

ADEPIDYN™ – For control of leaf spot complex in soybeans

Outstanding control of leaf spot complex, *Septoria*, *Cercospora* and *Corynespora*.

ADEPIDYN™ is especially effective against leaf spots in soybeans.

Used in soybeans, ADEPIDYN™ brings a range of benefits including:

- Safety: ADEPIDYN™ has been found to be safe on soybean whether used solo or in tank-mixes.
- Best-in-class efficacy in all weather conditions, making it one of the most effective disease control tools for soy growers.
- Long duration effective control, resulting in significant yield improvement.
- Rainfastness within one hour of application.

ADEPIDYN™ is designed to replace less effective compounds which have reduced effectiveness because of adaptation, or less sustainable compounds that are being removed from the market due to regulatory reasons.
