subject to depreciation.

Expenditures made for existing property, plant and equipment that will provide future economic benefit are capitalized and depreciated over the revised remaining useful life of the asset.

Intangible assets other than goodwill

Intangible assets, other than goodwill, are recorded at cost less accumulated amortization and any impairment losses. Currently, all such intangible assets are assigned a finite estimated useful life. The cost of acquired intangible assets other than goodwill consists of the purchase price including transaction costs. The cost of internally generated intangible assets consists of direct internal and external design, development, and testing costs incurred to make the asset ready for use in the manner intended by management. Borrowing costs associated with internal projects to develop new products or software are capitalized to the extent that the costs of the project itself are capitalized and the project is expected to take more than one year from inception to complete. Capitalization ceases when the products or software are ready for their intended uses.

Intangible assets are amortized starting from the date the asset is ready for use. In respect of product rights, this is when regulatory approval has been obtained. Asset lives are reviewed annually. The straight-line method of amortization is used except where another systematic basis better reflects the pattern of consumption of the economic benefits represented by the asset. Amortization is charged within the consolidated income statement to the function responsible for the asset, or to Other general and administrative. The estimated useful lives of major classes of intangible assets are as follows:

Product rights 10 to 20 years
Trademarks and patents 5 to 20 years
Other intangibles 5 to 20 years
Software 3 to 10 years

Costs of successfully completed internal development projects which are capitalized because they meet the criteria described in Note 2 are amortized starting from launch of the related products, over periods that depend on the nature of the project, as follows:

New crop protection formulations 20 years
Extension of existing crop protection formulations 15 years
Extension of product label applications for existing crop protection products
Seed breeding costs 20 years 15 years
10 years
4 to 9 years

Goodwill

Goodwill is the excess of the fair value of consideration transferred for an acquired business over the fair value of its identifiable net assets at the acquisition date. Goodwill is recognized as an asset and presented within intangible assets. Goodwill is not amortized, but is tested annually for impairment and reduced by any impairment losses.

Impairment

Property, plant and equipment, right-of-use assets, intangible assets and investments in associates and joint ventures are tested for impairment ("tested") in accordance with IAS 36 unless classified as held-for-sale. Goodwill and intangible assets not yet ready for use are tested annually and are also reviewed at each interim and annual reporting date to determine whether conditions changed since the most recent review or annual test. Individual other non-current assets are reviewed at each reporting date to determine whether events or changes in conditions indicate that the carrying amount of each asset may not be recoverable. If any such indication exists, the asset is tested for impairment. Syngenta estimates an asset's recoverable amount as the higher of the asset's fair value less costs of disposal and its value in use, which is the present value of the cash flows expected from the asset's use and eventual disposal. An impairment loss is recorded in the consolidated income statement to the extent that the carrying amount of the tested asset exceeds its recoverable amount. Impairment losses are not reversed for goodwill, but are reversed for other assets if their recoverable amounts subsequently increase.

Provisions

A provision is recognized in the balance sheet when Syngenta has a legal or constructive obligation to a third party or parties as a result of a past event, the amount of which can be reliably estimated and it is probable that an outflow of economic benefits will be required to settle the obligation. The amount recognized as a provision is the best estimate of the expenditure required to settle the obligation at the balance sheet date. Syngenta self-insures or uses a combination of insurance and self-insurance for certain risks. Provisions for these risks are estimated in part by considering historical claims experience and other actuarial assumptions and, where necessary, counterparty risk. Provisions for remediation costs are made when there is a present obligation, and it is probable that expenditure for the remediation work will be required within ten years (or a longer period if specified by a legal obligation). Provisions arising from restructuring programs are recognized when detailed formal plans have been established and when there is a valid expectation that such plans will be carried out by either starting to implement them or announcing their main features. Provisions for legal and product settlement reflect Syngenta's best estimate of the outcome based on the facts known at the balance sheet date and includes an estimate of directly attributable legal costs.

Post-employment benefits

For defined benefit plans, plan assets are measured at fair value. The plans' holdings in publicly quoted investments are valued at closing prices at the balance sheet date. The plans' holdings in pooled investment vehicles (PIVs) that are not publicly quoted are valued at the respective investment managers' current estimate of fair value, on a basis consistent with each PIV's most recent audited financial statements. Derivative contracts entered into directly by the pension plans are included within plan assets. Exchange traded derivatives are valued at quoted balance sheet date bid prices for contracts which are assets, or offer prices for contracts which are liabilities, at the balance sheet date. Fair values of over-the-counter derivatives are measured using independent third party pricing services. Insurance policies under which the plan will receive payments that match the timing and amount of specific plan benefits and can be used only to fund those benefits are valued at the same amount as the linked benefits within the related defined benefit obligation.

Defined benefit obligations are measured at the present value of future benefit payments attributable to employee service rendered up to the balance sheet date, according to the benefit formula set out in the relevant pension plan rules and employment terms at the balance sheet date. Where a surplus of plan assets over the benefit obligation exists at the balance sheet date or would arise upon payment of the minimum funding commitment applicable to the pension plan, Syngenta evaluates the extent to which it will be able to realize the surplus over time through refund rights and reductions in the present value of its future contributions to the plan. To the extent that Syngenta cannot realize the surplus, the net defined benefit asset is reduced and, where applicable, an additional liability for minimum funding contributions is recognized. Benefit expense charged to profit or loss comprises current service cost, which is the cost to Syngenta of the increase in benefits earned from employee service in the period, gains and losses arising from amendments to and settlements of benefits that occurred during the period, and interest on the net defined benefit asset or liability, which is the change in the present value of that asset or liability arising from the passage of time during the period, measured using the rate used to discount the defined benefit obligation at the previous period end. In the consolidated income statement, current service cost is presented within the same function line as the other personnel costs of the related employees, and net interest cost is presented within Financial expense, net. The benefit obligation and cost are attributed to periods using the projected unit credit actuarial method and are measured using long-term assumptions about expected future length of employee service, increases in pay and pensions, longevity, and for healthcare plans, medical costs. Assumptions are reviewed annually. Gains and losses arising from variances between assumptions and actual outcomes, and from changes to assumptions, are recognized in OCI in the period in which they arise, and are not subsequently reclassified to profit and loss.

Contributions to defined contribution pension plans are recognized as an expense in profit or loss when they are due.

Dividends and capital distributions

Dividends payable to the shareholder of Syngenta AG are recorded as liabilities and as a reduction in shareholder's equity when they are approved by the shareholder of Syngenta AG and any conditions for payment are satisfied.

27. Subsequent events

In January 2025, Syngenta entered into a \$500 million committed credit facility agreement with a fellow subsidiary of Syngenta Group, maturing in November 2027.

On February 5, 2025, new tax legislation passed cantonal parliament in Basel Stadt where Syngenta AG is headquartered. In Switzerland, after the canton has approved a new law, Swiss citizens can initiate a referendum by collecting signatures within a specified timeframe. Substantive enactment is typically the date at which the period for collecting signatures lapses, which in this case would be the third week of March 2025, or, in the case that a referendum is held, the date of the affirmative public vote, which would likely be scheduled during May 2025. The main measures to be introduced include the introduction of a two-tier cantonal tax rate, a reduction of deductions under the patent box regime and the introduction of a subsidy regime based on innovation-linked parameters. Assuming the measures are enacted in 2025, an estimated one-off income tax expense of \$150 million from the revaluation of deferred tax positions would result.

Approval of the Consolidated Financial Statements

These consolidated financial statements were approved by the Board of Directors on March 6, 2025.

KPMG AG

Grosspeteranlage 5 PO Box 3456 CH-4002 Basel

Report of the Independent Auditor to the Board of Directors on the Audit of the Consolidated Financial Statements of Syngenta AG, Basel

Opinion

We have audited the consolidated financial statements of Syngenta AG and its subsidiaries (the Group), which comprise the consolidated balance sheet as at December 31, 2024, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated cash flow statement and the consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at December 31, 2024 and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISA) and Swiss Standards on Auditing (SA-CH). Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the Group in accordance with the requirements of the Swiss audit profession, as well as those of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors is responsible for the other information. The other information comprises the information included in the financial report, but does not include the consolidated financial statements, the stand-alone financial statements of the company and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Syngenta AG, Basel

Report of the Independent Auditor to the Board of Directors on the Consolidated Financial Statements

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' Responsibilities for the Consolidated Financial Statements

The Board of Directors is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRS, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISA and SA-CH, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our

Report of the Independent Auditor to the Board of Directors on the Consolidated Financial Statements

- conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including
 the disclosures, and whether the consolidated financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. Accounting policies

Ownership

Syngenta AG, domiciled in Basel, Switzerland, is a fully owned subsidiary of Syngenta Group (HK) Investment Company. The ultimate parent company of Syngenta AG is Sinochem Holdings Corporation Ltd.

General aspects

These financial statements were prepared according to the provisions of the Swiss Law on Accounting and Financial Reporting (32nd title of the Swiss Code of Obligations) (the "Law"). The significant accounting and valuation principles applied that are not prescribed by the Law are described below.

The accounting functional currency is US Dollar (USD) because USD is the predominant currency for the majority of the company's cash flows, which includes dividend payments made to its parent.

All references to the "Syngenta AG group" relate to Syngenta AG and its direct and indirect subsidiaries.

Exchange rate differences

Exchange rate differences recorded in the financial statements in USD:

Monetary assets and liabilities denominated in foreign currencies are translated into the reporting currency at the rate prevailing at the balance sheet date. Realized exchange gains and losses arising from business transactions denominated in foreign currencies are recorded in the income statement. Net unrealized exchange losses are recorded in the income statement; net unrealized gains, however, are deferred within accrued liabilities, unless they arise on payables and receivables or short-term accruals, where exchange differences are treated as realized valuation differences.

Exchange rate difference arising on translation of the financial statements from USD to CHF:

As of December 31, 2023, share capital, legal capital reserves, and legal retained earnings were translated at historical rates, and voluntary retained earnings and profit brought forward were translated at the closing rate. As of December 31, 2024, share capital, legal capital reserves, legal retained earnings, voluntary retained earnings and profit brought forward are translated at historical rates. This change has been implemented to align the financial statements to the financial reporting practice in Switzerland. The use of historical foreign exchange rates instead of the closing rates results in a translation difference, which is reflected as cumulative translation difference in the shareholder's equity.

The 2024 income statement is translated using the average rate of exchange of the 2024 reporting period while the 2023 income statement is translated using the average rate of exchange of the 2023 reporting period. The variation in average foreign exchange rates as compared to the closing rate of the current year results in a translation difference, which is also reflected as cumulative translation difference in shareholder's equity. The following exchange rates (USD/CHF) have been applied for the translation of the financial statements:

	2024	2023
Closing rates as per 31.12.	0.91	0.85
Average rates for the year	0.89	0.91

Investments in subsidiaries

Investments are recorded at acquisition cost less any impairment loss.

Foregoing a cash flow statement and additional disclosures in the notes

In accordance with the Law, Syngenta AG has decided to forego presenting additional information on interest-bearing liabilities and audit fees in the notes, as well as a cash flow statement, because it has prepared its consolidated financial statements in accordance with a recognized accounting standard (International Financial Reporting Standards as issued by the International Accounting Standards Board).

2. Information on income statement and balance sheet items

Dividend income

Dividend income in the current year consists entirely of dividends received from subsidiaries for the previous business year.

Other financial income

Other financial income consists mainly of guarantee and other fees received from subsidiaries.

Impairment Losses of Investments

Impairment losses of investments fully consist of an impairment on Syngenta Crop Protection AG.

Short-term interest-bearing loans to/from subsidiaries

Syngenta AG receives loans from Syngenta AG group companies and provides loans to Syngenta AG group companies.

3. Investments in subsidiaries & associates

The following are the significant legal entities in the Syngenta AG group of companies. The disclosure criteria are as follows:

- Companies directly owned by Syngenta AG
- Companies indirectly owned by Syngenta AG with sales in excess of USD 100 million or equivalent or total assets in excess of one
 percent of total Syngenta AG group assets, if the threshold is met by two consecutive years.
- Companies with a financing function

None of the legal entities are listed.

¹ The following capital and voting rights changed compared to 2023:

Syngenta Reinsurance Limited: 100% of capital and voting rights acquired by Syngenta AG on 13 November 2024 from Syngenta Crop Protection AG.

Syngenta (China) Investment Company Limited: 100% of capital and voting rights transferred by Syngenta Ltd. to Syngenta Group Co. Ltd. (not in Syngenta AG group)

MAS Seeds S.A.: 50% of capital and voting rights sold by Syngenta AG on 23 December 2024

Syngenta Participations AG: Merged into Syngenta Crop Protection AG on 20 June 2024

Except than for the above mentioned, the capital and voting rights in 2024 have not changed compared to 2023. Syngenta Philippines, Inc. has been newly included in the list because it reported sales in excess of USD 100 million or total assets in excess of one percent of total Syngenta AG group assets in 2024.

 $^{^{\}rm 1}$ Issued under Rule 144/Regulation S under the U.S. Securities Act of 1933

External borrowing activities

Syngenta AG has fully and unconditionally guaranteed on a senior unsecured basis the due and punctual payment of the principal of and any premium and interest on the debt instruments issued by Syngenta Finance N.V., which is an indirect wholly-owned finance subsidiary,

Syngenta Finance AG, which is a direct, wholly-owned finance subsidiary, and Syngenta Wilmington Inc., which is an indirect wholly-owned finance subsidiary. The guarantees rank equally with all other unsecured and unsubordinated debt of the group. No other subsidiary of Syngenta AG guarantees such debt securities. Due to guaranteed intercompany on-lending of external borrowings, transactions with the same nature as external borrowings are listed more than once.

During the second quarter of 2024 Syngenta Finance N.V., a subsidiary of Syngenta AG, entered into a USD 1,000 million term loan with a group of third-party financial institutions on the basis of a floating interest rate and a term of three years and during the fourth quarter of 2024 into a USD 550 million term loan with a third-party financial institution on the basis of a floating interest rate and a term of three years. The loans are guaranteed by Syngenta AG.

During the fourth quarter of 2024 Syngenta Finance AG, a subsidiary of Syngenta AG, issued a CHF 120 million domestic bond in the Swiss capital market on the basis of a fixed interest rate and a term of three years. The bond is guaranteed by Syngenta AG.

Group treasury - intercompany lending, borrowing, hedging and investing activities

Syngenta AG guarantees intercompany lending, borrowing and hedging activities as well as external investments for the Syngenta AG group for a maximum amount of USD 30,406 million (CHF 27,496 million) as at December 31, 2024, out of which USD 14,556 million (CHF 13,163 million) are outstanding as at December 31, 2024.

External hedging activities – financial instruments

External hedging activities refer to financial instruments where Syngenta Crop Protection AG is the contractual party hedging exposures arising in the Syngenta AG group with external counterparties.

These financial instruments are transacted under International Swap and Derivative Association (ISDA) contracts. In addition, for certain financial instruments positions, Credit Support Annex (CSA) contracts are in place under which cash is exchanged as collateral.

Syngenta AG guarantees the financial instruments transactions entered into under these ISDA contracts. The contingent liabilities related to these financial instruments are significantly limited by the credit risk mitigation measures applicable under the ISDA and the CSA contracts and amount to USD 16 million (CHF 15 million) as at December 31, 2024.

5.2 Litigation matters

Litigation is subject to many uncertainties, and the outcome of individual matters cannot be predicted with certainty. Consequently, it is reasonably possible that the final resolution of some of these matters could require Syngenta AG to make expenditures. Further, the range of amounts involved, as well as the period of time over which many of these expenditures may be made, cannot be reasonably estimated.

VIPTERA™

Beginning on September 12, 2014, several thousand lawsuits were filed against Syngenta in state and federal courts in the United States by plaintiffs seeking damages from Syngenta for commercializing its AGRISURE VIPTERA® (MIR162) and DURACADE™ corn seed in the United States without having obtained import approval from China for those products. In September 2017 plaintiffs and Syngenta reached a settlement to resolve all claims on behalf of all U.S. non-Viptera and Viptera producers as well as grain elevators and ethanol plants and the settlement is now final.

The settlement of the producer cases did not cover claims of the exporter plaintiffs such as Cargill, ADM, Louis Dreyfus, Trans Coastal Supply Company, Inc. ("Transcoastal"), The DeLong Company ("DeLong"), and Agribase International, Inc. ADM and Syngenta reached in December 2017 a settlement of the Viptera litigation that ADM had brought against Syngenta in Louisiana Court. Louis Dreyfus and Syngenta reached a settlement in May 2019. Agribase and Syngenta reached a settlement in February 2020. Transcoastal and Syngenta reached a settlement in October 2020. In August 2023, Syngenta and Cargill executed a settlement agreement regarding the Viptera litigation which Cargill had brought against Syngenta in Louisiana. As a result, Cargill's claims against Syngenta regarding its AGRISURE VIPTERA® and DURACADE™ corn seed have been dismissed. The United States District Court in Kansas remanded the DeLong lawsuit for trial to the United States District Court for the Western District of Wisconsin. In April 2024, DeLong and Syngenta executed a settlement agreement. Payment was made on May 21, 2024, and the lawsuit was dismissed. The agreement expressly stated that the settlement was not an admission of liability and was strictly a business decision. The DeLong settlement concluded all remaining Viptera litigation in the U.S.

In December 2015, a claim was filed in Ontario, Canada by a proposed representative plaintiff on behalf of a putative class comprising all farmers in Canada against Syngenta Canada Inc. and Syngenta AG seeking damages from Syngenta for commercializing its AGRISURE VIPTERA® (MIR162) and DURACADE™ corn seed in the North American corn market without having obtained import approval from China for those products. The causes of action referred to in the lawsuit include negligence and negligent misrepresentations. The allegations include claims that Syngenta actively misled farmers about the importance of the Chinese market, the timing and substance of the application for approval in China, its ability to channel VIPTERA™ corn into non-Chinese markets and its ability to contain the infiltration of VIPTERA™ corn to the North American corn supply. The proposed representative plaintiff is seeking on behalf of the putative class general and special damages of 300 million Canadian dollars (USD 209 million at December 31, 2024, exchange rates), punitive and aggravated damages of 100 million Canadian dollars (USD 70 million at December 31, 2024, exchange rates), the costs of distributing all monies awarded to class members, pre-judgment interest, and costs on a substantial indemnity basis. Syngenta's motion to strike this action was argued in April 2018, and on November 28, 2018, the judge dismissed the plaintiff's action in its entirety. The plaintiff appealed this decision. The appeal was heard in June 2019 and while the Court of Appeal denied plaintiff's appeal of the lower court's decision dismissing the claim as to the negligent misrepresentation and Competition Act claims, it granted the appeal as to the premature commercialization claim which would allow the lawsuit to continue as to that claim alone. Syngenta filed the documents necessary to seek leave to appeal the Court of Appeal's decision to the Supreme Court of Canada. On December 10, 2020, Syngenta's application for leave to appeal to the Supreme Court of Canada was denied. The parties proceeded to the certification stage of the proceeding. The motion for certification was heard on May 10-12, 2021. On September 29, 2021, the Superior Court certified the lawsuit. The certification decision was procedural and made no determination on the merits of the case. On January 15, 2024, the parties argued Syngenta's motion for summary judgment. That motion was denied on October 28, 2024, and Syngenta has filed a motion for leave to appeal. We are awaiting the court's decision.

On February 14, 2017, a similar action was filed in Quebec against Syngenta Canada Inc. and Syngenta AG. The Petitioners are seeking essentially the same relief as in the Ontario action on behalf of all corn producers conducting business in Quebec who sold corn for commercial purposes after November 18, 2013. They allege that Syngenta was negligent and engaged in illegal commercial practices, contrary to the Competition Act and the Civil Code of Quebec, and that damages (amount unspecified) will continue to accrue until the corn business between North America and China is re-established at the levels that existed before Syngenta's negligence occurred. Punitive damages, pre-judgment interest and costs are also claimed. Syngenta has entered an appearance in the action. No other steps have been taken

Syngenta is continuing to vigorously defend against the Canadian actions and strongly believes that they are without merit.

Canada beekeeper lawsuits

In September 2014, a claim was filed in Ontario, Canada by two proposed representative members on behalf of a putative class comprising all beekeepers who have owned or continue to own and operate honey producing, pollinating, and/or queen bee rearing businesses in Canada since January 1, 2006, against a number of Syngenta legal entities together with certain entities of a second manufacturer of neonicotinoid insecticides. Plaintiffs allege negligence through the sale by that manufacturer and by Syngenta of products containing such insecticides in the knowledge that they would be injurious to bees and by virtue of misrepresentations and concealment relating thereto. Plaintiffs claim 400 million Canadian dollars (USD 278 million at December 31, 2024, exchange rates) general and 50 million Canadian dollars (USD 35 million at December 31, 2024, exchange rates) punitive damages. The pleadings in the Ontario proceedings were subsequently amended by plaintiffs' counsel to add waiver of tort and unlawful conspiracy to the single cause of action, negligence, which was previously pleaded. Both of the additional causes of action are ancillary to and largely dependent on the negligence claim. The class has not yet been authorized.

In October 2014, a Motion for Authorization was filed by the same firm of plaintiffs' counsel in Montréal, Quebec seeking permission to bring a similar class proceeding in that province. The proposed representative plaintiff operates a family business specialized in the breeding of queen bees. The Quebec litigation closely resembles the original Ontario lawsuit claiming negligence except that, rather than a nationwide class, it alleges a class limited to Quebec. At this early stage damages are unspecified. The Motion for Authorization was argued in November 2017. The Quebec class has been authorized on August 20, 2018, and notices have been sent to potential class members. Plaintiffs' motion to add Syngenta AG as a defendant has been granted.

Syngenta will defend these lawsuits, the claims in which are without foundation.

Paraquat Parkinson's disease litigation

Since September 2017, approximately 9100 lawsuits (as of February 21, 2025), including more than 1,600 lawsuits that have been voluntarily dismissed or otherwise resolved, have been filed against Syngenta in state and federal courts in the United States by plaintiffs seeking damages from Syngenta arising from their use of or exposure to Syngenta's paraquat products. Plaintiffs allege that their use or exposure to Syngenta's paraquat products has caused them to develop Parkinson's disease and/or kidney disease. The cases name Syngenta AG, Syngenta Crop Protection, LLC, and Syngenta Seeds, and variously name alleged distributors of paraquat as additional defendants.

While the counts raised in each complaint differ slightly by plaintiff and jurisdiction, they tend to include: (1) Strict Liability - Design Defect; (2) Strict Liability - Failure to Warn; (3) Negligence; (4) Public Nuisance; (5) Violation of Consumer Fraud & Deceptive Business Practices Acts; (6) Breach of Implied Warranty of Merchantability; and (7) Punitive Damages. Certain suits also include claims by the spouses of individuals with Parkinson's disease for Loss of Consortium. The pending state court cases are in California, Delaware, Illinois, Pennsylvania, Washington, and West Virginia. The pending federal court cases were filed in various U.S. District Courts, though the majority of new cases are being filed directly in the Southern District of Illinois as part of the pending Multi-District Litigation.

<u>Multi-District Litigation ("MDL")</u> - On June 7, 2021, the Judicial Panel on Multidistrict Litigation determined that consolidation is appropriate and that the pending actions would be transferred to the Southern District of Illinois for pretrial purposes. The first Case Management Order, issued June 10, 2021, stayed all responsive pleading and related deadlines for the coordinated cases. The Court has also appointed a Special Master to oversee discovery.

On February 14, 2022, the Court granted the defendants' motions to dismiss as to all public nuisance claims and certain state consumer protection claims and denied the motions to dismiss as to the other causes of action without prejudice. On April 13, 2022, Syngenta submitted answers in sixteen potential bellwether cases identified by the Court. On the same date, the Court selected six of those bellwether plaintiffs for further case-specific discovery; that discovery has been completed. On August 17, 2022, the Court selected twenty additional plaintiffs and ordered limited discovery and depositions in each of those cases to collect representative data and evaluate claims. On August 30, 2022, the Court granted motions to remand for six cases that were originally filed in Delaware state court and removed to the MDL- additional remand orders have been issued in other state court proceedings since that date. On July 28, 2023, the parties completed summary judgment and Daubert briefing, and a hearing on those motions was held from August 21-24, 2023. At the conclusion of the hearing, the MDL court canceled the trial scheduled to begin in October 2023. On January 22, 2024, the Court ordered additional limited discovery of 25 plaintiffs. Since that order, the Court has ordered discovery of additional replacement plaintiffs in response to dismissals filed by some of the plaintiffs selected in the January 22, 2024, and dismissals filed by replacement plaintiffs.

On April 17, 2024, the MDL court granted Defendants' Motion to Exclude the expert testimony of the sole expert on the critical issue of general causation that had been presented by the Plaintiffs in the four initial bellwether cases selected for trial. On the same date, the MDL court also granted Defendants' Joint Motion for Summary Judgment dismissing those four cases due to the Plaintiffs' inability to establish a causal link between occupational paraquat exposure and Parkinson's disease without the proffered expert testimony. Plaintiffs have since filed a notice of appeal of these dismissals to the 7th Circuit Court of Appeals; briefing was completed on October 16, 2024, and oral argument was held on February 12, 2025 and a decision is expected in the coming months. Also on April 17, 2024, the MDL court ordered the parties to select 16 member cases from the global Plaintiff pool for limited fact discovery, following which the court will issue a Case Management Order addressing discovery and trial dates. On August 6, 2024, the MDL court selected 10 additional bellwether plaintiffs for case-specific discovery but no trial dates have been set.

New cases will continue to be transferred to the MDL as tag-along actions as they are filed, and certain new cases are being filed directly into the MDL proceedings pursuant to the first Case Management Order.

Illinois State Court Claims -

Two additional cases are pending in Illinois state courts, and Syngenta has filed its answers as to both following denial of its motions to dismiss. The cases are in Vermillion and St. Clair County, Illinois. Discovery is in progress in the St. Clair County suit and trial is scheduled to begin on March 16, 2026. In February 2024, an amended complaint was filed in the Vermillion County case to replace the plaintiff with the plaintiff's estate after he passed away.

California Consolidated Proceeding - Beginning in April 2019, plaintiffs in California state court filed complaints against Syngenta AG and Syngenta Crop Protection LLC and variously name Chevron USA, Inc., Growmark, Inc., and/or Wilbur-Ellis Company, LLC (or subsidiaries and/or affiliates thereof) as additional defendants. The ten California cases filed in 2019 have been consolidated for pretrial purposes. Defendants demurred to the complaints in the consolidated California cases on the grounds of federal preemption and primary jurisdiction. Defendants' demurrer was denied by order dated December 23, 2019, except as to Count IV (the California Consumer Legal Remedies Act claim), which was dismissed, and on January 21, 2020, Syngenta filed its answers in the consolidated California cases. The settlement, discussed in further detail below, covers and conditionally settles the ten California state court claims that were pending. Additional cases were filed since the consolidation. On December 7, 2021, the Court entered an order coordinating the state court proceedings with the MDL. On March 15, 2022, the Court selected four bellwether plaintiffs from among the potential selections proposed by each side. Since bellwether selection, one plaintiff has passed away, and an additional bellwether plaintiffs case was withdrawn after a medical exam concluded that they did not have Parkinson's disease. The parties completed summary judgment and Sargon briefing. On November 26, 2024, the Court granted exclusion of the plaintiffs' sole general causation expert under California law. The first state court trial was scheduled to begin on January 8, 2024, but that trial date has been adjourned. The case to be tried is still to be determined.

Additional State Court Claims - Additional complaints, which raise nearly identical claims as the previously filed cases, have been filed in state courts- certain state court proceedings have been removed to federal court and transferred to the MDL. There are currently active suits pending in state court in Delaware, Pennsylvania, Washington, and West Virginia. The Delaware cases remain in the pleading or early discovery stage and coordination efforts and responsive pleadings have been filed or are otherwise in development. On November 23, 2021, one of the pending Washington state court cases, Smith v. Syngenta AG, was dismissed with prejudice in response to Syngenta's motion to dismiss, but the dismissal was reversed on appeal. Discovery has been completed and pre-trial briefing is in progress. A trial is scheduled to begin on May 5, 2025.

On May 10, 2022, the court in Philadelphia County, Pennsylvania issued an order coordinating the pending Pennsylvania state court actions for pre-trial proceedings. On June 6, 2022, the Court issued a case management order temporarily staying all responsive pleading deadlines and dispositive motions until further order of the court. Discovery deadlines have also been stayed while additional conferences occur. On November 9, 2023, the Court entered a Case Management Order which set out a schedule for bellwether selection, discovery, and motions practice. Defendants' preliminary objections to Plaintiffs' proposed Long Form Complaint were denied with respect to Syngenta Crop Protection LLC but granted with respect to Syngenta AG on jurisdictional grounds. Discovery is complete for the first tranche of 10 bellwether cases, and the initial cases have been selected for trial. Four trials have been scheduled for 2025 and 2026, with the first trials set to begin June 2, 2025, and the second on August 4, 2025.

Additional cases have been filed in the Delaware Superior Court including some cases with multiple plaintiffs. On May 31, 2024, the Delaware court granted-in-part and denied-in-part Defendants' motion to dismiss. Specifically, the Court granted the motion to dismiss certain implied warranty claims and strict products liability claims based on the applicable statutes of limitation, statutes or repose, or preemption; certain other implied warranty and strict products liability claims were dismissed based on a failure to state a claim or otherwise meet state-specific pleading requirements, and punitive damages claims by certain plaintiffs were dismissed for failure to state a claim. The Court denied Defendants' motion as to joinder. No case schedule has been set, nor have the cases been formally consolidated.

<u>Canadian Litigation.</u> Lawsuits alleging that Syngenta's paraquat products to have caused their Parkinson's disease have been filed by plaintiffs seeking class certification in Quebec, Ontario, and British Columbia. The Plaintiffs proceeded first in Quebec seeking to authorize a national class. Syngenta opposed the motion, and maintained that if authorized, the class should be limited to Quebec. The authorization motion was heard June 6, 2022, and a Quebec only class was authorized on July 27, 2022. In February 2023, the court granted the plaintiffs motion to discontinue the Ontario proceeding to pursue the action in British Columbia. On August 9, 2024, the British Columbia Supreme Court issued a decision authorizing a Canadian class (excluding Quebec). Syngenta is appealing the decision, in part, related to claims certified in battery and of certain evidentiary admissibility issues.

Federal Trade Commission and related litigation

On September 29, 2022, the Federal Trade Commission ("FTC") and ten states filed a complaint in the United States District Court for the District of North Carolina against Syngenta Crop Protection AG, Syngenta Corporation, Syngenta Crop Protection, LLC., and Corteva, Inc. alleging violations of federal and state antitrust laws. The allegations cover what the complaint asserts are "many years," and involve the distributor loyalty programs of Syngenta Crop Protection, LLC. and Corteva, Inc. and claim that the programs are used to exclude generic competition. The complaint sought to enjoin the defendants from engaging in the alleged unlawful conduct, now and in the future, regarding all crop protection products and active ingredients. The complaint further sought unspecified monetary and other equitable relief, as well as civil penalties on behalf of the state plaintiffs under their respective state laws, and costs including attorneys' fees. Additional complaints were subsequently filed in the federal courts in Indiana, North Carolina, and Mississippi by individuals against the Syngenta entities, Corteva, Inc. and other unrelated parties alleging violations of federal and state antitrust laws as well as other statutes and common law ("the Individual Lawsuits"). The allegations involved the loyalty programs which were the subject of the FTC complaint. The Individual Lawsuits seek class certification and compensatory and treble damages (as yet unspecified) as well as injunctive relief, costs, attorneys' fees and post and prejudgment interest.

On December 12, 2022, Syngenta filed a motion to dismiss the FTC complaint. Following the filing, the FTC amended its complaint in an effort to address the deficiencies pointed out in Syngenta's motion. The amended complaint also added two additional states as plaintiffs, bringing the total number of state plaintiffs to twelve. Syngenta has filed a revised motion to dismiss directed at the amended complaint. On December 30, 2022, the state of Arkansas filed a separate lawsuit in federal court in Arkansas modeled on the FTC complaint.

Plaintiffs in some of the Individual Lawsuits moved the United States Judicial Panel on Multi-District Litigation (the "JPML") to transfer and consolidate the Individual Lawsuits in the Southern District of Indiana (the "MDL Motion"). Syngenta and other defendants filed a response to the MDL Motion requesting that the JPML instead transfer all Individual Lawsuits to the Middle District of North Carolina. The JPML held a

hearing on the MDL Motion on January 26, 2023. On February 6, 2023, the JPML issued an order centralizing the Individual Lawsuits in the Middle District of North Carolina. The individual plaintiffs and Syngenta agreed that briefing on Syngenta's motion to dismiss the private plaintiffs' lawsuits would wait until after a decision on the motion to dismiss the FTC lawsuit. Syngenta filed a motion to transfer the Arkansas lawsuit to the MDL. On January 17, 2024, that motion was denied.

Syngenta's motion to dismiss the FTC complaint was argued on December 2, 2023. The motion was denied on January 12, 2024.

Syngenta filed its motions to dismiss the individual plaintiffs' lawsuits on March 11, 2024, and the Arkansas litigation on April 27, 2024. On January 29, 2025, the United States District Court for the District of North Carolina issued its decision regarding the individual plaintiffs' lawsuits. The court granted the motion in part and denied it in part, striking the federal damage claims and some of the state law claims. The federal claims for injunctive relief and several state law claims remain. We are awaiting a decision on the motion to dismiss the Arkansas lawsuit. Discovery on these lawsuits, including that brought by the FTC, are underway. Depositions will take place in 2025.

Syngenta believes that the allegations of these complaints are totally without merit and will continue to defend the lawsuits.

5.3 Other

In a Deed of Guarantee dated December 6, 2017, Syngenta AG guaranteed to Syngenta Pensions Trustee Limited (the "Fund"), that if Syngenta Limited, or other Syngenta affiliates ("Employers"), which participate in the Fund, do not pay punctually amounts they owe to the Fund, then Syngenta AG will pay that amount instead of the Employers.

In a Deed of Guarantee dated January 1, 2019, Syngenta AG guaranteed to the City of Basel, Basel, the rental payments and other monetary payment obligations for leased property in Basel, to be paid by Syngenta Crop Protection AG.

In a Deed of Guarantee dated December 1, 2019, Syngenta AG guaranteed to IGIMO AG, Zurich, the rental payments and other monetary payment obligations for leased property in Stein, to be paid by Syngenta Crop Protection AG.

In a Deed of Guarantee dated March 1, 2021, Syngenta AG guaranteed to SLB ZAAD S.A.R.L, Luxembourg, the rental payments and other monetary payment obligations for leased property in Enkhuizen, to be paid by Syngenta Seeds B.V.

In a Deed of Guarantee dated November 1, 2022, Syngenta AG guaranteed to SYNG Portfolio Owner LLC, Chicago, the rental payments and other monetary payment obligations for leased property in Slater, IA to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated November 1, 2022, Syngenta AG guaranteed to SYNG Portfolio Owner LLC, Chicago, the rental payments and other monetary payment obligations for leased property in Stanton, MN to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated November 1, 2022, Syngenta AG guaranteed to SYNG Portfolio Owner LLC, Chicago, the rental payments and other monetary payment obligations for leased property in Durham, NC to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated November 1, 2023, Syngenta AG guaranteed to SYOMNE001 LLC, Delaware, the rental payments and other monetary payment obligations for leased property in Omaha, NE to be paid by Syngenta Crop Protection LLC.

In a Deed of Guarantee dated November 1, 2023, Syngenta AG guaranteed to SYNAID001 LLC, Delaware, the rental payments and other monetary payment obligations for leased property in Nampa, ID to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated November 1, 2023, Syngenta AG guaranteed to SYMAIL001 LLC, Delaware, the rental payments and other monetary payment obligations for leased property in Malta, IL to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated November 1, 2023, Syngenta AG guaranteed to SYWOCA001 LLC, Delaware, the rental payments and other monetary payment obligations for leased property in Woodland, CA to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated July 1, 2024, Syngenta AG guaranteed to Bankers Commercial Corporation, California, the rental payments and other monetary payment obligations for leased property in Jealott's Hill research station to be paid by Syngenta Limited.

In a Deed of Guarantee dated October 1, 2024, Syngenta AG guaranteed to FNLR Need for Seed LLC, New York, the rental payments and other monetary payment obligations for leased property in Lone Tree, IA to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated October 1, 2024, Syngenta AG guaranteed to FNLR Need for Seed LLC, New York, the rental payments and other monetary payment obligations for leased property in Vero Beach, FL to be paid by Syngenta Seeds LLC.

In a Deed of Guarantee dated October 1, 2024, Syngenta AG guaranteed to FNLR Need for Seed LLC, New York, the rental payments and other monetary payment obligations for leased property in Waterloo, NE to be paid by Syngenta Seeds LLC.

Syngenta AG is part of a group of Swiss entities of Syngenta which are jointly and severally liable for the whole Swiss VAT amount due to the Swiss Tax authorities by this group.

6. Full-time equivalents

Syngenta AG does not have any employees.

7. Subsequent events

No events occurred between the balance sheet date and the date on which these financial statements were approved by the Board of Directors that would require adjustments to or disclosure in the financial statements.

Report of the Statutory Auditor to the General Meeting of Syngenta AG, Basel

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Syngenta AG (the Company), which comprise the balance sheet as at 31 December 2024, and the income statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements comply with Swiss law and the Company's articles of incorporation.

Basis for Opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the provisions of Swiss law, together with the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Syngenta AG, Basel

Report of the Statutory Auditor to the General Meeting on the Financial Statements

Board of Directors' Responsibilities for the Financial Statements

The Board of Directors is responsible for the preparation of the financial statements in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Syngenta AG, Basel

Report of the Statutory Auditor to the General Meeting on the Financial Statements

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In accordance with Art. 728a para. 1 item 3 CO and PS-CH 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

Based on our audit in accordance with Art. 728a para. 1 item 2 CO, we confirm that the proposal of the Board of Directors complies with Swiss law and the Company's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Cautionary statement regarding forwardlooking statements and linked websites:

This document may contain forwardlooking statements, which can be identified by terminology such as "expect," "would," "will," "potential,"
"plans," "prospects," "estimated,"
"aiming," "on track" and similar
expressions. Such statements may be subject to risks and uncertainties that could cause the actual results to differ materially from these statements. For Syngenta, such risks and uncertainties include risks relating to legal proceedings, regulatory approvals, new product development, increasing competition, customer credit risk, general economic and market conditions, compliance and remediation, intellectual property rights, implementation of organizational changes, impairment of intangible assets, consumer perceptions of genetically modified crops and organisms or crop protection chemicals, climatic variations, fluctuations in exchange rates and/or grain prices, single source supply arrangements, political uncertainty, natural disasters, and breaches of data security or other disruptions of information technology. Syngenta assumes no obligation to update forward-looking statements to reflect actual results, changed assumptions or other factors.

Material contained on linked websites, Syngenta's own or from a third-party, is not part of and is not incorporated by reference in this report. Syngenta is not responsible for the content provided on third-party websites.
